By the free trial services you can get close realization with our AP-211 quiz guides, and know how to choose the perfect versions before your purchase.

Salesforce Health Cloud Accredited Professional Sample Questions (Q67-Q72):

NEW QUESTION # 67

Which industry data standard should a consultant consider when designing interoperability with electronic health record (EHR) sources with Health Cloud?

- A. Personal Health Record (PHR)
- **B. FHIR R4**
- C. Clinical Data Acquisition
- D. HL7 v1 Messaging

Answer: B

Explanation:

* FHIR R4 Standard:

Exact Extract:

"Health Cloud supports FHIR R4 as an industry data standard for EHR interoperability." Reference:

* Other Options:

HL7 v2 is also supported but FHIR R4 is the recommended modern standard.

Clinical Data Acquisition and PHR are not relevant data standards for EHR interoperability in this context.

NEW QUESTION # 68

Bloomington Caregivers is implementing Health Cloud for managing the healthcare data of children under the age of 13. Which three considerations should the company take into account to ensure compliance with the Children's Online Privacy Protection Act (COPPA)?

Choose 3 answers

- A. Ensuring that Bloomington Caregivers' system implementation partner has met all COPPA regulations during the build phase
- B. Obtaining verified parental consent before collecting and storing any personal information of children
- C. Disclosing the organization's privacy policy to parents and obtaining their consent
- D. Ensuring information collected about children is protected with at rest and in-transit encryption
- E. Implementing appropriate security measures to safeguard children's personal information

Answer: B,C,E

Explanation:

Step-by-Step Explanation:

COPPA Requirements in Healthcare Applications:

Disclose privacy policy and obtain parental consent:

"Organizations must provide clear privacy notices to parents and obtain their consent before collecting any personal information from children under 13."

- Reference: Salesforce Security Guide, COPPA Compliance

Obtain verified parental consent before collection/storage:

"Verified parental consent is a core requirement for COPPA, prior to collection and storage of children's personal data." Implement security measures:

"Appropriate security controls and safeguards must be in place to protect children's data as mandated by COPPA." Encryption:

While encryption is a best practice (option D), COPPA explicitly requires appropriate security but does not mandate encryption at rest and in transit as a specific requirement, though it is recommended.

Partner Compliance:

Option E refers to the implementation partner, but regulatory responsibility remains with the covered entity (Bloomington Caregivers), not the partner.

Reference:

Salesforce Security Implementation Guide - COPPA Compliance

Health Cloud Security and Compliance

NEW QUESTION # 69

A consultant is preparing to install Health Cloud in a production org for the first time.

Which three tasks should the consultant ensure are completed prior to installing Health Cloud?

Choose 3 answers

- A. Enable Shield Event Monitoring.
- B. Enable Person Accounts.
- C. Enable Chatter.
- D. Enable Health Cloud Installation Monitor.
- E. Enable Contacts to Multiple Accounts.

Answer: B,C,E

Explanation:

Step-by-Step Explanation:

Salesforce Health Cloud Prerequisites:

Enable Person Accounts:

Required for representing patients and healthcare contacts.

"Person Accounts must be enabled before installing Health Cloud."

- Reference: Health Cloud Installation Prerequisites

Enable Chatter:

Health Cloud uses Chatter for collaboration between care teams.

"Chatter must be enabled to use Health Cloud features like care coordination and notes."

- Reference: Health Cloud Installation Prerequisites

Enable Contacts to Multiple Accounts:

Necessary to relate patients to multiple organizations/providers.

"Enable Contacts to Multiple Accounts to relate contacts (patients) to more than one account (e.g., provider, payer)."

- Reference: Health Cloud Installation Prerequisites

Other Options:

B . Enable Shield Event Monitoring: Not required for Health Cloud installation (but is a best practice for auditing and compliance in some orgs).

D . Enable Health Cloud Installation Monitor: Not a standard Salesforce setting or prerequisite.

Reference:

Health Cloud Installation Prerequisites

NEW QUESTION # 70

A customer is implementing Intelligent Appointment Management in Health Cloud to eliminate swivel chair to other scheduling systems.

Which two connectivity options should a consultant leverage as the scheduling engine?

Choose 2 answers

- A. Salesforce Scheduler
- B. Electronic Health Record (EHR) System
- C. Business Rules Engine
- D. Scheduler for Industries

Answer: A,B

NEW QUESTION # 71

A customer is looking to implement Discovery Framework to manage their intake and clinical assessments.

Which three capabilities should a consultant configure with Health Cloud out-of-the-box to enhance their assessment functionality?

Choose 3 answers

- A. Using Previously Submitted Responses
- B. FHIR Question Bank
- C. SMS Assessment Completion
- D. Digital Signature Capture
- E. Adding a QR Code

Answer: A,B,D

Explanation:

Step 1: Understanding the Discovery Framework in Health Cloud

The Discovery Framework in Salesforce Health Cloud is designed to streamline intake and clinical assessments by providing reusable, modular, and compliant tools for healthcare organizations. It enables organizations to collect, store, and reuse responses to assessment questions efficiently and securely.

Reference:

"Discovery Framework provides a way to design, distribute, and reuse forms and assessments for clinical and non-clinical scenarios. It leverages reusable question banks, digital data capture, and integration with Health Cloud objects." Administer Health Cloud - Assessments and Discovery Framework Step 2: FHIR Question Bank Capability: The use of a FHIR-based Question Bank allows healthcare organizations to standardize questions and reuse them across multiple assessments. This ensures consistency and regulatory compliance in data collection.

Extract:

"The Question Bank leverages the FHIR Questionnaire resource, making it easy to define, store, and reuse question sets for various clinical assessments." Administer Health Cloud - Discovery Framework: Question Bank Step 3: Digital Signature Capture Capability: Digital Signature Capture is supported natively in Health Cloud assessments, ensuring consent, authenticity, and regulatory compliance.

Extract:

"Out-of-the-box support for digital signature capture in assessment forms allows for secure, auditable consent capture, which is often required for clinical or legal compliance." Administer Health Cloud - Discovery Framework Features Step 4: Using Previously Submitted Responses Capability: The ability to use previously submitted responses enhances user experience and speeds up the intake process by pre-populating assessments with earlier responses where relevant.

Extract:

"You can configure assessments to pre-fill questions with responses from prior assessments, supporting both efficiency and patient engagement." Administer Health Cloud - Reuse of Data in Assessments Step 5: Options Not Natively Supported Out-of-the-Box A . Adding a QR Code: Not natively supported in Health Cloud Discovery Framework out-of-the-box for assessments. This would require custom development or external integrations.

B . SMS Assessment Completion: Not supported out-of-the-box; may require integration with Marketing Cloud or external SMS services and customization.

Reference for non-supported features:

"Features such as QR code generation or SMS completion notifications are not available out of the box and would require customizations or integrations." Administer Health Cloud

NEW QUESTION # 72

.....

As the labor market becomes more competitive, a lot of people, of course including students, company employees, etc., and all want to get AP-211 authentication in a very short time, this has developed into an inevitable trend.
