## Citrix Deploy and Manage Citrix ADC 13 with Citrix Gateway Sample Questions (Q72-Q77):

### NEW QUESTION # 72

A Citrix Administrator has received a low disk space alert for /var on the Citrix ADC.

Which type of files should the administrator archive to free up space?

- A. Nsconfig
- B. DNSCache
- **C. Nslog**
- D. Syslog

**Answer: C**

Explanation:

#### NEW QUESTION # 73

Scenario: A Citrix Administrator configured Citrix ADC load balancing to send requests to one of three identical backend servers. Each server handles multiple protocols, and load balancing is set up in round-robin mode. The current load-balancing setup on the Citrix ADC is:

- \* One load-balancing virtual server with one externally accessible VIP
- \* One service created for each protocol type
- \* One server entity for each backend resource

During business hours, the administrator wants to make changes to one backend server without affecting the other servers. What is the most efficient way for the administrator to ensure that all traffic is routed away from the server without impeding responses from other resources?

- A. Disable the backend server entity targeted for change.
- **B. Unbind the correct server entity from the load-balancing virtual server.**
- C. Disable the load-balancing virtual server.
- D. Disable the backend service entity targeted for change.

**Answer: B**

#### NEW QUESTION # 74

Scenario: While attempting to access a web server that is load-balanced by a Citrix ADC using HTTPS, a user receives the message below:

SSL/TLS error: You have not chosen to trust "Certificate Authority" the issuer of the server's security certificate.

What can a Citrix Administrator do to prevent users from getting this message?

- A. Ensure that users have the certificate's private key.
- B. Ensure that users have the server certificate installed.
- **C. Ensure that the server certificate is linked to its respective intermediate and root certificates.**
- D. Ensure that users have the certificate's public key.

**Answer: C**

Explanation:

#### NEW QUESTION # 75

Which three Unified Gateway elements can be configured by the Unified Gateway Wizard?  
(Choose three.)

- A. Rewrite policy for HTTP to HTTPS redirect
- **B. An SSL Server Certificate for the Unified Gateway virtual server**
- **C. The Unified Gateway primary virtual server**
- D. Responder policy for HTTP to HTTPS redirect
- **E. A primary and any optional secondary authentication configuration**

**Answer: B,C,E**
