First-Grade Adobe AD0-E725: Adobe Commerce Developer Expert Pdf Dumps - Pass-Sure Pass4sures AD0-E725 Latest Exam Cram

our AD0-E725 practice torrent is the most suitable learning product for you to complete your targets. It is never too late to try new things no matter how old you are. Someone always give up their dream because of their ages, someone give up trying to overcome

AD0-E725 exam because it was difficult for them. Now, no matter what the reason you didn't pass the exam, our study materials will try our best to help you. If you are not sure what kinds of AD0-E725 Exam Question is appropriate for you, you can try our free demo of the PDF version. There must be one that suits you best.

Adobe Commerce Developer Expert Sample Questions (Q48-Q53):

NEW QUESTION # 48

An Adobe Commerce Cloud Developer is tasked with investigating slow page loads and intermittent errors reported by a client after a recent deployment to their Pro Production environment.

Which action should the Developer use to quickly access and analyze the necessary data?

- A. Go to New Relic Log Management to access aggregated log data, allowing the analysis of application, infrastructure, CDN, and WAF errors.
- B. Access Cloud Console to review environment messages and deployment logs that took place during the previous deployment to production.
- C. Connect via SSH into each production node to review system and application logs independently for a more accurate representation of issues being logged.

Answer: A

NEW QUESTION # 49

A multi-source merchant asks an Adobe Commerce Developer to prioritize inventory source selection based on shipping address and minimal delivery cost.

How should the Developer implement this task functionality?

- A. Register New Source Selection Algorithms via di.xml and implement SourceSelectionInterface.
- B. Configure Distance Priority Algorithm and implement PlaceReservationsForSalesEventInterface.
- C. Use Source Priority Algorithm and utilize GetSourceSelectionAlgorithmList.

Answer: B

NEW QUESTION # 50

An Adobe Commerce Developer is implementing asynchronous communication with a third-party system using RabbitMQ. The XML files used must be able to configure a local queue and consume messages published by the third-party system.

Which files should the Developer use?

- A. queue_topology.xml and queue_publisher.xml
- B. queue_topology.xml and queue_consumer.xml
- C. communication.xml, queue_topology.xml, and queue_publisher.xml
- D. communication.xml, queue_topology.xml, and queue_consumer.xml

Answer: B

NEW QUESTION # 51

A customer wants their Adobe Commerce Cloud platform to be upgraded to the latest available official version. They would like to assess the compatibility of their current version compared to the upgraded version.

How should the Developer gather this information and compile an upgrade plan for the customer?

- A. Familiarize themselves with the minimum system requirements of Adobe Commerce.
- B. Run the Site-Wide Analysis Tool (SWAT) which provides detailed information on the system.
- C. Run the command `bin/magento upgrade:compatibility:report` to export the needed information.

Answer: C

Explanation:

Adobe Commerce provides a built-in Upgrade Compatibility Tool (UCT) that allows developers to check for potential code incompatibilities before performing a version upgrade.

The UCT:

- * Analyzes the current codebase against the target upgrade version.
- * Reports on deprecated classes, methods, and APIs that could break during the upgrade.
- * Produces a compatibility report (HTML/CSV/JSON) that can be shared with customers as part of the upgrade plan.

This tool is specifically designed to help developers assess upgrade risks and is the official Adobe Commerce-recommended method for preparing upgrade assessments.

* Option A (SWAT): The Site-Wide Analysis Tool provides performance, configuration, and health insights, but it does not analyze code compatibility for upgrades.

* Option B (minimum system requirements): This ensures the environment is technically capable of running the new version but does not provide insights into custom code and extension compatibility.

Official Documentation Extracts:

* "The Upgrade Compatibility Tool helps you identify potential issues in your custom code when upgrading to a new Adobe Commerce release. It scans your codebase and produces a report highlighting possible code changes that may be required."- Adobe Commerce DevDocs: Upgrade Compatibility Tool

* "Run bin/magento upgrade:compatibility:report to generate the upgrade compatibility report. The report provides details about deprecated and removed code, APIs, and incompatibilities."- Adobe Commerce CLI Reference

NEW QUESTION # 52

A Developer using API Mesh is assigned to optimize the integration of several third-party APIs with Adobe Commerce. Part of this task is to address performance issues such as the n+1 problem.

In this scenario, which option should the Developer implement?

- A. Use API Mesh as a middleware for aggregating data from APIs back into Adobe Commerce.
- **B. Use API Mesh batching to combine multiple API requests into a single query.**
- C. Use API Mesh to replace the existing APIs with direct GraphQL queries.

Answer: B

NEW QUESTION # 53
