

# Desktop-Based VMware 3V0-32.23 Practice Test

BTW, DOWNLOAD part of Itexamguide 3V0-32.23 dumps from Cloud Storage: <https://drive.google.com/open?id=1pcVvU-mjP4sXYUzXUsCoQc9xICp18qIG>

Our 3V0-32.23 practice questions attract users from all over the world because they really have their own charm. No product like our 3V0-32.23 study guide will seriously consider the needs of users in all aspects. From product content to system settings, we will give you what you want! Firstly, you definitely want to pass the exam for sure. Our 3V0-32.23 Exam Questions are high-effective with a high pass rate as 98% to 100%. So don't hesitate, just come and buy our 3V0-32.23 learning braindumps!

VMware 3V0-32.23 Exam covers a wide range of topics related to cloud management and automation, including designing and implementing vRealize Automation solutions, designing and implementing vRealize Operations Manager solutions, designing and implementing vRealize Suite Lifecycle Manager solutions, and designing and implementing VMware NSX solutions. 3V0-32.23 exam also covers topics such as configuring and managing vRealize Automation, vRealize Operations Manager, vRealize Suite Lifecycle Manager, and VMware NSX.

The Cloud Management and Automation Advanced Design certification is intended for professionals with a minimum of two years of experience designing and implementing advanced cloud management and automation solutions using VMware vSphere. However, those without sufficient experience can still benefit from this certification by studying and practicing the exam objectives. Cloud Management and Automation Advanced Design certification provides a recognized standard of knowledge and skill in cloud management and automation, which can help professionals advance their careers in the IT industry.

## VMware 3V0-32.23 Dumps - Hassle-Free Accomplishment

To make your review more comfortable and effective, we made three versions of 3V0-32.23 study guide as well as a series of favorable benefits for you. We are concerted company offering tailored services which include not only the newest and various versions of 3V0-32.23 Practice Engine, but offer one-year free updates services with patient staff offering help 24/7. It means that as long as our professionals update the 3V0-32.23 learning quiz, you will receive it for free.

## VMware Cloud Management and Automation Advanced Design Sample Questions (Q182-Q187):

### NEW QUESTION # 182

A cloud architect is tasked with designing a solution for guest virtual machine backup system integration for an organization's vRealize Automation (vRA) private cloud.

During requirements gathering, the backup system vendor confirmed that REST API methods are available for the following:

- Install and configure backup agent
- Initiate incremental backup
- Initiate full system backup
- Uninstall backup agent and remove number of nodes from license node count
- Only authorized users should initiate full system backups
- Which design solution addresses this scenario?

- A. Execute backup system REST APIs using vRA software components.
- B. Execute backup system REST APIs using vRealize Orchestrator workflows at appropriate vRA lifecycle state/event.
- C. Execute backup system REST APIs using a third-party configuration management solution.
- D. Execute backup system REST APIs using vRA custom properties.

**Answer: B**

#### NEW QUESTION # 183

A large non-profit organization is working to automate deployment of servers and software. For one popular software package, the organization owns a limited number of instance licenses which must be tracked per deployment. Currently this is a manual process, involving an operator updating a SQL database of licensing information. The cloud architect has already designed a software component and blueprint capable of deploying the software.

Which design meets the requirements of this scenario?

- A. Publish the blueprint as a catalog item with a quota configured to limit the number of deployments.
- B. Publish the blueprint as a catalog item with the appropriate custom property.
- C. Design an approval policy using the "Required based on conditions" option to validate against the SQL database.
- D. Design an approval policy using event subscription.

**Answer: C**

#### NEW QUESTION # 184

An architect has been asked to design a configuration management solution.

Following an initial design workshop with the customer, the following information is known about the existing environment:  
The customer already has deployed a VMware Software-Defined Data Center.

The customer is fully licensed for Aria Universal Suite - Standard.

The customer has a corporate policy stating that all user authentication must be completed using Active Directory.

The customer has sufficient budget for additional license purchases (if required).

The following solution requirements have been captured during the design workshop, the solution must:

Be capable of automating the deployment of software to managed virtual machines.

Provide configuration management capabilities.

Provide a centralized Single Sign-On (SSO) solution for all of the cloud management solution.

Which three design decisions would meet the requirement? (Choose three).

- A. VMware Aria Automation Orchestrator will be configured to use Workspace One Access as its authentication method.
- B. Workspace ONE Access will be configured to use Active Directory as the authentication solution.
- C. VMware Aria Automation Config will be deployed.
- D. VMware Aria Automation Orchestrator (standalone) will be deployed.
- E. Workspace One Access will be deployed to provide a Single Sign-On solution for all VMware Aria cloud management components.
- F. Workspace One Access will be configured to use the system domain for user authentication.

**Answer: B,C,E**

Explanation:

Deploying Workspace One Access provides a centralized SSO solution for all VMware Aria cloud management components.

VMware Aria Automation Config delivers the configuration management and software automation capabilities.

Configuring Workspace One Access to use Active Directory satisfies the corporate policy for user authentication.

#### NEW QUESTION # 185

What role does VMware Aria Operations play within a Cloud Management logical design?

- A. Monitoring and maintaining IT infrastructure
- B. Creating marketing campaigns
- C. Managing human resources
- D. Analyzing financial data

**Answer: A**

## NEW QUESTION # 186

An architect wants the ability to associate a blueprint with the default machine states for the use of extensibility tasks.

Which four default machine states could be associated with a blueprint to call out extensibility tasks?

(Choose four.)

- A. UnprovisionMachine
- B. Disposing
- C. RegisterMachine
- D. MachineProvisioned
- E. Initialize
- F. Expired
- G. Deleting

**Answer: A,B,C,F**

## NEW QUESTION # 187

In our software version of 3V0-32.23 exam questions the unique point is that you can take part in the 3V0-32.23 practice test before the real 3V0-32.23 exam. You never know what you can till you try. so that they can enrich their knowledge before the real 3V0-32.23 exam. However, confidence in yourself is the first step on the road to success. Our mock exam provided by us can help every candidate to get familiar with the Real 3V0-32.23 Exam, which is meaningful for you to take away the pressure and to build confidence in the approach.
