NEW QUESTION # 99

You are configuring the period templates that are used for inventory inquiries. Today's date is November 3, 2020.

The period templates configuration is shown in the following graphic. You set the value for the Direction field to backward.

☐ Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.

☐ NOTE: Each correct selection is worth one point.

Answer:

Explanation:

☐ Explanation:

Graphical user interface, text Description automatically generated

☐

NEW QUESTION # 100

A company uses Dynamics 365 Supply Chain Management to manage maintenance requests by using asset management.

The company requires the creation of automatic assets for a functional location.

You need to configure the data.

Which two configurations should you use? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. attribute types
- **B. functional location type**
- **C. asset type default**
- D. lifecycle state
- E. functionality profiles

Answer: B,C

Explanation:

Asset type default: This configuration ensures that a default asset type is associated with a functional location. When a functional location is created, the system uses the default asset type to create assets automatically.

Functional location type: Functional location types define the structure and behavior of functional locations, including how assets are created and managed for those locations. Setting up a functional location type is necessary to enable the automatic creation of assets for a functional location.

A company plans to use Dynamics 365 for Finance and Operations to automatically calculate and process royalties. You need to configure the system.

Which actions should you perform? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.
