

# Valid AAISM Test Sims | AAISM Reliable Exam Guide

You will receive an email attached with AAISM exam study guide within 5-10 min after you pay. It means that you do not need to wait too long to get the dumps you want. Besides, you will have free access to the updated ISACA AAISM study material for one year. If there is any update, our system will send the update AAISM Test Torrent to your payment email automatically. Please pay attention to your payment email for the latest ISACA AAISM exam dumps. If there is no any email about the update, please check your spam.

Our AAISM test training will provide you with a well-rounded service so that you will not lag behind and finish your daily task step by step. At the same time, our AAISM study torrent will also save your time and energy in well-targeted learning as we are going to make everything done in order that you can stay focused in learning our AAISM Study Materials without worries behind. We are so honored and pleased to be able to read our detailed introduction and we will try our best to enable you a better understanding of our AAISM test training better.

## Don't Miss Up to 365 Days of Free Updates - Buy AAISM Questions Now

Our AAISM exam dumps strive for providing you a comfortable study platform and continuously explore more functions to meet every customer's requirements. We may foresee the prosperous talent market with more and more workers attempting to reach a high level through the ISACA certification. To deliver on the commitments of our AAISM Test Prep that we have made for the majority of candidates, we prioritize the research and development of our AAISM test braindumps, establishing action plans with clear goals of helping them get the ISACA certification. You can totally rely on our products for your future learning path.

## ISACA Advanced in AI Security Management (AAISM) Exam Sample Questions (Q104-Q109):

### NEW QUESTION # 104

Which of the following is the GREATEST concern when a vendor enables generative AI features for an organization's critical system?

- A. Access to the model
- B. Proposed regulatory enhancements

- C. Bias and ethical practices
- D. Security monitoring and alerting

**Answer: A**

Explanation:

When enabling genAI capabilities in a critical system, AAISM prioritizes controlling access to the model and its interfaces (prompt surfaces, context windows, tools/functions, and connected data) because exposure expands the attack surface for prompt injection, data exfiltration, jailbreaks, and misuse. Monitoring (C) is necessary but detective; ethics and bias (D) are vital but secondary to immediate safety and security of a mission-critical environment; proposed regulations (B) are not an immediate operational risk.

References: AAISM Body of Knowledge: GenAI Security-Access Governance, Interface Hardening, and Prompt Surface Controls; AAISM Study Guide: Critical System Safeguards-Least Privilege, Guardrails, and Abuse Prevention.

**NEW QUESTION # 105**

Which of the following AI system vulnerabilities is MOST easily exploited by adversaries?

- A. Inability to detect input modifications causing inappropriate AI outputs
- B. Inaccurate generalizations from new data by the AI model
- **C. Weak controls for access to the AI model**
- D. Lack of protection against denial of service (DoS) attacks

**Answer: C**

Explanation:

AAISM study materials stress that weak access controls are the most easily exploited vulnerability in AI systems. Without strong access restrictions, adversaries can directly query, extract, manipulate, or overload models, leading to data leakage or compromised outputs. While inaccurate generalizations, DoS vulnerabilities, or susceptibility to input manipulation are serious, they typically require more effort or specific conditions. Weak access control provides the most direct and immediate entry point for attackers. As such, it is identified as the most easily exploited vulnerability.

**NEW QUESTION # 106**

The PRIMARY ethical concern of generative AI is that it may:

- A. Produce unexpected data that could lead to bias
- B. Breach the confidentiality of information
- C. Cause information to become unavailable
- **D. Cause information integrity issues**

**Answer: D**

Explanation:

AAISM materials emphasize that the primary ethical concern with generative AI is the risk to information integrity. Generative models can create content that appears authentic but is fabricated, misleading, or manipulated. This undermines trust in information ecosystems and can have wide-reaching social, legal, and organizational impacts. While confidentiality breaches and bias are concerns, they are not the central ethical issue inherent to generative models. Availability is less relevant in this context. The most pressing concern is that generative AI may compromise the integrity of information.

**NEW QUESTION # 107**

A school district contracts a third-party provider for AI-based curriculum recommendations. Which of the following is the BEST way to ensure the vendor uses AI responsibly?

- **A. Requiring the vendor to provide the model card**

- B. Verifying the vendor has updated terms of service
- C. Ensuring the vendor offers 24/7 technical support
- D. Confirming the AI solution supports single sign-on (SSO)

**Answer: A**

Explanation:

AAISM emphasizes transparency artifacts from vendors to enable due diligence and assurance. A model card documents intended use, data sources, limitations, performance across subgroups, known risks, and evaluation procedures-information necessary to assess safety, fairness, and compliance for sensitive contexts like education. SSO and support are useful operational features; generic ToS updates are insufficient without model-specific disclosures.

**NEW QUESTION # 108**

Which of the following BEST addresses risk associated with hallucinations in AI systems?

- A. Automated output validation
- **B. Human oversight**
- C. Content enrichment
- D. Recursive chunking

**Answer: B**

Explanation:

AAISM prescribes human-in-the-loop (HITL) controls as the primary safeguard for high-impact generative AI use cases to mitigate hallucination risk. Human oversight ensures critical outputs are reviewed, corrected, and approved before use, with accountability, escalation, and documented decision trails. Automated validators and enrichment help reduce errors but are secondary; recursive chunking is a prompting tactic, not a governance control.

**NEW QUESTION # 109**

.....

People who get AAISM certification show dedication and willingness to work hard, also can get more opportunities in job hunting. It seems that AAISM certification becomes one important certification for many IT candidates. While a good study material will do great help in AAISM Exam Preparation. Prep4pass AAISM will solve your problem and bring light for you. AAISM exam questions and answers are the best valid with high hit rate, which is the best learning guide for your ISACA AAISM preparation.
