Our company is trying to satisfy every customer's demand. Of course, we also attach great importance on the quality of our UiPath-TAEPv1 real exam. Every product will undergo a strict inspection process. In addition, there will have random check among different kinds of UiPath-TAEPv1 Study Materials. The quality of our UiPath-TAEPv1 practice dumps deserves your trust.our products have built good reputation in the market. We sincerely hope that you can try our UiPath-TAEPv1 preparation guide.

UiPath UiPath-TAEPv1 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">UiPath Studio - Data-driven Testing: This section of the exam measures the skills of RPA Developers and centers around managing test data variations using data-driven testing approaches. It explains how to add test data through queues, activities, or data sources, and how to create reusable test cases based on this data. The section also highlights connecting UiPath Studio projects to Test Manager to enhance traceability and visibility of test progress.
Topic 2	<ul style="list-style-type: none">UiPath Test Manager: This section of the exam measures the skills of Test Automation Engineers and focuses on using UiPath Test Manager for managing test lifecycles. It includes actions like defining custom fields, managing access, importingexporting projects, and documenting manual steps using UiPath Task Capture. It also explains how to analyze test results, handle execution re-runs, manage KPIs, and create defects for failed test cases, along with troubleshooting common errors.:

Topic 3	<ul style="list-style-type: none"> • UiPath Test Suite – Orchestrator: This section of the exam measures the skills of Test Automation Engineers and covers how to manage test sets in UiPath Orchestrator. It includes creating, executing, scheduling, and deleting test sets, using test data queues, and analyzing results from the Test Execution page. It also discusses re-executing tests and linking test sets for better orchestration of test activities.
Topic 4	<ul style="list-style-type: none"> • CI • CD Implementation: This section of the exam measures the skills of RPA Developers and introduces the concepts of Continuous Integration and Continuous Delivery (CI • CD). It covers how to implement pipelines and perform tasks using the UiPath Command Line Interface (CLI) for streamlined and automated deployments of test workflows and processes.
Topic 5	<ul style="list-style-type: none"> • UiPath Studio - Test Activities and Workflow Best Practices: This section of the exam measures the skills of Test Automation Engineers and evaluates knowledge of using verification activities and test-specific functions within UiPath Studio. It involves working with test data generation, document attachments in test cases, and applying workflow analyzer rules for stable collaboration. It also includes mock testing to isolate test case components and ensure focused validations.
Topic 6	<ul style="list-style-type: none"> • UiPath Test Suite Architecture and API Integrations: This section of the exam measures the skills of Test Automation Engineers and covers the fundamental capabilities of UiPath Test Suite in automating different types of testing such as UI, API, and data-driven testing. It includes an overview of Test Suite tools and how they integrate with each other, as well as with third-party application lifecycle management (ALM) tools through APIs. Candidates are expected to understand API testing concepts and how external tools can be connected for requirement synchronization, defect management, and test case tracking.
Topic 7	<ul style="list-style-type: none"> • UiPath Robot: This section of the exam measures the skills of RPA Developers and explains the role of testing robots and their connectivity with UiPath Orchestrator. It discusses the execution of test cases using both on-premises and cloud-based robots and highlights how different robot types support automation testing in a scalable environment.
Topic 8	<ul style="list-style-type: none"> • Testing Process: This section of the exam measures the skills of Test Automation Engineers and focuses on applying best practices in test case design and execution. It outlines the importance of structured application testing in UiPath and emphasizes quality assurance through automation.
Topic 9	<ul style="list-style-type: none"> • UiPath Studio - Testing Panels and Templates: This section of the exam measures the skills of RPA Developers and focuses on how to work with testing panels in UiPath Studio. It includes how to create, import, and manage test cases, along with the use of Test Explorer for analyzing test outcomes. It also covers Descriptor and Activity Coverage panels used for examining object recognition and checking redundancy in test cases. The section further explains testing project templates, the Test Automation Framework, and how to customize execution and test case templates.

UiPath UiPath-TAEPv1 Questions - For Best Result [2026]

Are you still worried about the exam? Don't worry! Our UiPath-TAEPv1 exam torrent can help you overcome this stumbling block during your working or learning process. Under the instruction of our UiPath-TAEPv1 test prep, you are able to finish your task in a very short time and pass the exam without mistakes to obtain the UiPath-TAEPv1 certificate. We will tailor services to different individuals and help them take part in their aimed exams after only 20-30 hours practice and training. Moreover, we have experts to update UiPath-TAEPv1 quiz torrent in terms of theories and contents on a daily basis.

UiPath Test Automation Engineer Professional v1.0 Sample Questions (Q69-Q74):

NEW QUESTION # 69

In software testing what does the term "test case" refer to?

- A. It's the maximum load that the system can tolerate without crashing.
- B. It's a written document outlining the detailed process of software development.
- C. It's the process of executing the system to reveal bugs.
- D. It's a set of conditions under which a tester determines if a system under test satisfies requirements and functions correctly.

Answer: D

Explanation:

A test case is a set of conditions, inputs, and expected results used to determine whether a system under test behaves correctly and meets its specified requirements. It helps validate functionality and detect defects.

NEW QUESTION # 70

Which are the types of coded automations in UiPath?

- A. Coded workflows, Coded test cases, Code source files.
- B. Coded workflows, Coded databases, Code source files.
- C. Coded workflows, Coded test cases, Coded functions.
- D. Workflows, Test cases, Source files.

Answer: C

Explanation:

The types of coded automations in UiPath include Coded Workflows, Coded Test Cases, and Coded Functions. These enable developers to write automation logic using code (e.g., C#) within a UiPath project, enhancing flexibility and control beyond drag-and-drop activities.

NEW QUESTION # 71

How does the licensing model work for Testing runtimes in UiPath?

- A. It counts the maximum number of Testing robots that are able to execute tests simultaneously, given by the total number of runtimes allocated to all the online machines.
- B. It counts the individual testing robots on a machine and assigns each of them an equal number of licenses.
- C. It counts the total number of licenses available and divides them amongst the Testing robots.
- D. It works by allocating a fixed number of licenses per testing robot, regardless of the maximum number that can execute tests simultaneously.

Answer: A

Explanation:

The licensing model for Testing runtimes in UiPath is based on the maximum number of Testing robots that can execute tests simultaneously, which is determined by the total number of runtimes allocated to all online machines. This ensures efficient utilization of available resources.

NEW QUESTION # 72

There is a test case that performs multiple verifications.

How can the test case be configured so that the execution stops when a verification fails?

- A. Set the property ContinueOnFailure of the first Verify activity to False.
- B. Set the property ContinueOnFailure of the Verify activities to False.
- C. Use a Terminate Workflow activity after each verification.
- D. Use a Stop Job activity after each verification.

Answer: B

Explanation:

To ensure that the test case stops execution when a verification fails, you should set the ContinueOnFailure property of the Verify activities to False. This way, any failed verification will halt the test case immediately.

NEW QUESTION # 73

How can manual steps be marked in a Test Case as passed or failed in the Manual Execution Assistant?

- A. Only automated steps can be marked; manual steps are automatically passed.
- B. Click "Set Failed" or "Set Passed" at the end of the test.
- C. Use the "Execute Manually" button.
- D. Click "Set Failed" or "Set Passed" for each step.

Answer: B

Explanation:

In the Manual Execution Assistant of UiPath Test Manager, manual steps can be marked as passed or failed by clicking "Set Failed" or "Set Passed" at the end of the test. This allows the tester to indicate the outcome of the manual step after execution.

NEW QUESTION # 74

• • • • •

UiPath-TAEPv1 study material is suitable for all people. Whether you are a student or an office worker, whether you are a veteran or a rookie who has just entered the industry, UiPath-TAEPv1 test answers will be your best choice. For office workers, UiPath-TAEPv1 test dumps provide you with more flexible study time. You can download learning materials to your mobile phone and study at anytime, anywhere. And as an industry rookie, those unreadable words and expressions in professional books often make you feel mad, but UiPath-TAEPv1 Study Materials will help you to solve this problem perfectly.
