Salesforce Plat-Admn-202 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> • Salesforce Fundamentals: This section of the exam measures the skills of Salesforce Administrators and Junior Salesforce Consultants and covers the essential concepts needed to understand how Salesforce works at a foundational level. It focuses on recognizing when to use declarative tools versus programmatic customization, determining when AppExchange apps extend org capabilities, and understanding key methods for managing object, record, and field access. It also evaluates your ability to choose the right sharing model based on business needs and to apply reporting tools effectively, including report types and dashboards. Additionally, the domain reviews how to optimize the mobile experience through actions and layouts, and how Chatter can be used to support collaboration.
Topic 2	<ul style="list-style-type: none"> • Business Logic and Process Automation: This section of the exam measures the skills of Process Automation Specialists and Salesforce Administrators and covers the key tools Salesforce provides to automate and enforce business logic. It focuses on using formula fields, roll-up summary fields, and validation rules to meet defined requirements. Candidates must also understand approval processes and know how to select the right automation tool to prevent conflicts or errors. The domain emphasizes evaluating business requirements and recommending automation solutions that maintain system stability and accuracy.
Topic 3	<ul style="list-style-type: none"> • App Deployment: This section of the exam measures the skills of Release Managers and Salesforce Administrators and covers the application lifecycle from planning through deployment. It requires determining the appropriate strategy when working with different sandboxes and managing milestones during development. Candidates must know when to use change sets and how to troubleshoot deployment issues. The section also includes understanding the implications of using unmanaged versus managed packages and selecting the correct deployment plan for various business scenarios.
Topic 4	<ul style="list-style-type: none"> • User Interface: This section of the exam measures the skills of Salesforce UI Designers and Lightning App Builders and covers the ways in which Salesforce interfaces can be customized to improve usability. It includes understanding available options for UI customization and demonstrating when to apply custom buttons, links, and actions. The domain also distinguishes between declarative and programmatic methods for incorporating Lightning components in applications, ensuring that the right approach is selected for different user interface needs.
Topic 5	<ul style="list-style-type: none"> • Data Modeling and Management: This section of the exam measures the skills of Data Analysts and Salesforce Administrators and covers the core principles of designing and maintaining Salesforce data structures. It requires selecting the correct data model in various scenarios and understanding relationship types and how they influence reporting, record access, and the user interface. It also tests knowledge of field data types and the operational impact of changing them. The section includes evaluating the use of Schema Builder and understanding the considerations involved in importing and exporting data across internal and external sources.

Quiz 2026 Professional Plat-Admn-202: Salesforce Certified Platform App Builder Latest Dumps Questions

Therefore, you have the option to use Salesforce Plat-Admn-202 PDF questions anywhere and anytime. TroytecDumps Salesforce Certified Platform App Builder (Plat-Admn-202) dumps are designed according to the Salesforce Plat-Admn-202 certification exam standard and have hundreds of questions similar to the actual Salesforce Certified Platform App Builder (Plat-Admn-202) exam. Salesforce Certified Platform App Builder (Plat-Admn-202) web-based practice exam software also works without installation.

Salesforce Certified Platform App Builder Sample Questions (Q132-Q137):

NEW QUESTION # 132

Service agents at Ursa Major Solar want a more condensed case view. Service agents also want to be able to modify the associated contact and account records from the case page layout on the Lightning record page.

Which two components should an app builder use to meet these requirements?

Choose 2 answers

- A. Related record
- B. Tabs
- C. Path
- D. Rich text

Answer: A,B

Explanation:

Related record and Tabs. These are correct because the related record component allows service agents to view and edit fields from a related record on the same page, and the tabs component allows service agents to switch between different views of related lists or other components on the same page.

NEW QUESTION # 133

At Universal Containers, the Account object has a Master-Detail relationship with an Invoice custom object. The App Builder would like to change to a lookup field, but is not able to do so. What could be causing this?

- A. The invoice must have at least one Master-Detail field for reporting.
- B. The Account is included in the workflow on the Invoice object.
- C. The Account record includes Invoice roll-up summary fields.
- D. The Invoice records have existing values in the Account.

Answer: C

Explanation:

The Account record includes Invoice roll-up summary fields. This is correct because roll-up summary fields are only available on the master object in a master-detail relationship, and changing the field type to lookup would delete the roll-up summary fields

NEW QUESTION # 134

Which two features can be used to allow users to access Flows?

Choose 2 answers

- A. Apex
- B. Approval Process
- C. Quick Action
- D. Flow Launcher

Answer: C,D

Explanation:

To allow users access to Flows, Salesforce offers multiple integration points:

A . Quick Action: Flows can be initiated from record pages, the app utility bar, or global actions using Quick Actions. This allows users to execute flows relevant to specific records or global processes.

C . Flow Launcher: A component available in Lightning App Builder that enables users to start flows directly from a Lightning page.

Steps to set up these features:

For Quick Actions, navigate to Setup → Object Manager → select object → Buttons, Links, and Actions → New Action → Action Type (Flow).

For Flow Launcher, navigate to Lightning App Builder → select the page → drag the Flow component to the desired section of the page → configure it to launch the specific flow.

For more information on integrating Flows, check the Salesforce documentation on Flow Distribution.

NEW QUESTION # 135

Universal Containers would like to embed a chart of all related Opportunities, by stage, on the Account detail page. Which type of report should the App Builder create to add to the Account page layout?

- A. A tabular report on the Account object.
- B. A tabular report on the Opportunity object.

- C. A summary report on the Account object.
- D. A summary report on the Opportunity object.

Answer: D

Explanation:

A summary report on the opportunity object should be created to add to the account page layout. A summary report groups rows of data by common values and allows users to create charts based on aggregate values. A summary report on the opportunity object can group opportunities by stage and display a chart of all related opportunities on the account detail page.

NEW QUESTION # 136

Cloud Kicks has five years of sales data and would like to track when customers made their first purchase. How should an app builder use a roll-up summary to meet the requirements?

- A. Create a new roll-up summary field called First Order Date, using Type MIN on the Opportunity Close Date with a filter where IsWon = TRUE.
- B. Create a new date field called First Order Date, then create a roll-up summary to update the field using Type MIN.
- C. Create a new date field called First Order Date, create a new Workflow to set the date, and roll up the value with a filter where IsWon = TRUE.
- D. Create a new roll-up summary field called First Order Date, using Type SUM on Opportunity Close Date.

Answer: A

Explanation:

The app builder should create a new roll-up summary field called First Order Date, using Type MIN on the Opportunity Close Date with a filter where IsWon = TRUE. A roll-up summary field is a type of field that calculates values from related records and displays them on the parent record. In this case, the app builder can create a roll-up summary field on the Account object that calculates the minimum (earliest) value of the Opportunity Close Date field from the related opportunities where IsWon = TRUE. This will show when customers made their first purchase. Option B, C, and D are not correct ways to use a roll-up summary field to meet the requirement.

NEW QUESTION # 137

.....

Generally speaking, a satisfactory practice material should include the following traits. High quality and accuracy rate with reliable services from beginning to end. As the most professional group to compile the content according to the newest information, our Plat-Admn-202 practice materials contain them all, and in order to generate a concrete transaction between us we take pleasure in making you a detailed introduction of our Plat-Admn-202 practice materials. We would like to take this opportunity and offer you a best Plat-Admn-202 practice material as our strongest items as follows. Here are detailed specifications of our product.
