

Salesforce Plat-Admn-202 Valid Exam Braindumps, New Plat-Admn-202 Test Dumps

Our Plat-Admn-202 study materials can help you achieve your original goal and help your work career to be smoother and your family life quality to be better and better. There is no exaggeration to say that you will be confident to take part in you Plat-Admn-202 exam with only studying our Plat-Admn-202 practice torrent for 20 to 30 hours. And we can ensure your success for we have been professional in this career for over 10 years. And thousands of candidates have achieved their dreams and ambitions with the help of our outstanding Plat-Admn-202 training materials.

Salesforce Plat-Admn-202 Exam Syllabus Topics:

Topic	Details
Topic 1	• App Deployment: This section of the exam measures the skills of Release Managers and Salesforce Administrators and covers the application lifecycle from planning through deployment. It requires determining the appropriate strategy when working with different sandboxes and managing milestones during development. Candidates must know when to use change sets and how to troubleshoot deployment issues. The section also includes understanding the implications of using unmanaged versus managed packages and selecting the correct deployment plan for various business scenarios.
Topic 2	• User Interface: This section of the exam measures the skills of Salesforce UI Designers and Lightning App Builders and covers the ways in which Salesforce interfaces can be customized to improve usability. It includes understanding available options for UI customization and demonstrating when to apply custom buttons, links, and actions. The domain also distinguishes between declarative and programmatic methods for incorporating Lightning components in applications, ensuring that the right approach is selected for different user interface needs.

Topic 3	• Data Modeling and Management: This section of the exam measures the skills of Data Analysts and Salesforce Administrators and covers the core principles of designing and maintaining Salesforce data structures. It requires selecting the correct data model in various scenarios and understanding relationship types and how they influence reporting, record access, and the user interface. It also tests knowledge of field data types and the operational impact of changing them. The section includes evaluating the use of Schema Builder and understanding the considerations involved in importing and exporting data across internal and external sources.
Topic 4	• Business Logic and Process Automation: This section of the exam measures the skills of Process Automation Specialists and Salesforce Administrators and covers the key tools Salesforce provides to automate and enforce business logic. It focuses on using formula fields, roll-up summary fields, and validation rules to meet defined requirements. Candidates must also understand approval processes and know how to select the right automation tool to prevent conflicts or errors. The domain emphasizes evaluating business requirements and recommending automation solutions that maintain system stability and accuracy.
Topic 5	• Salesforce Fundamentals: This section of the exam measures the skills of Salesforce Administrators and Junior Salesforce Consultants and covers the essential concepts needed to understand how Salesforce works at a foundational level. It focuses on recognizing when to use declarative tools versus programmatic customization, determining when AppExchange apps extend org capabilities, and understanding key methods for managing object, record, and field access. It also evaluates your ability to choose the right sharing model based on business needs and to apply reporting tools effectively, including report types and dashboards. Additionally, the domain reviews how to optimize the mobile experience through actions and layouts, and how Chatter can be used to support collaboration.

This format has all the features of desktop practice exam software for Salesforce Plat-Admn-202 exam preparation.

Salesforce Certified Platform App Builder Sample Questions (Q127-Q132):

NEW QUESTION # 127

An app builder at Cloud Kicks has been working on changes to a custom Shoe Sales app in a sandbox and is ready to deploy their changes to production with a change set. Part of the work included updates to a permission set.

What should the app builder take into consideration when deploying the change set to production?

- A. The deployed permission set will only contain changes related to the change set.
- B. The deployed permission set will manage with the existing permission set.
- C. The existing permission set will be completely overwritten.
- D. Change to field-level security in the permission set will not be applied.

Answer: A

Explanation:

Reference:

Salesforce Help - Permission Sets

NEW QUESTION # 128

Nickname__c is a custom text field on a contact record that is utilized to override the contact's name appearing on an email template. This field is not required and is not always filled in.

Which formula should an app builder use to select the contact's preferred name for email communications?

- A. IF(NOT(BLANKVALUE(Nickname__c)), Nickname__c, FirstName)
- B. IF(NOT(ISBLANK(Nickname__c)), Nickname__c, FirstName)
- C. IF (ISNULL(Nickname__c), Nickname__c, FirstName)
- D. IF(TEXT(Nickname__c), Nickname__c, FirstName)

Answer: A

Explanation:

The formula that should be used to select the contact's preferred name for email communications is

IF(NOT(BLANKVALUE(Nickname__c)), Nickname__c, FirstName). This formula checks if the Nickname__c field is blank or null, and if not, it returns the value of the Nickname__c field. Otherwise, it returns the value of the FirstName field.

NEW QUESTION # 129

The app builder at Northern Trail Outfitters created a report type for opportunities with or without shipments. The operations team wants to see the account rating information on the report.

What should the app builder do to fulfill this request?

- A. Change the primary object of the custom type to the Account object.
- B. Change the account/opportunity relationship to a master/detail relationship.
- C. Use add fields related via lookup with the view set to opportunities.
- D. Add the Account Rating field to the opportunity record page.

Answer: C

Explanation:

Reference:

Salesforce Help - Custom Report Types

NEW QUESTION # 130

A production org includes custom objects containing confidential information. A sandbox is needed that includes data records, excludes all of the confidential objects, and can be refreshed weekly the confidential objects, and can be refreshed weekly.

What steps should an App Builder take to meet these requirements?

- A. Create a Partial Copy Sandbox and use a sandbox template.
- B. Create a Full Sandbox and use a sandbox template
- C. Create a Developer Pro Sandbox and schedule Data loader to download selected object data weekly.
- D. Create a Developer Sandbox and schedule Data loader to download selected object data weekly.

Answer: A

Explanation:

The steps that the app builder should take to meet these requirements are creating a Partial Copy Sandbox and using a sandbox template. A Partial Copy Sandbox can include data records, exclude confidential objects, and be refreshed weekly. A sandbox template can specify which objects and data are copied from the production org to the sandbox org. Option A is incorrect because creating a Full Sandbox and using a sandbox template is not necessary for this requirement, as Full Sandboxes copy all data and metadata from the production org and can only be refreshed every 29 days. Option B is incorrect because creating a Developer Pro Sandbox and scheduling Data Loader to download selected object data weekly is not feasible for this requirement, as Developer Pro Sandboxes do not include data records by default and Data Loader cannot be scheduled to run weekly. Option D is incorrect because creating a Developer Sandbox and scheduling Data Loader to download selected object data weekly is not feasible for this requirement, as Developer Sandboxes do not include data records by default and Data Loader cannot be scheduled to run weekly.

NEW QUESTION # 131

Universal Containers (UC) requires that all users specify a contract is sent on each Opportunity prior to marking it as "Closed Won". UC wants to be able to report on how many Opportunities have sent Contracts compared to how many have a missing contract when the Opportunities closed.

Which field type should an app builder configure to fulfill this requirement?

- A. Picklist

- B. Text Area
- C. Checkbox. This field type allows users to clearly indicate (Yes/No) whether a contract has been sent. This binary nature of checkboxes makes it simple to filter and report on Opportunities based on whether a contract was sent.
- D. Text

Answer: C

Explanation:

Steps to configure this field:

Navigate to Setup → Object Manager → Opportunity.

Click Fields & Relationships → New → Checkbox.

Define the field with a label (e.g., Contract Sent).

Set the default value to false (unchecked).

Add the field to the relevant page layouts.

This setup facilitates accurate reporting and ensures that opportunities cannot be marked as "Closed Won" without indicating whether a contract was sent.

For guidance on creating fields, see Salesforce's documentation on Custom Field Creation.

Explanation:

For tracking whether contracts have been sent for Opportunities:

NEW QUESTION # 132
