Prep4sureExam also offers up to 1 year of free updates. It means if you download our actual CSPAI exam questions today, you can get instant and free updates of these CSPAI questions. With this amazing offer, you don't have to worry about updates in the Certified Security Professional in Artificial Intelligence (CSPAI) examination content for up to 1 year. In case of any update within three months, you can get free CSPAI exam questions updates from Prep4sureExam.

SISA Certified Security Professional in Artificial Intelligence Sample Questions (Q40-Q45):

NEW QUESTION # 40

A company's chatbot, Tay, was poisoned by malicious interactions. What is the primary lesson learned from this case study?

- A. Open interaction with users without safeguards can lead to model poisoning and generation of inappropriate content.
- B. Continuous live training is essential for enhancing chatbot performance.
- C. Chatbots should have limited conversational abilities to prevent poisoning.
- D. Encrypting user data can prevent such attacks

Answer: A

Explanation:
The Tay incident, where Microsoft's chatbot was manipulated via toxic inputs to produce offensive content, underscores the dangers of unfiltered live learning, leading to rapid poisoning. Key lesson: Implement safeguards like content filters, rate limits, and moderated feedback loops to prevent adversarial exploitation.
This informs AI security by emphasizing input validation and ethical alignment in interactive systems. Exact extract: "Open interactions without safeguards can lead to model poisoning and inappropriate content, as seen in the Tay case." (Reference: Cyber Security for AI by SISA Study Guide, Section on Case Studies in AI Poisoning, Page 160-163).

NEW QUESTION # 41

How does ISO 27563 support privacy in AI systems?

- A. By providing guidelines for privacy-enhancing technologies in AI.
- B. By focusing on performance metrics over privacy.
- C. By mandating the use of specific encryption algorithms.
- D. By limiting AI to non-personal data only.

Answer: A

Explanation:
ISO 27563 offers practical guidance on implementing privacy-enhancing technologies (PETs) in AI, such as differential privacy or federated learning, to protect data while maintaining utility. It addresses risks like inference attacks, ensuring compliance with privacy regulations. Exact extract: "ISO 27563 supports privacy in AI by providing guidelines for privacy-enhancing technologies." (Reference: Cyber Security for AI by SISA Study Guide, Section on ISO 27563 for Privacy, Page 265-268).

NEW QUESTION # 42

What aspect of privacy does ISO 27563 emphasize in AI data processing?

- A. Consent management and data minimization principles.
- B. Storing all data indefinitely for auditing.
- C. Maximizing data collection for better AI performance.
- D. Sharing data freely among AI systems.

Answer: A

Explanation:
ISO 27563 stresses consent management, ensuring informed user agreement, and data minimization, collecting only necessary data to reduce privacy risks in AI processing. These principles prevent overreach and support ethical data handling. Exact extract: "ISO 27563 emphasizes consent management and data minimization in AI data processing for privacy." (Reference: Cyber Security for AI by SISA Study Guide, Section on Privacy Principles in ISO 27563, Page 275-278).

NEW QUESTION # 43

Which of the following is a characteristic of domain-specific Generative AI models?

- A. They are designed to run exclusively on quantum computers

- B. They are tailored and fine-tuned for specific fields or industries
- C. They are trained on broad datasets covering multiple domains
- D. They are only used for computer vision tasks

Answer: B

Explanation:
Domain-specific Generative AI models are refined versions of foundational models, adapted through fine- tuning on specialized datasets to excel in niche areas like healthcare, finance, or legal applications. This tailoring enhances precision, relevance, and efficiency by incorporating industry-specific jargon, patterns, and constraints, unlike general models that handle broad tasks but may lack depth. For example, a medical GenAI model might generate accurate diagnostic reports by focusing on clinical data, reducing errors in specialized contexts. This approach balances computational resources and performance, making them ideal for targeted deployments while maintaining the generative capabilities of larger models. Security implications include better control over sensitive domain data. Exact extract: "Domain-specific GenAI models are characterized by being tailored and fine-tuned for particular fields or industries, leveraging specialized data to achieve higher accuracy and relevance in those domains." (Reference: Cyber Security for AI by SISA Study Guide, Section on GenAI Model Types, Page 65-67).

NEW QUESTION # 44
How does AI enhance customer experience in retail environments?

- A. By automating repetitive tasks and providing consistent data driven insights to improve customer service.
- B. By optimizing customer service through automated systems and tailored recommendations.
- C. By ensuring every customer receives the same generic response from automated systems.
- D. By integrating personalized interactions with AI-driven analytics for a more customized shopping experience.

Answer: D

Explanation:
AI enhances retail CX through personalization, using analytics to recommend products based on behavior, preferences, and history, creating tailored experiences that boost satisfaction and loyalty. Tools like chatbots and predictive models enable real-time interactions, while security posture improves via fraud detection integrated into these systems. This data-driven approach ensures relevance, differentiating from generic methods. Automation supports but personalization drives engagement. Exact extract: "AI integrates personalized interactions with driven analytics to customize shopping experiences, thereby enhancing customer satisfaction in retail." (Reference: Cyber Security for AI by SISA Study Guide, Section on GenAI in Security and Customer Enhancement, Page 70-73).

NEW QUESTION # 45
