

100% Pass Scrum - Reliable Actual PSM-I Test

SCRUM PSM I Assessment

Which two statements best describe the Product Backlog?

- a. It changes as we learn more about the project.
- b. Contains all tasks identified by the developers.
- c. It's used to create the project plan.
- d. It is never baselined. - A,

Who has the final say on the order of the Product Backlog?

- A) The Stakeholders
- B) The Development Team
- C) The Scrum Master
- D) The Product Owner
- E) The CEO - D

The Product Owner is the sole person responsible for managing the Product Backlog.

Development Team membership should change:

- A) Every Sprint to promote shared learning.
 - B) Never, because it reduces productivity.
 - C) As needed, while taking into account a short-term reduction in productivity.
 - D) As needed, with no special allowance for changes in productivity. - C
- Teams typically go through some steps before achieving a state of increased performance. Changing membership typically reduces cohesion, affecting performance and productivity in the short term.

When does the next Sprint begin?

- A) Next Monday.
 - B) Immediately following the next Sprint Planning.
 - C) When the Product Owner is ready.
 - D) Immediately after the conclusion of the previous Sprint. - D
- A new Sprint starts immediately after the conclusion of the previous Sprint.

The three pillars of empirical process control are:

- A) Respect For People, Kaizen, Eliminating Waste
- B) Planning, Demonstration, Retrospective
- C) Inspection, Transparency, Adaptation
- D) Planning, Inspection, Adaptation
- E) Transparency, Eliminating Waste, Kaizen - C

Scrum is founded on empirical process control theory, or empiricism. Empiricism asserts that knowledge comes from experience and making decisions based on what is known. Three pillars uphold every implementation of empirical process control: transparency, inspection, and adaptation.

Which two things does the Development Team do during the first Sprint?

PSM-I Detail Explanation | PSM-I Valid Torrent

If you prefer to prepare your exam on paper, our PSM-I training materials will be your best choice. PSM-I PDF version is printable, and you can print it into hard one, and you can take them with you, and can study them anytime. In addition, PSM-I exam dumps offer you free demo to try, so that you can know the mode of the complete version. If you buy PSM-I Exam Dumps from us, you can get the download link and password within ten minutes. We provide you with free update for one year if you buy PSM-I exam dumps.

Scrum Professional Scrum Master I Sample Questions (Q291-Q296):

NEW QUESTION # 291

In the Sprint Planning meeting, the Product Owner and the Development Team were unable to reach a clear understanding about the highest order Product Backlog items. Because of this, the Development Team couldn't figure out how many Product Backlog items it could forecast for the upcoming Sprint. They were able to agree on a Sprint Goal, however.

Which of the following two actions should the Scrum Master support? (Choose two.)

- A. Ask everyone to take as much time as needed to analyze the Product Backlog first, and then reconvene another Sprint Planning meeting.
- B. Discuss in the upcoming Sprint Retrospective why this happened and what changes will make it less likely to recur.
- C. Cancel the Sprint. Send the entire team to an advanced Scrum training and then start a new Sprint.
- D. Forecast the most likely Product Backlog items to meet the goal and create a Sprint Backlog based on a likely initial design and plan. Once the time-box for the Sprint Planning meeting is over, start the Sprint and continue to analyze, decompose, and create additional functionality during the Sprint.
- E. Continue the Sprint Planning meeting past its time-box until an adequate number of Product Backlog items are well enough understood for the Development Team to make a complete forecast. Then start the Sprint.

Answer: B,D

NEW QUESTION # 292

If burndown charts are used to visualize progress, what does a trend line through a release burndown chart indicate?

- A. When the work remaining will likely be completed if nothing changes on the Product Backlog or the Development Team.
- B. The evolution of the cost spent on the project.
- C. When the project will be over if the Product Owner removes work that is equal in effort to any new work that is added.
- D. When all work will be completed to the Scrum Team can be released for other work.

Answer: A

Explanation:

A burndown chart is a graphical representation of work left to do versus time. It is very useful for predicting when all of the work will be completed. It is often used in agile software development methodologies such as Scrum. However, burndown charts can be applied to any project containing measurable progress over time. A release burndown chart tracks progress across multiple Sprints towards a product release. It shows how much work remains in the Product Backlog at any given time during the release cycle. A trend line through a release burndown chart indicates when the work remaining will likely be completed if nothing changes on the Product Backlog or the Development Team.

Q138

NEW QUESTION # 293

One of the Scrum events is the Daily Scrum. What are two intended outcomes of the Daily Scrum? (choose the best two answers)

- A. An updated Scrum board to make Sprint progress transparent for the

stakeholders

- B. A shared understanding of the most important work to be undertaken next to achieve the best possible progress toward the Sprint goal.
- C. A status report for the upper management indicating what each individual has done, will be doing, and what is impeding him/her.
- D. An update of completed tasks and of the remaining work so the Scrum Master can plan the next day.
- E. Identification of impediments that may prevent the Developers from achieving the Sprint Goal.

Answer: B,E

Explanation:

According to the Scrum Guide, two intended outcomes of the Daily Scrum are identification of impediments that may prevent the Developers from achieving the Sprint Goal and a shared understanding of the most important work to be undertaken next to achieve the best possible progress toward the Sprint Goal. These outcomes help the Developers to inspect their progress, plan their work, and collaborate effectively. The other options are not intended outcomes of the Daily Scrum, as they are either irrelevant (such as updating a Scrum board) or inappropriate (such as providing a status report or an update of completed tasks).

NEW QUESTION # 294

What is the typical size for a Scrum Team? (Choose the best answer)

- A. 10 or fewer.
- B. At least 7.
- C. 7 plus or minus 3.
- D. 0

Answer: A

Explanation:

The correct answer is D. 10 or fewer. According to the Scrum Guide 20201, "The Scrum Team is small enough to remain nimble and large enough to complete significant work within a Sprint, typically 10 or fewer people." The other options are outdated or incorrect. Option A was based on the previous version of the Scrum Guide, which suggested a range of 3 to 9 developers. Option B is too vague and does not account for the upper limit of team size. Option C is too specific and does not allow for flexibility.

NEW QUESTION # 295

Which three of the following are true about Scrum? (Choose the best three answers.)

- A. Scrum is based on empiricism and lean thinking.
- B. Scrum is a methodology where you can pick and choose which parts of Scrum you think will work for your environment.
- C. Each component of Scrum serves a specific purpose and is essential to Scrum's success and your usage of Scrum to develop complex products.
- D. Scrum implements self-management by replacing Project Managers with Scrum Masters.
- E. Scrum is a framework for developing and sustaining complex products.

Answer: A,C,E

Explanation:

Three statements that are true about Scrum are:

Each component of Scrum serves a specific purpose and is essential to Scrum's success and your usage of Scrum to develop complex products.

Scrum is a framework for developing and sustaining complex products.

Scrum is based on empiricism and lean thinking.

These statements are supported by: "Scrum is not a process, technique, or definitive method.

Rather, it is a framework within which you can employ various processes and techniques. ... Each component within the framework serves a specific purpose and is essential to Scrum's success and usage. ... The rules of Scrum bind together events, roles, artifacts, and rules governing their relationships. ... The three pillars uphold every implementation of empirical process control: transparency, inspection, and adaptation."

NEW QUESTION # 296

.....

First of all we have fast delivery after your payment in 5-10 minutes, and we will transfer PSM-I guide torrent to you online, which mean that you are able to study as soon as possible to avoid a waste of time. Besides if you have any trouble coping with some technical and operational problems while using our PSM-I exam torrent, please contact us immediately and our 24 hours online services will spare no effort to help you solve the problem in no time. As a result what we can do is to create the most comfortable and reliable customer services of our PSM-I Guide Torrent to make sure you can be well-prepared for the coming exams.
