

300-615 Updated Testkings, 300-615 Reliable Test Experience

BONUS!!! Download part of TestValid 300-615 dumps for free: <https://drive.google.com/open?id=1WL4i88sdvCIZ7NSf1gM6HLB6K1UTSCbi>

Maybe you still strange to our 300-615 dumps pdf, you can download the free demo of the dump torrent before you buy. If you have any questions to our Cisco exam questions torrent, please feel free to contact us and we will give our support immediately. You will be allowed to updating 300-615 Learning Materials one-year once you bought pdf dumps from our website.

To pass the Cisco 300-615 Exam, candidates must demonstrate an understanding of troubleshooting methodologies, data center network architecture, storage network connectivity, and how to troubleshoot network automation and orchestration tools. 300-615 exam also tests the candidate's ability to identify and resolve issues related to data center routing and switching protocols, network virtualization technologies, and various storage protocols. Successful candidates will have a sound understanding of industry best practices, protocols, and tools used for troubleshooting data center issues.

[2026] Cisco 300-615 Questions: Fosters Your Exam Passing Skills

If you want to sail through the difficult Cisco 300-615 Exam, it would never do to give up using exam-related materials when you prepare for your exam. If you would like to find the best certification training dumps that suit you, TestValid is the best place to go. TestValid is a well known and has many excellent exam dumps that relate to IT certification test. Moreover all exam dumps give free demo download. If you want to know whether TestValid practice test dumps suit you, you can download free demo to experience it in advance.

Cisco Troubleshooting Cisco Data Center Infrastructure Sample Questions (Q173-Q178):

NEW QUESTION # 173

An engineer must upgrade all components in a Cisco UCS domain to the same package version, but the upgrade process fails to complete. Which set of Auto Install actions resolves the problem?

- A. Install infrastructure Firmware, then Install Hypervisor Firmware.
- **B. Install Infrastructure Firmware, then Install Server Firmware.**
- C. Install Hypervisor Firmware, then Install Infrastructure Firmware
- D. Install Server Firmware, then Install Infrastructure Firmware

Answer: B

Explanation:

Explanation

https://www.cisco.com/c/en/us/td/docs/unified_computing/ucs/sw/firmware-mgmt/gui/2-5/b_GUI_Firmware_Ma

Required Order of Steps for Auto Install

If you want to upgrade all components in a Cisco UCS domain to the same package version, you must run the stages of Auto Install in the following order:

- 1 Install Infrastructure Firmware
- 2 Install Server Firmware

This order enables you to schedule the server firmware upgrades during a different maintenance window than the infrastructure firmware upgrade.

NEW QUESTION # 174

Refer to the exhibit.

```

hostname N9K-1
ip access-list OSPF
 10 deny ip 10.10.1.0 0.0.0.3 any
 20 deny ip 224.0.0.5/32 any
 30 deny ip 224.0.0.6/32 any
interface Ethernet1/1
 no switchport
 ip address 10.10.1.1/30
 no shutdown
router ospf DC
 router-id 10.10.1.1
  
```

```

hostname N9K-2
ip access-list OSPF
 10 deny ip 10.10.1.0 0.0.0.3 any
 20 deny ip 224.0.0.5/32 any
 30 deny ip 224.0.0.6/32 any
interface Ethernet1/1
 no switchport
 ip access-group OSPF in
 ip address 10.10.1.2/30
 no shutdown
router ospf DC
 router-id 10.10.1.2
  
```

A client reports that the routing protocol neighborhood fails to start between two Cisco Nexus switches, N9K-1 and N9K-2. Which action resolves the issue?

- **A. Configure a unicast access list to allow the negotiation between N9K-1 and N9K-2**
- B. Add MTU configuration to interface e1/1 on both Cisco Nexus switches
- C. Add OSPF routing configuration to interface e1/1 on both Cisco Nexus switches
- D. Configure a multicast access list to allow the negotiation between N9K-1 and N9K-2

Answer: A

NEW QUESTION # 175

A network engineer notices a sudden interruption to the HSRP adjacency between the switches. The packet loss is reported on the servers for which the default gateway is set as the virtual IP of the HSRP. All servers on the VLAN can exchange ping messages. Which configuration set must be applied on the HSRP peers to resolve the adjacency issue?

- A. key 0 accept-lifetime 00:00:00 Oct 01 2018 23:59:59 Sep 01 2020
- B. key 0 send-lifetime 00:00:00 Oct 01 2018 23:59:59 Sep 01 2020
- C. key 1 send-lifetime 00:00:00 Jun 01 2018 23:59:59 Sep 01 2022
- D. key1 accept-lifetime 00:00:00 Jun 01 2018 23:59:59 Sep 01 2020

Answer: D

Explanation:

The correct remediation is key1 accept-lifetime 00:00:00 Jun 01 2018 23:59:59 Sep 01 2020. In Cisco data center troubleshooting the first priority is to isolate whether the failure is caused by the underlay, overlay control plane, first-hop gateway behavior, or a consistency parameter. This item is centered on HSRP, so the selected action targets the condition that prevents normal forwarding rather than masking the symptom. Cisco Nexus and ACI guidance treats vPC, VXLAN EVPN, OTV, OSPF, BGP, HSRP, and LACP issues as state- dependent technologies: a neighbor, peer, VLAN, VNI, multicast group, timer, MTU, or policy mismatch can leave the protocol partially operational while traffic is still dropped. The rejected alternatives either change unrelated attributes, introduce a new inconsistency, or affect only a secondary behavior. The operational check after applying the fix should be to confirm adjacency or peer state, validate the relevant route/MAC /endpoint table, and test traffic in the affected VLAN or VRF. This aligns with Cisco DCIT network troubleshooting methodology for isolating control-plane state before changing data-plane policy.

NEW QUESTION # 176

Refer to the exhibit. A network engineer is implementing an RBAC on the Cisco Nexus 9000 Series Switch. The role called Host A fails to clear LACP counters on the port channel 20.

Which configuration resolves the issue?

```
Switch# configure terminal
switch(config)# role name HostA
switch(config-role)# rule 3 deny command clear users
switch(config-role)# rule 2 permit clear lacp counters interface port-channel 20
switch(config-role)# rule permit read feature router-bgp
switch(config-role)# rule deny read-write L3
switch(config-role)# exit
```

- A. Delete rule 2 and create a new rule 4
- B. Delete rule 3 and create new rule 3 to allow the permit command.
- C. Change the sequence of rule 2 and rule 3.
- D. Permit rule number 3 and read-write L3 operation.

Answer: B

NEW QUESTION # 177

Refer to the exhibit. Interfaces Ethernet 7/1-8 are members of the CORE-SW1 VDC, and CORE-7700-1 is the admin VDC. Which cause of the error is likely?

```
CORE-7700-1(config-vdc)# vdc FC-CORE-SW1 type storage
CORE-7700-1(config-vdc)# allocate shared interface ethernet
7/1-8
Ports that share the port group of the interfaces you have
specified will be affected as well. Continue (y/n)? [yes]
yes
ERROR: Ports being shared must belong to a vdc that has been
configured for fcoe sharing
```

- A. The FCoE VLANs associated to Ethernet 7/1-8 must be assigned to the FC-CORE-SW1 VDC in the admin VDCs.
- B. The Fibre Channel VSANs associated to Ethernet 7/1-8 must be assigned to the FC- CORE-SW1 VDC in the admin VDCs.
- C. All the interfaces in the FC-CORE-SW1 VDC must be configured for FCoE sharing.
- D. Interfaces Ethernet 7/1-8 must be configured for FCoE sharing.

Answer: A

NEW QUESTION # 178

.....

If you are still hesitating whether to select TestValid, you can free download part of our exam practice questions and answers from TestValid website to determine our reliability. If you choose to download all of our providing exam practice questions and answers, TestValid dare 100% guarantee that you can pass Cisco Certification 300-615 Exam disposably with a high score.
