Salesforce Health Cloud Accredited Professional Sample Questions (Q10-Q15):

NEW QUESTION # 10

A provider wants its care coordinators to track a series of problems, goals, and interventions (PGIs) related to a patient's care in a repeatable, efficient way.

Which approach should a consultant recommend?

- A. Configure an action plan template with tasks for each PGI.
- B. Create care program templates and assign them to patients.
- C. Define a PGI Library and care plan templates using the library.
- D. Coach the care coordinators to quickly create tasks using a checklist.

Answer: A

NEW QUESTION # 11

A customer is looking to implement Discovery Framework to manage their intake and clinical assessments.

Which three capabilities should a consultant configure with Health Cloud out-of-the-box to enhance their assessment functionality?

Choose 3 answers

- A. SMS Assessment Completion
- B. Using Previously Submitted Responses
- C. FHIR Question Bank
- D. Adding a QR Code
- E. Digital Signature Capture

Answer: B,C,E

Explanation:

Step 1: Understanding the Discovery Framework in Health Cloud

The Discovery Framework in Salesforce Health Cloud is designed to streamline intake and clinical assessments by providing reusable, modular, and compliant tools for healthcare organizations. It enables organizations to collect, store, and reuse responses to assessment questions efficiently and securely.

Reference:

"Discovery Framework provides a way to design, distribute, and reuse forms and assessments for clinical and non-clinical scenarios. It leverages reusable question banks, digital data capture, and integration with Health Cloud objects." Administer Health Cloud - Assessments and Discovery Framework Step 2: FHIR Question Bank Capability: The use of a FHIR-based Question Bank allows healthcare organizations to standardize questions and reuse them across multiple assessments. This ensures consistency and regulatory compliance in data collection.

Extract:

"The Question Bank leverages the FHIR Questionnaire resource, making it easy to define, store, and reuse question sets for various clinical assessments." Administer Health Cloud - Discovery Framework: Question Bank Step 3: Digital Signature Capture Capability: Digital Signature Capture is supported natively in Health Cloud assessments, ensuring consent, authenticity, and regulatory compliance.

Extract:

"Out-of-the-box support for digital signature capture in assessment forms allows for secure, auditable consent capture, which is often required for clinical or legal compliance." Administer Health Cloud - Discovery Framework Features Step 4: Using Previously Submitted Responses Capability: The ability to use previously submitted responses enhances user experience and speeds up the intake process by pre-populating assessments with earlier responses where relevant.

Extract:

"You can configure assessments to pre-fill questions with responses from prior assessments, supporting both efficiency and patient engagement." Administer Health Cloud - Reuse of Data in Assessments Step 5: Options Not Natively Supported Out-of-the-Box A

. Adding a QR Code: Not natively supported in Health Cloud Discovery Framework out-of-the-box for assessments. This would require custom development or external integrations.

B . SMS Assessment Completion: Not supported out-of-the-box; may require integration with Marketing Cloud or external SMS services and customization.

Reference for non-supported features:

"Features such as QR code generation or SMS completion notifications are not available out of the box and would require customizations or integrations." Administer Health Cloud

NEW QUESTION # 12

While a consultant is implementing Integrated Care Management for a customer, the customer requests that a change is made to the Care Plan creation wizard.

Which underlying component should the consultant customize to achieve this?

- A. Field Sets
- B. FlexCard
- C. OmniScript
- **D. Flow**

Answer: D

NEW QUESTION # 13

While working with a received document using Intelligent Document Automation, which three capabilities should a consultant leverage with Health Cloud out-of-the-box?

Choose 3 answers

- **A. Automated Document Checklist Item Creation**
- B. Barcode Scanning
- **C. Record Type Association**
- **D. Document Rotation**
- E. eFax Connection

Answer: A,C,D

Explanation:

Step-by-Step Explanation:

Health Cloud Intelligent Document Automation (IDA) Capabilities:

IDA automates processing of incoming documents (like insurance cards or clinical records).

Out-of-the-box features allow:

Document Rotation: For correcting the orientation of scanned/received documents.

Record Type Association: For matching documents to appropriate Salesforce record types (such as associating a document with a Patient or Encounter).

Automated Document Checklist Item Creation: Automatically creating checklist items for actions (e.g., missing forms or needed verifications).

Supported and Unsupported Features:

Barcode Scanning: Not an out-of-the-box feature of Health Cloud IDA (may require third-party solutions).

eFax Connection: While Health Cloud supports document management, direct eFax integration is not out-of-the-box.

Official Document Extracts:

From Salesforce Help:

"You can rotate, associate, and automate checklist items for documents received in Health Cloud using Intelligent Document Automation."

- Administer Health Cloud - Document Automation

Reference:

Intelligent Document Automation Overview

NEW QUESTION # 14

Bloomington Caregivers has more than 1 million patients and each patient has an average of 10 claims a year, which are maintained in an external claims system. Management would like their agents to view all the claims of patients in Salesforce on demand when
