Microsoft Power Platform Solution Architect Sample Questions (Q104-Q109):

NEW QUESTION # 104
You are designing a solution to automate the following processes:
* Import data into Microsoft Dataverse from systems that have an API available.
* Import data into Microsoft Dataverse from systems that do not have an API available.
* Validate that contacts in a Microsoft Excel file Dataverse forms in a specified order.
You need to implement automation methods.
Which components should you use' To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point

Answer:

Explanation:

NEW QUESTION # 105
You are a Power Apps architect for a company. The IT administrator designs a Power Apps app that is ready to be tested. The company uses application lifecycle management (ALM).
Each version and solution component must be tracked as it is tested.
You need to recommend a strategy to deploy solutions for the user acceptance testing environment.
What should you recommend?

- A. Use Package Deployer and deploy an unmanaged solution.
- B. Use Solution Packager and deploy a managed solution.
- C. Use Solution Packager and deploy an unmanaged solution.
- D. Use Package Deployer and deploy a managed solution.

Answer: D

Explanation:
Solution Packager is a tool that can unpack a compressed solution file into multiple XML files and other files, so they can be easily managed by a source control system.
Unmanaged solution: An open solution with no restrictions on what can be added, removed, or modified. This is recommended during development of a solution.
C: Managed solution
A completed solution ready to be imported into an organization. Once imported, components can't be added or removed, although they can optionally allow further customization. This is recommended when development of the solution is complete.
Reference:
https://docs.microsoft.com/en-us/power-platform/alm/solution-packager-tool

NEW QUESTION # 106
You need to recommend methods to resolve the organization's issues.
What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Add users to Microsoft 365.

Scenario: Users cannot view Power BI reports within the Power Platform apps.

Issue: The people you share with may see a locked tile in a dashboard, or a "Permission required" message when they try to view a report.

Solution: You need to grant them permission to the underlying dataset.

* Go to the All or the Datasets + dataflows tab in your content list.

* Select More options (...) next to a dataset, then select Manage permissions.

* Select Add user.

* Enter the full email addresses for individuals, distribution groups, or security groups.

* Select Grant access.

Box 2: Configure an on-premises data gateway.

Scenario: The company plans to reference historical data in the [on-premises] existing system. The records held in these systems will not be migrated to the new solution except for medication information.

The on-premises data gateway acts as a bridge to provide quick and secure data transfer between on-premises data (data that isn't in the cloud) and several Microsoft cloud services. These cloud services include Power BI, PowerApps, Power Automate, Azure Analysis Services, and Azure Logic Apps. By using a gateway, organizations can keep databases and other data sources on their on-premises networks, yet securely use that on-premises data in cloud services.

NEW QUESTION # 107

You design a Power Platform solution for a customer. The solution uses Microsoft Dataverse as the data store.

You are managing the go-live process for the solution.

The customer reports the following performance issues:

* Form load time is much slower than it was during testing.

* Overall system performance has been significantly slower that it was during testing.

You need to recommend how to troubleshoot system performance.

Which actions should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Review the fields that are on the form

Keep the number of table columns (fields) to a minimum.

The more table columns (formerly referred to as fields) you have in a form, the more data that needs to be downloaded to view each record.

Box 2: Review one to many relationships to verify whether cascade settings are necessary.

Reference:

https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/optimize-form-performance

NEW QUESTION # 108

You need to ensure that the solution meets the data security and compliance requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:
Explanation
□
Box 1: Assign: Cascade None
Scenario: Worker still records must be archived after ten years and are then removed from the main system.
Assign: The referenced table record owner is changed.
Cascade None: Do nothing.
