Fortinet FCP - FortiAnalyzer 7.4 Analyst Sample Questions (Q34-Q39):

NEW QUESTION # 34

Which clause is considered mandatory in SELECT statements used by the FortiAnalyzer to generate reports?

- A. LIMIT
- B. FROM
- C. WHERE
- D. ORDER BY

Answer: B

NEW QUESTION # 35

What is the purpose of the following CLI command?

```
# configure system global
  set log-checksum md5
end
```

- A. To encrypt log communications
- B. To add the MD's hash value and authentication code
- C. To add a log file checksum
- D. To add a unique tag to each log to prove that it came from this FortiAnalyzer

Answer: C

NEW QUESTION # 36

Which statement about the FortiSOAR management extension is correct?

- A. It requires a dedicated FortiSOAR device or VM.
- B. It runs as a docker container on FortiAnalyzer.
- C. It does not include a limited trial by default.
- D. It requires a FortiManager configured to manage FortiGate.

Answer: A

Explanation:

The FortiSOAR management extension is designed as an independent security orchestration, automation, and response (SOAR) solution that integrates with other Fortinet products but requires its own dedicated device or virtual machine (VM) environment. FortiSOAR is not natively integrated as a container or service within FortiAnalyzer or FortiManager, and it operates separately to manage complex security workflows and incident responses across various platforms.

Let's examine each option to determine the correct answer:

Option A: It requires a FortiManager configured to manage FortiGate

This is incorrect. FortiSOAR operates independently of FortiManager. While FortiSOAR can receive input or data from FortiGate

(often managed by FortiManager), it does not require FortiManager to be part of its setup.

Option B: It runs as a docker container on FortiAnalyzer

This is incorrect. FortiSOAR does not run as a container within FortiAnalyzer. It requires its own dedicated environment, either as a physical device or a virtual machine, due to the resource requirements and specialized functions it performs.

Option C: It requires a dedicated FortiSOAR device or VM

This is correct. FortiSOAR is deployed as a standalone device or VM, which enables it to handle the intensive processing needed for orchestrating security operations, integrating with third-party tools, and automating responses across an organization's security infrastructure.

Option D: It does not include a limited trial by default

This is incorrect. FortiSOAR installations may come with trial options or demos in specific scenarios, especially for evaluation purposes. This depends on licensing and deployment policies.

NEW QUESTION # 37

Which two statements are correct regarding the export and import of playbooks? (Choose two.)

- A. A playbook that was disabled when it was exported, will be disabled when it is imported.
- B. You can export only one playbook at a time.
- C. You can import a playbook even if there is another one with the same name in the destination.
- D. Playbooks can be exported and imported only within the same FortiAnalyzer.

Answer: A,C

What can you conclude about these search results? (Choose two.)

- A. They can be downloaded to a file.
- B. They are sortable by columns and customizable.
- C. They were searched by using text mode.
- D. They are not available for analysis in FortiView.

Answer: A,B

Explanation:

In this exhibit, we observe a search query on the FortiAnalyzer interface displaying log data with details about the connection events, including fields like date, srcip, dstip, service, and dstintf. This setup allows for several functionalities within FortiAnalyzer.

* Option A - Download Capability:

* FortiAnalyzer provides the option to download search results and reports to a file in multiple formats, such as CSV or PDF, allowing for further offline analysis or archival. This makes it possible to save the search results shown in the exhibit to a file.

* Conclusion: Correct.

* Option B - Sorting and Customization:

* The FortiAnalyzer interface allows users to sort and customize columns for search results. This helps in organizing and viewing the logs in a manner that fits the analyst's needs, such as ordering logs by time, srcip, dstip, or other fields.

* Conclusion:Correct.

* Option C - Availability in FortiView:

* FortiView is a tool within FortiAnalyzer that visualizes data and provides analysis capabilities, including traffic and security event logs. Since these are traffic logs, they are typically available for visualization and analysis within FortiView.

* Conclusion:Incorrect.

* Option D - Text Mode Search:

* The search displayed here appears to be in a structured format, which implies it might be utilizing filters rather than a free-text search. FortiAnalyzer allows both structured searches and text searches, but there's no indication here that text mode was used.

* Conclusion:Incorrect.

Conclusion:

* Correct Answer:A. They can be downloaded to a file.andB. They are sortable by columns and customizable.

* These options are consistent with FortiAnalyzer's capabilities for managing, exporting, and customizing log data.
