FCSS_ADA_AR-6.7 Reliable Test Simulator | New FCSS_ADA_AR-6.7 Test Materials

FCSS_ADA_AR-6.7 Guide Quiz helped over 98 percent of exam candidates get the certificate. Before you really attend the FCSS_ADA_AR-6.7 exam and choose your materials, we want to remind you of the importance of holding a certificate like this one. Obtaining a FCSS_ADA_AR-6.7 certificate likes this one can help you master a lot of agreeable outcomes in the future, like higher salary, the opportunities to promotion and being trusted by the superiors and colleagues.

Fortinet FCSS_ADA_AR-6.7 Exam Syllabus Topics:

Topic	Details
Topic 1	• FortiSIEM Rules and Analytics: This section evaluates the expertise of Security Analysts and Automation Engineers in configuring FortiSIEM rules and analytics. It includes constructing security rules based on event patterns, leveraging MITRE ATT&CK® frameworks, and configuring advanced nested queries and lookup tables for complex threat detection and correlation.
Topic 2	• FortiSIEM Baseline and UEBA: This section tests the knowledge of Compliance Officers and Threat Analysts in implementing baseline profiles and User and Entity Behavior Analytics (UEBA). It covers creating baseline reports, configuring UEBA agents, and analyzing log-based behavioral patterns to detect anomalies and insider threats.
Topic 3	• Conditions and Remediation: This section measures the skills of Incident Responders and SOAR Specialists in remediating security incidents. It includes configuring manual and automated remediation workflows, integrating FortiSOAR with FortiSIEM for streamlined incident resolution, and deploying scripts to address threats while maintaining compliance
Topic 4	• Multi-Tenancy SOC Solution for MSSP: This section of the exam measures the skills of MSSP Architects and SOC Engineers in designing and deploying multi-tenant Security Operations Center (SOC) environments using FortiSIEM. It covers defining collectors and agents, deploying FortiSIEM in hybrid setups, managing resource allocation, and installing • managing Windows and Linux agents for scalable event monitoring in multi-tenant architectures.

Fortinet FCSS—Advanced Analytics 6.7 Architect Sample Questions (Q22-Q27):

NEW QUESTION # 22
Refer to the exhibit.

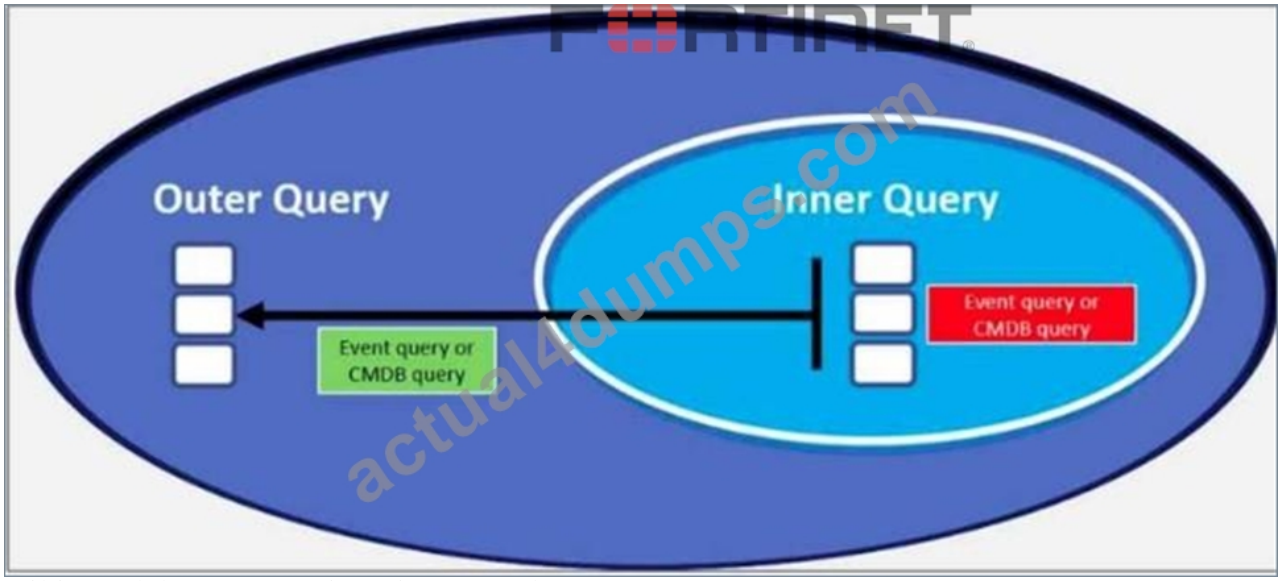
Which statement about the rule filters events shown in the exhibit is true?

- A. The rule filters events with an event type that belong to the Domain Account Locked CMDB group and a user that belongs to the Domain Controller applications group.
- B. The rule filters events with an event type that equals Domain Account Locked and a reporting IP that equals Domain Controller applications.
- C. The rule filters events with an event type that belong to the Domain Account Locked CMDB group and a reporting IP that belong to the Domain Controller applications group.
- D. The rule filters events with an event type that belong to the Domain Account Locked CMDB group or a reporting IP that belong to the Domain Controller applications group.

Answer: C

Explanation:
From the Filters section in the exhibit, we see:
1. Event Type IN EventTypes: Domain Account Locked
2. Reporting IP IN Applications: Domain Controller
3. Logical Operator: AND
Since both conditions must be true, the rule is effectively filtering events where:
*The event type belongs to the Domain Account Locked CMDB group
*The reporting IP belongs to the Domain Controller applications group

NEW QUESTION # 23
Refer to the exhibit.



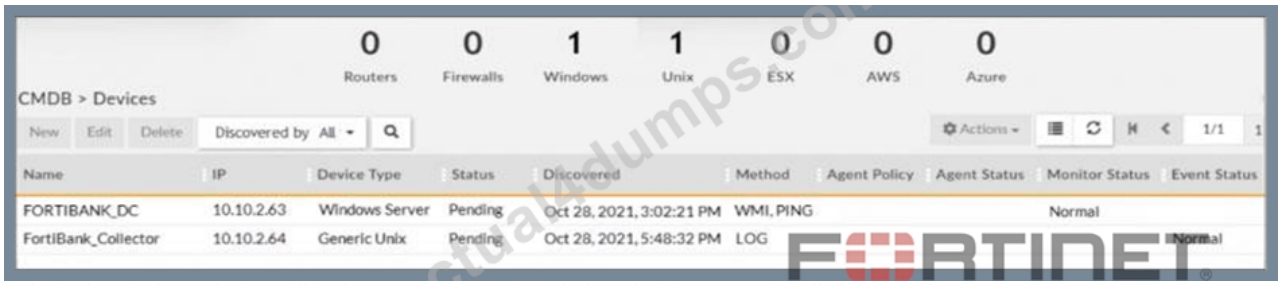
Which scenario is not a supported nested query scenario?

- A. The outer query is the CMDB query, and the inner query is the event query.
- B. The outer query is the event query, and the inner query is the event query.
- C. The outer query is the CMDB query, and the inner query is the CMDB query.
- D. The outer query is the event query, and the inner query is the CMDB query.

Answer: C

Explanation:
FortiSIEM does not allow CMDB queries to be nested within other CMDB queries. CMDB data is static information, and nesting would not add value or function properly in query execution.

NEW QUESTION # 24
Refer to the exhibit.



Why is the windows device still in the CMDB, even though the administrator uninstalled the windows agent?

- A. The device must be deleted manually from the CMDB
- B. The device must be deleted from backend of FortiSIEM
- C. The device was not uninstalled properly
- D. The device has performance jobs assigned

Answer: D

NEW QUESTION # 25
What happens to UEBA events when a user is off-net?

- A. The agent will drop the events if it cannot upload them to a FortiSIEM collector
- B. The agent will upload the events to the Worker if it cannot upload them to a FortiSIEM collector
- C. The agent will cache events locally if it cannot upload them to a FortiSIEM collector
- D. The agent will upload the events to the Supervisor if it cannot upload them to a FortiSIEM collector

Answer: C

NEW QUESTION # 26
What is the primary function of FortiSIEM rule processing?

- A. To determine the actions to take based on observed events?
- B. To archive older log entries for storage?
- C. To organize logs by timestamp?
- D. To ensure smooth communication between FortiSIEM components?

Answer: A

NEW QUESTION # 27
.....

Passing an FCSS—Advanced Analytics 6.7 Architect exam on the first attempt can be stressful, but Fortinet FCSS_ADA_AR-6.7 exam questions can help manage stress and allow you to perform at your best. We at Actual4Dumps give you the techniques and resources to make sure you get the most out of your exam study. We provide preparation material for the FCSS—Advanced Analytics 6.7 Architect exam that will guide you when you sit to study for it. FCSS_ADA_AR-6.7 updated questions give you enough confidence to sit for the Fortinet exam.
