ServiceNow Certified Implementation Specialist - Hardware Asset Management Sample Questions (Q89-Q94):

NEW QUESTION # 89

What are the four tiers of Capability Blueprint?

- A. Trustworthy Data, Lifecycle Management, Process Integration, Strategic Conformance
- **B. Trustworthy Data, Practical Management, Operational Integration, Strategic Conformance**
- C. Trustworthy Data, Lifecycle Management, Operational integration, Business Alignment
- D. Trustworthy Data, Practical Management, Process Integration, Business Alignment

Answer: B

NEW QUESTION # 90

What core sets of data are required for effective IT asset management?

Choose 4 answers

- **A. Users**
- **B. Locations**
- **C. Models**
- **D. Manufacturers**
- E. Relationships
- F. Projects

Answer: A,B,C,D

Explanation:

According to the ServiceNow Hardware Asset Management documentation, the core sets of data required for effective IT asset management are:

*Manufacturers: The companies that produce the hardware assets, such as Dell, HP, Cisco, etc.

*Locations: The physical places where the hardware assets are stored or used, such as offices, data centers, warehouses, etc.

*Users: The people who own, use, or manage the hardware assets, such as employees, customers, vendors, etc.

*Models: The specific types or categories of hardware assets, such as laptops, servers, routers, etc.

NEW QUESTION # 91

Within the asset audit form, where would you find the list of all assets that were found at the stockroom or warehouse that is being audited?

- A. Identified assets
- B. Labelled assets
- C. Scanned assets
- D. Inventoried assets
- **E. Expected assets**

Answer: E

Explanation:

According to the Hardware Asset Management documentation, an asset audit is a process of verifying the physical existence and location of assets in an organization, such as a stockroom or a warehouse.

The asset audit form shows the details of the audit, such as the name, description, status, start date, end date, and location of the audit¹.

The asset audit form also shows the audit results, which are the status of each scanned asset, such as "Scanned and expected", "Scanned and not expected", "Expected and not scanned", or "Not expected and not scanned"¹.

The scanned assets are the assets that were found at the stockroom or warehouse that is being audited, regardless of whether they were expected or not¹.

The scanned assets are displayed in the Scanned Assets related list on the asset audit form¹.

Therefore, the correct answer is option B, scanned assets, as they are the list of all assets that were found at the stockroom or warehouse that is being audited. References:

What is Hardware Asset Management?

NEW QUESTION # 92

Which is NOT a component of a hardware asset's lifecycle?

- A. Consume
- B. Procure
- C. Request
- D. Receive
- E. Dispose

Answer: A

Explanation:

According to the ServiceNow Hardware Asset Management documents, a hardware asset's lifecycle consists of the following stages: Procure, Receive, Deploy, Maintain, and Dispose¹. These stages correspond to the options A, D, and E in the question. The option B, Request, is also a valid stage in the hardware asset management process, as it involves identifying the hardware needs and initiating the procurement process². However, the option C, Consume, is not a component of a hardware asset's lifecycle, as it is not mentioned in the ServiceNow documents. Consume is more relevant to software assets, which are used or consumed by end-users or applications³. Therefore, the correct answer is C. Consume. Reference:

NEW QUESTION # 93

Taxes paid at the time of purchase are what type of cost?

- A. Capital Expense
- B. Operating Expense
- C. Operating Cost
- D. Original Cost

Answer: D

Explanation:

According to the ServiceNow Hardware Asset Management documentation, original cost is the amount paid to acquire an asset, including any taxes, fees, shipping, installation, or other expenses directly related to the purchase. Original cost is used to calculate depreciation and amortization of an asset over its useful life. The other options are not the type of cost that taxes paid at the time of purchase are. Operating expense, operating cost, and capital expense are different ways of classifying the costs of using and maintaining an asset after it is purchased.
