## **Scrum Professional Scrum Master I Sample Questions (Q77-Q82):**

### **NEW QUESTION # 77**

When is it most appropriate for a Development Team to change the definition of "Done"?

- A. Prior to starting a new Sprint.
- B. Prior to starting a new project.
- **C. During the Sprint Retrospective.**
- D. During Spring Planning.

**Answer: C**

### **NEW QUESTION # 78**

True or False: Every Scrum team must have a Product Owner and Scrum Master.

- A. False. A Scrum Master is only required when asked for by the Development Team.
- **B. True. Outcomes affected by their participation and availability.**
- C. True. Each must be 100% dedicated to the Scrum Team.
- D. False. A Product Owner can be replaced by a business analyst in the Development Team.

**Answer: B**

### **NEW QUESTION # 79**

Who has the final say on the order of the Product Backlog?

- **A. The Product Owner.**
- B. The Stakeholders.
- C. The Scrum Master.
- D. The CEO.
- E. The Development Team

**Answer: A**

Explanation:

According to the Scrum Guide, the Product Owner has the final say on the order of the Product Backlog, as he or she is responsible for maximizing the value of the product and the work of the Development Team. The other roles do not have this authority, although they may provide input and suggestions to the Product Owner.

### **NEW QUESTION # 80**

At the end of a Sprint Product Backlog item worked on during the Sprint does not meet the definition of "Done". What two things should happen with the undone Product Backlog item? (Choose two.)

- **A. Put it on the Product Backlog for the Product Owner to decide what to do with it.**
- B. If the stakeholders agree, the Product Owner can accept it and release it to the users.
- C. Review the item, add the "Done" part of the estimate to the velocity and create a Story for the remaining work.
- **D. Do not include the item in the Increment this Sprint.**

**Answer: A,D**

#### Explanation:

According to the Scrum Guide 1, the definition of "Done" is a formal description of the state of the Increment when it meets the quality measures required for the product. The definition guides the Development Team in creating a "Done" Increment. The definition of "Done" is created by the development organization (or Development Team if none is available from the development organization). The definition of "Done" may vary significantly per Scrum Team, depending on the context. One aspect of Scrum Teams inspecting how they work toward their Product Goal is that they improve their definition of "Done" over time. Therefore, if a Product Backlog item worked on during the Sprint does not meet the definition of "Done", two things that should happen with the undone Product Backlog item are:

Put it on the Product Backlog for the Product Owner to decide what to do with it, as they are accountable for effective Product Backlog management and ordering.

Do not include the item in the Increment this Sprint, as it does not meet the quality standards and may compromise value.

The other options are not appropriate, as they may compromise transparency, inspection, or adaptation.

#### NEW QUESTION # 81

Your explanation is correct in the context of the Scrum framework.

According to the Scrum Guide, the Product Owner's role involves managing and prioritizing the Product Backlog and working closely with stakeholders. The Product Owner is also responsible for communicating progress and answering questions related to the items in the current Sprint. Let's break down the activities you mentioned:

- A. Answer questions from the Development Team about items in the current Sprint.
- B. Run the Daily Scrum.
- C. Prioritize the Development Team's work on the Sprint Backlog.
- D. Update management on what is being worked on.

**Answer: A,D**

#### Explanation:

According to the Scrum Guide, two activities that a Product Owner may engage in during a Sprint are updating management on what is being worked on and answering questions from the Development Team about items in the current Sprint. These activities are part of the Product Owner's responsibilities to manage and prioritize the Product Backlog, communicate with stakeholders, and collaborate with the Development Team. The other options are not activities that a Product Owner should engage in during a Sprint, as they are either done by the Scrum Master (such as running the Daily Scrum) or by the Development Team (such as prioritizing their work on the Sprint Backlog).

#### NEW QUESTION # 82

.....
