06 | City Press Tenders and Careers

CENTLEC (SOC) LTD.
Invites suitably qualified candidates to apply for the undermentioned vacancy.
CENTLEC (SOC) LTD is an Equal Opportunity and Affirmative Action Employer.

**1. DISCREET, FINANCE
CHIEF FINANCIAL OFFICER**

Requirements for the position:
NCP Level 7 in Accounting, Finance or Economics, B Com (Hons) Degree and Master's degree in the fields of Accounting, Finance or Economics acquired at an accredited institution will be an added advantage. The candidate must be compliant with all the requirements as contained in the Municipal Regulations on Minimum Competency Levels, Gazette 29967. The candidate should possess a certificate in Municipal Financial Management Programme (MFMP) or Certificate Programme in Municipal Development (CPMD). The candidate must have at least 10 years or more experience in the field of Finance and five (5) years' experience at a Middle or Senior Management level. Candidates should be registered with relevant professional bodies and must have high level of Computer Literacy. The candidate must have a valid driver's license.

Candidates with Local Government experience on Middle or Senior level and those who are Chartered Accountants would have an added advantage. Good facilitation and communication skills in the official languages widely used in the Free State Province. The candidate must have clean ITC report and NO criminal record or pending criminal/civil proceedings against them.

Competencies and Skills:
Strategy, Leadership and Management, Analytical Ability, Managerial Experience, Strategic Financial Management, Operational Financial Management, Governance, Ethics and Values in Financial Management, Financial and Performance Reporting, Audit and Risk Management Experience, Change Management, Project Management, Legislation, Policy and Implementation, Stakeholder Relations, Supply Chain Management, Audit and Assurance.

Main Responsibilities:
The successful candidate will be reporting directly to the Chief Executive Officer and be responsible for the following:

- Advise the Chief Executive Officer and Senior Managers on the exercise of powers and duties assigned to the Municipal Manager in terms of sections 75 or 79 of the MFMA.
- Assist the Chief Executive Officer in the administration of the Entity's bank account, the preparation and implementation of the Municipal Entity's budget.
- Manage and control all financial functions of the Municipal Entity, which includes, inter alia, the administration of the budget.
- Perform duties such as budgeting, accounting, analysis, financial reporting, cash management, debt management, supply chain management, financial management as well as reviews and other duties that may be delegated to her/him by the Chief Executive Officer in terms of section 79 of the MFMA.
- Develop a medium-term financial framework within which the Board & Council can operate.
- Provide framework for financial accountability and ensure it is applied effectively.
- Manage and control the auxiliary support services so that there are efficient and effective financial systems in place.
- Develop financial organisational strategies by contributing financial and accounting information, analysis, and recommendations to strategic thinking and direction, establishing functional objectives in line with organisational objectives.
- Develop organization's prospects by studying economic trends and revenue opportunities; projecting acquisition and expansion prospects; analyzing organization's operations, identifying opportunities for improvement, cost reduction, and systems enhancement; accumulating capital to fund expansion.
- Update job knowledge by remaining aware of new regulations, participating in educational opportunities, reading professional publications, maintaining personal networks, participating in professional organizations.
- Comply with all financial reporting and prepare financial statements for the Entity and maintain good working relationships with the Auditor General's Office and other stakeholders.

The above list is not conclusive, added responsibilities may be issued as and when the Chief Executive Officer finds it appropriate.

NOTE: The Entity's employment Equity plan will apply. Qualifications and SA citizenship checks will be conducted on all short-listed candidates. Successful candidates will be subjected to competency, (psycho-metric) assessments, security clearance and other additional checks. It is the applicant's responsibility to have foreign qualifications evaluated by the South African Qualifications Authority (SAQA). The successful candidate will be required to sign an employment contract, a performance agreement, and the disclosure of financial interest before commencement of his/her duties.

Enquiries for the above-mentioned position must be directed to: Ms Lorraine Mkhwanane on 051 412 2727, email: Lorraine.Mkhwanane@centlec.co.za

Please note that communication shall only be entered into between the successful candidate for further processes.

Salary Grade: Total Cost to Company

The closing date in respect of this position will be 07 May 2023. All applications must be made on the Entity's official application form. Applicants, who wish to be considered for this position, must email their application form together with their detailed CV's and certified copies of their certificates, ID document and Driver's License. The relevant telephone number can be contacted for more information. Please note that if you do not receive any correspondence from this organisation regarding your application within 30 days after the closing date of this advertisement, you should regard your application as unsuccessful.

Please email your application to:
employ1@centlec.co.za
employ2@centlec.co.za
employ3@centlec.co.za

We thank all applicants for their interest

Nutanix NCP-MCI-7.5 Certification Sample Questions Exam Pass at Your First Attempt | NCP-MCI-7.5 Pdf Demo Download

If you spare only a few days for exam preparation, our NCP-MCI-7.5 learning materials can be your best choice for your time and money. With our NCP-MCI-7.5 exam questions, you can not only pass exam in the least time with the least efforts but can also secure a brilliant percentage. And we will find that our NCP-MCI-7.5 Study Guide is the most effective exam materials. We can

claim that with our NCP-MCI-7.5 training engine for 20 to 30 hours, you can pass the exam with ease.

Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI) 7.5 Sample Questions (Q92-Q97):

NEW QUESTION # 92

A VM is protected by a protection policy and the volume group is configured with CHAP authentication. An administrator rotates the VM's password as part of the monthly routine. What action must the administrator perform to ensure the password is retained in the event of a failover?

- A. Set the password in the VG recovery points.
- B. Update the associated protection policy.
- C. Update the associated recovery plan.
- D. Set the password as part of startup policy.

Answer: C

Explanation:

For CHAP-protected volume groups, Nutanix documentation is explicit that when the target password is changed, the administrator must also update the associated recovery plan. Nutanix states that if the new target password is not updated in the recovery plan, it is not retained after failover. That makes the recovery plan the place where the failover-side credential continuity is preserved. In other words, protection policies create and replicate recovery points, but the recovery plan contains the information needed for the recovered application workflow, including CHAP details needed after recovery. (Nutanix Portal) This is an important exam distinction: protection policy controls snapshot and replication behavior, while recovery plan controls recovery orchestration and the settings needed when workloads are actually brought online at the target site. Recovery points themselves are snapshots of protected entities; they are not the administrative mechanism Nutanix documents for persisting an updated CHAP target password through failover. So even though the uploaded file says option D, the official Nutanix guidance supports A. For failover success with CHAP-enabled VGs, always synchronize password changes with the recovery plan. (Nutanix Portal)

NEW QUESTION # 93

An administrator has configured CVM security hardening on a Nutanix cluster with the following settings:

* IP Restriction State is set to enabled

* Password-based SSH access is disabled via Cluster Lockdown

The administrator attempts to SSH into the CVM from a new jump box and the connection is refused.

What should the administrator do to restore SSH access to the CVM?

- A. Log in to Prism Central Security Dashboard and remotely update the SSH whitelisted addresses for the affected cluster.
- B. Log in to Prism Element and update the Cluster Lockdown settings to add the new jump box IP address.
- C. Restart the CVM to reset the IP restriction and regain SSH access from the new jump box IP.
- D. Access the CVM using the local console or serial access and update the SSH whitelisted address to the new jump box IP.

Answer: D

Explanation:

Nutanix security hardening guidance explains that SSH Whitelisted Addresses control which client IPs are allowed to reach the CVM over SSH. If IP restriction is enabled and the new jump box is not on the allowlist, the SSH connection is expected to be refused. In that locked-down state, the correct recovery path is to access the CVM through a local or serial console and update the whitelist to include the new jump box IP. That makes C the correct answer. (portal.nutanix.com , portal.nutanix.com) Cluster Lockdown disabling password-based SSH is not the same setting as the SSH allowlist. Prism Central security views can help with visibility, but the key documented mechanism is the whitelist itself. Restarting the CVM does not reset the hardened configuration. Nutanix's intent is that trusted-source access must be explicitly permitted, and once it is blocked, you need console-level access to make the change safely.

NEW QUESTION # 94

An administrator is deploying a new cluster with dense storage. Each node will have 100TB of storage. How many logical cores will be assigned to each CVM?

- A. 0

- B. 1
- C. 2
- D. 3

Answer: B

Explanation:

For storage-dense nodes, Nutanix allocates CVM resources to ensure the Controller VM can handle storage services efficiently. Official Nutanix documentation shows the Controller VM requires a minimum of 12 vCPUs, and Foundation documentation describes CVM vCPU allocation ranges that increase based on platform characteristics and workload needs. In a dense-storage design with 100 TB per node, the exam-aligned answer is 12 logical cores for the CVM. (Nutanix Portal) The key concept here is not simply memorizing one number, but understanding why dense storage affects CVM sizing. The CVM runs critical storage-path services, metadata handling, and data services operations.

As node capacity increases, Nutanix expects sufficient CPU to sustain those functions under load. Options 6 and 8 are too small for the documented baseline direction shown in official guidance, while 14 is not the standard answer expected for this scenario. For exam purposes, when the question frames a dense storage node with 100 TB, the supported sizing answer is 12. (Nutanix Portal)

NEW QUESTION # 95

An administrator manages a Nutanix cluster with software data-at-rest encryption enabled using an external KMS. Several VMs are configured with vTPM to support Windows BitLocker encryption.

The administrator needs to perform a disaster recovery operation and restore the VMs on a different cluster.

During the recovery, the administrator discovers that the encryption key backup file is unavailable.

What is the expected outcome for the vTPM-enabled VMs?

- A. The VMs will start successfully with a new vTPM device automatically attached during the restore process.
- B. The VMs will fail to start because BitLocker will not prompt for the recovery key on first boot.
- C. The VMs will fail to start because the vTPM keys cannot be recovered without the backup file.
- D. The VMs will fail to start successfully because the external KMS provides the vTPM keys directly to the new cluster.

Answer: C

Explanation:

Nutanix security documentation is clear that vTPM data includes crucial encryption keys and that those keys must be protected through the Nutanix-supported mechanisms. Nutanix also states that encryption keys must be backed up, and third-party-style backup approaches do not protect vTPM device data correctly. If the required key backup material is missing during recovery, the restored environment cannot reconstruct the vTPM-backed trust context for those VMs. In practical terms, that means the VMs cannot be started successfully in the expected protected state because the vTPM keys cannot be recovered without the backup file. That makes D the best answer. (Nutanix Portal) This is why Nutanix treats vTPM-enabled workloads as a special class in protection and recovery planning.

The issue is not that a new blank vTPM can simply be attached during restore, and it is not that the external KMS alone automatically recreates the VM's vTPM identity. The trust chain depends on the protected key material. Without that backup information, Windows BitLocker and other vTPM-dependent security features cannot be restored to their original usable state. So even though the environment uses an external KMS for software encryption, the Nutanix-documented principle still applies: without the necessary key backup, the vTPM-enabled VMs cannot be recovered successfully, which is exactly what option D states. (Nutanix Portal)

NEW QUESTION # 96

An administrator would like to create a VM template for reusability, to simplify VM management, and improve security.

When should the administrator apply a guest customization profile to simplify VM management?

- A. When cloning a VM with Sysprep guest customization
- B. When deploying a VM with a customized guided script
- C. When cloning a VM with Cloud-Init guest customization
- D. When deploying a VM with Cloud-Init guest customization

Answer: D

Explanation:

Nutanix documentation describes guest customization profiles as reusable configuration settings that can be applied during VM

deployment from a template and also during certain clone operations. For Linux-based cloud-init workflows, Nutanix explicitly shows that when deploying a VM from a template with Cloud-Init guest customization, administrators can apply or override the customization settings at deployment time. That makes option A the cleanest and most documentation-aligned answer. (portal.nutanix.com , portal.nutanix.com)

Why not the others? Nutanix does support guided setup and clone scenarios, but the wording "create a VM template for reusability" points most strongly to the template deployment workflow rather than one-off cloning. Cloud-init is also the Nutanix-native customization method for Linux initialization at first boot, which makes it especially suitable for standardized reusable templates. So if the goal is simple repeatable management with a template-driven lifecycle, the correct point to apply the guest customization profile is when deploying a VM with Cloud-Init guest customization, which is A. (portal.nutanix.com)

NEW QUESTION # 97

.....

Nutanix NCP-MCI-7.5 Exam Questions, applicants may study for and pass their desired certification exam. You may use ValidDumps's top NCP-MCI-7.5 study resources to prepare for the Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI) 7.5 exam. The Nutanix NCP-MCI-7.5 Exam Questions offered by ValidDumps are dependable and trustworthy sources of preparation. ValidDumps provides valid exam questions and answers for customers, and free updates for 365 days.
