

What is the Most Trusted Platform to Buy Nutanix NCP-AI Actual Dumps?

P.S. Free & New NCP-AI dumps are available on Google Drive shared by Pass4sures: <https://drive.google.com/open?id=16qbbCmc5NvOllprKqmdmqFwzYcvF66o0>

Our NCP-AI study materials are full of useful knowledge, which can meet your requirements of improvement. Also, it just takes about twenty to thirty hours for you to do exercises of the Nutanix NCP-AI Study Guide. The learning time is short but efficient. You will elevate your ability in the shortest time with the help of our Nutanix NCP-AI preparation questions.

Nutanix NCP-AI Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Connect Applications to a Nutanix Enterprise AI Environment: This domain focuses on configuring and validating application connections to endpoints and monitoring endpoint metrics to track application usage and integration performance.
Topic 2	<ul style="list-style-type: none">Deploy a Nutanix Enterprise AI Environment: This domain covers initial deployment tasks including validating prerequisites, installing Enterprise AI components, and configuring DNS, URLs, and certificates for secure platform operation.
Topic 3	<ul style="list-style-type: none">Perform Day 2 Operations: This domain addresses ongoing management including preparing application integration requirements, interpreting and optimizing performance metrics, monitoring access for anomalies, and selecting appropriate LLMs for optimal output.
Topic 4	<ul style="list-style-type: none">Troubleshoot a Nutanix Enterprise AI Environment: This domain covers diagnosing and resolving performance issues, resource utilization problems, cluster health check failures, and model import or endpoint creation errors.
Topic 5	<ul style="list-style-type: none">Configure a Nutanix Enterprise AI Environment: This domain focuses on operational setup including onboarding users, importing large language models, creating and securing API endpoints with keys, and delivering these endpoints to consumers.

Exam Dumps NCP-AI Pdf - NCP-AI Study Guide

In order to facilitate the user's offline reading, the NCP-AI study braindumps can better use the time of debris to learn, especially to

develop PDF mode for users. In this mode, users can know the NCP-AI prep guide inside the learning materials to download and print, easy to take notes on the paper, and weak link of their memory, and every user can be downloaded unlimited number of learning, greatly improve the efficiency of the users with our NCP-AI Exam Questions. Our NCP-AI prep guide can be very good to meet user demand in this respect, allow the user to read and write in a good environment continuously consolidate what they learned.

Nutanix Certified Professional - Artificial Intelligence v6.10 Sample Questions (Q31-Q36):

NEW QUESTION # 31

An administrator has been requested by a developer team to provide them with an endpoint. Which action must the administrator ensure is taken before creating the first endpoint?

- A. Import a Large Language Model (LLM) to Nutanix Enterprise AI and ensure that the import status is Active.
- B. Create a new Nutanix Enterprise AI instance, and ensure that status is Running.
- C. Create a new Nutanix Enterprise AI instance, and ensure that status is CompleteD.
- D. Import a Large Language Model (LLM) to Nutanix Enterprise AI and ensure that the import status is UploadD.

Answer: A

NEW QUESTION # 32

A development team is building a new AI-powered customer service chatbot. They have successfully integrated an LLM from Hugging Face into their application via a Nutanix Enterprise AI (NAI) endpoint. The NAI administrator has confirmed the endpoint is in the 'Active' state, and internal sample requests run from the NAI Endpoint section return an 'accurate' response and 'Succeeded' status.

However, the developers report that the chatbot frequently provides vague or irrelevant answers to user queries, leading to low customer satisfaction scores. They describe the LLM's performance for this specific chatbot task as "suboptimal." What should the administrator advise the developers to do next to improve the quality of the LLM's responses for the customer service chatbot task?

- A. Reseed the initial dataset and reimport the existing LLM within Nutanix Enterprise AI without implementing a RAG platform.
- B. Instruct the administrator to check the Kubernetes pod logs for the endpoint to identify any CRASHLOOPBACKOFF or OOMKilled errors that might be affecting model inference.
- C. Increase the number of instances for the NAI endpoint to enhance performance and reduce latency.
- D. Consult the Hugging Face documentation for the specific LLM to review its training data, intended use cases, and capabilities.

Answer: D

NEW QUESTION # 33

The administrator observes a "Pod Network Unreachable" health check failure in the NAI, specifically affecting several application pods on a newly added worker node. Existing pods on other nodes are functioning normally.

Upon initial investigation, `kubectl get pods -o wide` shows the affected pods stuck in ContainerCreating or Pending status, and `kubectl describe pod <pod-name>` events include messages, such as:

"FailedCreatePodSandBox: failed to create sandbox: rpc error: code = Unknown desc = failed to set up network for sandbox..." or "network is not ready" What is the reason for this error and the appropriate next step that the administrator should take?

- A. The kube-proxy service is misconfigured; restart all kube-proxy pods on the cluster.
- B. The underlying Nutanix network segmentation is incorrect; verify VLAN or IP pool configurations are correct in Prism Central.
- C. The NKP CNI plugin on the affected worker node is not functioning correctly; inspect the logs of the CNI poD.
- D. The Docker/containerd runtime on the worker node is corrupted; reinstall the container runtime.

Answer: C

NEW QUESTION # 34

Which command can the administrator use to list which versions of nai-core are available to install?

- A. helm search repo ntnx-charts/nai-core --versions
- B. helm pull repo ntnx-charts/nai-core --versions
- C. helm get repo ntnx-charts/nai-core --versions
- D. helm push repo ntnx-charts/nai-core -versions

Answer: A

NEW QUESTION # 35

An administrator is working with a development team to integrate a customer service application with a large language model deployed on the Nutanix Enterprise AI platform. The model provides natural language responses, and the secure application needs to send user input and receive model-generated replies in real time.

The following requirements must be met:

The application must be connected to the correct API endpoint exposed by the model.

A valid API key must be used to authenticate each request.

The response format must match the expected schema in the application.

The administrator must test and confirm successful communication before production rollout.

Which step should the administrator perform to configure and validate the application successfully?

- A. Expose the model endpoint publicly by assigning an external IP address and bypass authentication for faster testing.
- B. Set up the application in the hypervisor management interface and validate access using VM-level health checks.
- C. Configure access to the endpoint by assigning the application a role in Prism Central.
- D. Confirm the response meets requirements using the copied endpoint URL and API key from the portal.

Answer: D

NEW QUESTION # 36

.....

The Nutanix NCP-AI certification exam helps you in getting jobs easily. Pass4sures offers real NCP-AI exam questions so that the students can prepare in a short time and crack the NCP-AI exam with ease. These NCP-AI Exam Questions are collected by professionals by working hard for days and nights so that the customers can pass NCP-AI certification exam with good scores.
