Snowflake SnowPro Core Certification Exam Sample Questions (Q689-Q694):

NEW QUESTION # 689

When does Snowflake automatically encrypt data that is loaded into Snowflake? (Select TWO).

- A. After loading the data into an internal stage.
- B. After loading data into an external stage.
- C. Only when using an encrypted stage.
- D. After the data is micro-partitioned.
- E. After loading the data into a table.

Answer: A,D

Explanation:
* Data Encryption in Snowflake:
* A. After micro-partitioning: Data stored in Snowflake is encrypted at rest after it is organized into micro-partitions.
* C. After loading into an internal stage: Snowflake encrypts all data stored in internal stages automatically.
Why Other Options Are Incorrect:
* B. After loading into a table: Encryption occurs during the micro-partitioning stage, which precedes this step.
* D. External stage: Data encryption in external stages depends on the external storage provider, not Snowflake.
* E. Only when using an encrypted stage: This is incorrect because encryption is automatic for internal stages and tables.

NEW QUESTION # 690
Which Snowflake governance feature allows users to assign metadata labels to improve data governance and database access control?

- A. Secure functions
- B. Row-level security
- C. Secure views
- D. Object tagging

Answer: D

Explanation:
Object tagging in Snowflake allows users to assign metadata labels to various database objects to improve data governance and access control. Tags can be used to categorize and manage data based on business needs, helping to enforce governance policies and streamline database administration.

NEW QUESTION # 692
A size Small standard virtual warehouse running in auto-suspend mode is used for a production Business Intelligence (BI) reporting environment. The BI reports generate quickly in the early morning, but as the day progresses and there are more users, it takes longer to run the reports. How can this situation be addressed?

- A. Disable the auto-suspend mode.
- B. Enable the query acceleration service.
- C. Change the standard warehouse to a multi-cluster warehouse.
- D. Increase the size of the virtual warehouse.

Answer: A

NEW QUESTION # 693

A user wants to access stored in a stage without authenticating into Snowflake.
Which type of URL should be used?

- A. Staged URL
- B. File URL
- C. Scoped URL
- D. Pre-signed URL

Answer: D

Explanation:
A pre-signed URL provides a way to access objects stored in a stage without requiring authentication to Snowflake. This URL contains all the necessary information for access control, including an expiration time, and it's signed by the service's credentials. This mechanism allows users or applications to access specific files stored in a cloud storage location (stage) directly, bypassing the need to authenticate into Snowflake, ensuring secure and temporary access to the data.
