## Superb SDS Exam Materials: Senior Data Scientist Donate You the Most Popular Training Dumps - TroytecDumps

There are more and more people to try their best to pass the SDS exam, including many college students, a lot of workers, and even many housewives and so on. These people who want to pass the SDS exam have regard the exam as the only one chance to improve themselves and make enormous progress. So they hope that they can be devoting all of their time to preparing for the SDS Exam, but it is very obvious that a lot of people have not enough time to prepare for the important exam. Just like the old saying goes, the spirit is willing, but the flesh is weak.

### DASCA Senior Data Scientist Sample Questions (Q60-Q65):

#### NEW QUESTION # 60

Which of the following is correct about customer lifetime value (CLTV)?

- i. Most organizations determine the current customer lifetime value (CLTV) based on historic sales over past

12 to 18 months

ii. The goal of the CLTV score is to help marketing and store personnel to determine the "value" of a customer

- A. Only ii
- B. Only i
- **C. Both i and ii**

**Answer: C**

Explanation:

Customer Lifetime Value (CLTV) is a predictive metric estimating the total revenue a business can reasonably expect from a customer during their entire relationship.

Statement i: Correct. Many organizations calculate CLTV using historic transactional data, often looking at sales records over the past 12-18 months to establish baselines.

Statement ii: Correct. The primary purpose of CLTV is to help marketing, sales, and retail teams understand customer value, enabling them to allocate budgets effectively for retention, promotions, and personalized marketing.

Thus, both statements are correct # Option C (Both i and ii).

DASCA Data Scientist Knowledge Framework (DSKF) - Business Applications of Data Science: CLTV Metrics and Marketing Analytics.

### NEW QUESTION # 61

What is Scrumban?

- A. It is Scrum
- B. It is Kanban
- C. It combines the principles of Scrum and Kanban into a push-based system
- **D. It combines the principles of Scrum and Kanban into a pull-based system**

**Answer: D**

Explanation:

Scrumban is a hybrid Agile methodology that merges Scrum and Kanban to take advantage of the strengths of both.

From Scrum, Scrumban adopts structured sprint planning, roles, and iterative review cycles.

From Kanban, it borrows the visual board system, continuous workflow management, and the pull-based approach, where tasks are pulled into the workflow only when capacity is available.

The pull-based system ensures that teams do not overload themselves and helps manage work-in-progress (WIP) effectively. This makes Scrumban particularly suitable for projects with frequent changes, ongoing maintenance tasks, or teams transitioning from Scrum to Kanban.

Thus, the correct answer is Option C.

### NEW QUESTION # 62

Which of the following is TRUE for Chief Data Monetization Officer (CDMO)?

- CDMO should focus on driving and deriving value from the organization's data and analytic assets.
- The CDMO should own the organization's investment decisions with respect to data and analytics.
- CDMO should have revenue and margin responsibilities.

- A. ii, iii
- **B. All of the above**
- C. i, ii

**Answer: B**

Explanation:

The Chief Data Monetization Officer (CDMO) is a C-level executive role emerging in data-driven organizations. Their focus is on turning data into business value and revenue growth.

Statement i: Correct. The CDMO is responsible for value realization from data and analytics investments.

Statement ii: Correct. The CDMO owns decisions around investment prioritization for data initiatives.

Statement iii: Correct. Since monetization is directly linked to business performance, the CDMO must be accountable for revenue and margin impact.

Hence, all three statements are correct, making the right answer Option C (All of the above).

Reference:

DASCA Data Scientist Knowledge Framework (DSKF) - Data Leadership & Monetization Roles.

### NEW QUESTION # 63

Which of the following is an SLAs specification in case of Internet Service Provider (ISP)?

- A. Turnaround Time (TAT)
- **B. All of the above**
- C. Mean Time To Recovery (MTTR)
- D. Mean Time Between Failures (MTBF)

**Answer: B**

Explanation:

Service Level Agreements (SLAs) define performance commitments between service providers (like ISPs) and customers. Key SLA metrics include:

MTBF (Option A): Measures reliability by defining the expected average time between service failures.

MTTR (Option B): Measures availability by defining how quickly service can be restored after a failure.

TAT (Option C): Measures responsiveness in resolving customer requests or incidents.

All three are standard SLA performance specifications. Hence, the correct answer is Option D (All of the above).

DASCA Data Scientist Knowledge Framework (DSKF) - Data Engineering and IT Practices: SLAs and Performance Metrics.

### NEW QUESTION # 64

The Big Data Vision Workshop process is ideal for organizations who:

- A. Have a desire to leverage Big Data to transform their business but do not know where and how to start
- **B. All of the above**
- C. Both A and B
- D. Have a wealth of data that they do not know how to monetize
- E. Have a desire to leverage the Big Data Vision Workshop to identify where and how to leverage data and analytics to power their business models

**Answer: B**

Explanation:

The Big Data Vision Workshop is an early-phase framework designed to help organizations shape their data-driven transformation journey. It is particularly beneficial when:

Option A: Organizations want to leverage big data but lack clarity on where to start.

Option B: Organizations already have large volumes of data but struggle to derive monetization strategies from it.

Option C: Organizations want to identify use cases where data and analytics can enhance or even redefine their business models.

Since all three statements apply, the correct answer is Option E (All of the above).
