

3V0-24.25 Study Guide: Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service & 3V0-24.25 Learning Materials

P.S. Free & New 3V0-24.25 dumps are available on Google Drive shared by PassLeader: https://drive.google.com/open?id=1Q2rx5xbaQR52UJgwzIm9P2WA_omUiFh5

As the saying goes, to sensible men, every day is a day of reckoning. Time is very important to people. People often complain that they are wasting their time on study and work. They do not have time to look at the outside world. Now, 3V0-24.25 exam guide gives you this opportunity. 3V0-24.25 test prep helps you save time by improving your learning efficiency. At the same time, 3V0-24.25 Test Prep helps you to master the knowledge in the course of the practice. And at the same time, there are many incomprehensible knowledge points and boring descriptions in the book, so that many people feel a headache and sleepy when reading books. But with 3V0-24.25 learning question, you will no longer have these troubles.

VMware certification can be used in different IT Company and it will be your access to the IT elites. But you may find that the 3V0-24.25 study materials are difficult for you. You need much time to prepare and the cost of the 3V0-24.25 Practice Exam is high, you wonder it will be a great loss for you when fail the exam. It will be bad thing. PassLeader will help you to reduce the loss and save the money and time for you.

>> 100% 3V0-24.25 Accuracy <<

VMware 3V0-24.25 Valid Vce Dumps & 3V0-24.25 Reliable Test Notes

If you are in search for the most useful 3V0-24.25 exam dumps, you are at the right place to find us! Our 3V0-24.25 training materials are full of the latest exam questions and answers to handle the exact exam you are going to face. with the help of our 3V0-24.25 Learning Engine, you will find to pass the exam is just like having a piece of cake. And you will definite pass your exam for our 3V0-24.25 pass guide has high pass rate as 99%!

VMware Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service Sample Questions (Q48-Q53):

NEW QUESTION # 48

A Platform Engineer is troubleshooting an issue where an Ingress resource created for the finance- app is not receiving an external IP address. The Contour Ingress Controller is installed and running.

Review the Ingress manifest and status:

```
apiVersion: networking.k8s.io/v1
kind: Ingress
metadata:
  name: finance-ingress
  namespace: finance
  annotations:
    kubernetes.io/ingress.class: "contour"
```

spec:
rules:
- host: finance.corp.local
http:
paths:
- path: /
pathType: Prefix
backend:
service:
name: finance-service
port:
number: 80
Status:
LoadBalancer: {} (Empty)

The engineer checks the Envoy service status (kubectl get svc -n tanzu-system-ingress envoy) and sees:

NAME TYPE CLUSTER-IP EXTERNAL-IP PORT(S)

envoy LoadBalancer 10.96.134.45 <pending> 80:31368/TCP, 443:32252/TCP What is the root cause of the Ingress malfunction? (Choose 2.)

- A. The finance-service does not exist or is unhealthy.
- B. The Ingress resource is missing the annotation ingress.kubernetes.io/force-ip-allocation: true.
- C. The Supervisor Cluster has run out of available Floating IPs in the Load Balancer IP Pool assigned to the namespace/cluster.
- D. The Envoy Service itself (the data plane) has failed to acquire an External IP (VIP) from the underlying infrastructure Load Balancer (NSX/Avi/HAProxy), which propagates the pending state to the Ingress resources.
- E. The Ingress Class name should be nginx instead of contour.

Answer: C,D

NEW QUESTION # 49

A VKS administrator is tasked to leverage day-2 controls to monitor, scale, and optimize Kubernetes clusters across multiple operating systems and workload characteristics.

What two steps should the administrator take? (Choose two.)

- A. Configure namespace quotas to set resource limits for CPU, memory, and storage.
- B. Deploy Prometheus and Grafana to collect and display scrapeable metrics on nodes, pods, and applications.
- C. Set all VM Class limits to Compute Heavy to ensure worker nodes get all the resources needed.
- D. Ensure all node pools use the same Machine Deployment configuration for different workload characteristics.
- E. Disable Cluster Autoscaler to ensure resources in the pool are not depleted.

Answer: A,B

Explanation:

VCF 9.0 describes a vSphere Namespace as the control point where administrators define resource boundaries for workloads, explicitly stating that vSphere administrators can create namespaces and "configure them with specified amount of memory, CPU, and storage," and that you can "set limits for CPU, memory, storage" for a namespace. This directly supports step A as a day-2 control to keep multi-tenant clusters governed and prevent resource contention across different teams and workload types. For monitoring and optimization, VCF 9.0 explains that day-2 operations include visibility into utilization and operational metrics for VKS clusters, noting that application teams can use day-2 actions and gain insights into CPU and memory utilization and advanced metrics (including contention and availability) for VKS clusters. In addition, VCF 9.0 monitoring guidance for VKS clusters states that Telegraf and Prometheus must be installed and configured on each VKS cluster before metrics and object details are sent for monitoring, and that VCF Operations supports metrics collection for Kubernetes objects (namespaces, nodes, pods, containers) via Prometheus. Since the Prometheus stack commonly includes Grafana dashboards for visualization, deploying Prometheus + Grafana matches the required monitoring/optimization outcome in C.

NEW QUESTION # 50

A Cloud Administrator is planning the Storage Class architecture for a multi-tenant TKG environment.

Each tenant requires:

1. Gold: SSD, High Performance, Deduplication Enabled.

2. Silver: HDD/Hybrid, Low Cost, RAID-5.
How is this mapped in vSphere with Tanzu?

- A. The administrator configures "Gold" and "Silver" datastores and uses hostPath.
- **B. The administrator creates two vSphere Storage Policies in vCenter (Gold-Policy, Silver-Policy) defining the respective vSAN/Tag rules.
These policies are then assigned to the tenant Namespaces.
The system automatically generates StorageClass objects named gold-policy and silver-policy in those namespaces.**
- C. The administrator creates StorageClass YAMLs manually in every cluster.
- D. Storage Classes are pre-defined by VMware and cannot be customized.

Answer: B

NEW QUESTION # 51

In the context of a Tanzu Kubernetes Grid (TKG) cluster upgrade within vSphere with Tanzu, what is the primary mechanism used to update the worker nodes?

- A. In-place upgrade: The package manager (yum/apt) inside each worker node VM is triggered to update the kubelet and container runtime binaries.
- B. Snapshot reversion: The nodes are reverted to a pre-configured snapshot that contains the new software version.
- **C. Rolling update: New worker node VMs are deployed with the new version image, workloads are drained from old nodes to new ones, and old nodes are deleted.**
- D. Blue/Green deployment: A completely new cluster is deployed alongside the old one, and the Load Balancer VIP is switched to the new cluster.

Answer: C

NEW QUESTION # 52

A Cloud Administrator wants to deploy the Velero Supervisor Service to enable backup capabilities for vSphere Namespaces. The target is an S3-compatible object store.

Review the velero-install-config.yaml values file prepared for the installation:

```
backupStorageLocation:  
name: default  
provider: aws  
bucket: vks-backups  
config:  
region: minio  
s3Url: https://minio.corp.local:9000  
volumeSnapshotLocation:  
name: default  
provider: csi  
# Missing Section: Credentials
```

The administrator attempts to install the service using the vcf-cli (or kubectl plugin) but it fails immediately.

What critical configuration component is missing from the workflow? (Select all that apply.)

- **A. The install command or configuration YAML must explicitly reference the credential secret name so Velero can authenticate to the S3 bucket.**
- B. The s3Url must be a public AWS URL; local S3 endpoints are not supported.
- C. The Supervisor must be put into Maintenance Mode to install a Data Protection service.
- **D. A Kubernetes Secret containing the AWS Access Key ID and Secret Access Key must be created in the destination namespace before or during the service installation.**
- E. The volumeSnapshotLocation must be set to aws, not csi.

Answer: A,D

NEW QUESTION # 53

.....

After taking a bird's eye view of applicants' issues, PassLeader has decided to provide them with the real 3V0-24.25 Questions. These 3V0-24.25 dumps pdf is according to the new and updated syllabus so they can prepare for 3V0-24.25 certification anywhere, anytime, with ease. A team of professionals has made the product of PassLeader after much hard work with their complete potential so the candidates can prepare for Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service (3V0-24.25) practice test in a short time.

3V0-24.25 Valid Vce Dumps: <https://www.passleader.top/VMware/3V0-24.25-exam-braindumps.html>

VMware 100% 3V0-24.25 Accuracy We will prove to you that your choice is a right one, When it comes to 3V0-24.25 certification, all of us are very excited and have a lot words, All our customers' information provided when they bought our 3V0-24.25 : Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service free exam torrent will be classified, We not only provide you professional the latest version of 3V0-24.25 test simulator but also unconditional 100% money back guarantee.

Going Shopping with Siri, any business can benefit from marketing on the YouTube site, We will prove to you that your choice is a right one, When it comes to 3V0-24.25 Certification, all of us are very excited and have a lot words.

Latest VMware 3V0-24.25 Questions - Proven Way To Pass Exam

All our customers' information provided when they bought our 3V0-24.25 : Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service free exam torrent will be classified, We not only provide you professional the latest version of 3V0-24.25 test simulator but also unconditional 100% money back guarantee.

It is a good choice to take IT certification test 3V0-24.25 which can not only help you master more skills, also can get the certificate to prove your ability.
