Oracle 1Z0-1133-24 Exam Test & 1Z0-1133-24 Reliable Study Plan

You will get multiple excellent offers if you buy Oracle 1Z0-1133-24 actual exam dumps today. We offer up to three months of free Oracle Cloud EPM Data Integration 2024 Implementation Professional Expert 1Z0-1133-24 exam questions updates. If the Oracle 1Z0-1133-24 real exam content changes within three months of your purchase, we will provide you with free valid Oracle 1Z0-1133-24 Dumps updates. Additionally, you can test the specifications of our 1Z0-1133-24 PDF questions file and Oracle Campaign Certification 1Z0-1133-24 practice test exams by trying free demos. Purchase this updated Oracle 1Z0-1133-24 practice test material today with all these amazing offers.

Oracle Cloud EPM Data Integration 2024 Implementation Professional Sample Questions (Q257-Q262):

NEW QUESTION # 257

What is the primary function of Smart Push in Oracle Cloud EPM?

- A. To instantly move data from one cube to another within a single application
- B. To manage period mappings for data transfers
- C. To schedule real-time financial report generation
- D. To automate user role assignment

Answer: C

Explanation:

Smart Push is designed to move data instantly from one cube to another within a single application, providing quick data synchronization between planning cubes.

NEW QUESTION # 258

What is the role of registering applications in Oracle Cloud EPM?

- A. It configures user permissions for data access
- B. It sets up cloud service monitoring tools
- C. It manages real-time report generation
- **D. It enables the connection between source and target systems for data integration**

Answer: D

Explanation:

Registering applications in Oracle Cloud EPM is necessary to establish connections between source and target systems to facilitate data integration.

NEW QUESTION # 259

Which of the following is required when creating a file-based integration in Oracle Cloud EPM?

- A. API access credentials
- B. Report generation schedules
- C. Database schema details
- **D. Data file path or URL**

Answer: D

Explanation:

When creating a file-based integration, the data file path or URL where the file is stored must be provided so that Oracle Cloud EPM can access and extract the data.

NEW QUESTION # 260

Which of the following must be configured to enable drill-through navigation to an external system?

- A. Period mappings for the target system
- B. Custom dashboards for detailed data visualization
- **C. A URL or connection string to the source system**
- D. A manual data load rule

Answer: C

Explanation:

To enable drill-through navigation to an external system, a URL or connection string must be configured so that Oracle Cloud EPM can access the detailed transaction data in the source system.

NEW QUESTION # 261

Which of the following actions occurs after an application is successfully registered in Oracle Cloud EPM?

- A. User permissions are reset
- **B. A test load of data can be performed**
- C. All data loads are disabled by default
- D. Reports are automatically generated

Answer: B

Explanation:

After registering an application, a test load of data can be performed to verify that the source and target systems are properly configured and data flows correctly.

NEW QUESTION # 262
