After getting success in the NetApp Technology Solutions Professional Exam (NS0-005) certification exam, candidates can put their careers on the fast route and achieve their goals in a short period of time.

Network Appliance NetApp Technology Solutions Professional Exam Sample Questions (Q56-Q61):

NEW QUESTION # 56

Which of the following are benefits of using NetApp StorageGRID? (Choose Two)

- A. Policy-based data retention
- B. High-performance computing
- C. Real-time transaction processing
- D. Geographically dispersed data storage

Answer: A,D

NEW QUESTION # 57

Which two access policies are supported by StorageGRID? (Choose two.)

- A. export
- B. service
- C. bucket
- D. ILM
- E. group

Answer: C

Explanation:

StorageGRID supports two kinds of access policies: bucket policies and group policies. Bucket policies are attached to buckets and control access by users in the bucket owner account or other accounts to the bucket and the objects in it. Group policies are attached to a group in the account and allow that group to access specific resources owned by that account. Both bucket and group policies use the Amazon Web Services (AWS) policy language and are written in JSON.

References = Bucket and group access policies, Use bucket and group access policies, Example group policies.

NEW QUESTION # 58

Your company is using a FlexPod reference architecture. You want to manage your compute, storage, and visualization environment in a single UI. In this scenario, which product would satisfy these requirements?
