**Question: 1**

You are implementing the entire suite of Supply Chain Management Cloud for an auto component manufacturing and distribution company. This company has a manufacturing facility where different auto electrical components are produced to fulfill the demand that originates from various customers. One of the components that the company sells to its customers requires specialized operations; therefore, the company outsources it to an external manufacturer instead of producing it in its own facility.

Which two steps are required to fulfill the demand for this component through outsourced manufacturing? (Choose two.)

### 질문 # 89

You deployed the Extensible Flexfield (EFF) successfully but it is not visible in the order capture additional information section. What are the two reasons for this?

- A. The EFF segments are incomplete.
- B. The EFF has not been compiled.
- C. The custom extensible flexfields are not published.
- D. The EFF context is not associated with the page.
- E. The EFF definition needs to be frozen.

정답: C,D

### 설명:

These are the two reasons why the Extensible Flexfield (EFF) is not visible in the order capture additional information section. An EFF is a user-defined flexfield that you can use to capture additional information on sales orders, such as trade compliance, call

center details, or source order status1. To make an EFF visible in the order capture additional information section, you need to perform the following steps2:

\* Associate the EFF context with the page: You need to specify which page in the Order Management work area will display the EFF, such as the order header or the order line. You can use the Pages tab in the Manage Order Extensible Flexfields task to associate the EFF context with the page.

\* Publish the custom extensible flexfields: You need to deploy the EFF to the database and make it available for use. You can use the Deploy Flexfield task to publish the custom extensible flexfields.
