With the rapid development of the world economy, it has been universally accepted that a growing number of people have longed to become the social elite. However, the competition of becoming the social elite is fierce for all people. The CCDAK exam will be a shortcut for a lot of people who desire to be the social elite. If you try your best to prepare for the CCDAK Exam and get the related certification in a short time, it will be easier for you to receive the attention from many leaders of the big company.

The CCDAK certification exam consists of a series of multiple-choice questions that assess the candidate's knowledge in various aspects of Kafka development. CCDAK exam covers topics such as Kafka architecture, Kafka APIs, Kafka Connect, Kafka Streams, and Kafka Security. Candidates must pass the exam with a minimum score of 70% to earn the CCDAK certification. Confluent Certified Developer for Apache Kafka Certification Examination certification is valid for two years and can be renewed by passing the recertification exam. The CCDAK certification program is an excellent way for developers to demonstrate their Kafka development skills, increase their marketability, and advance their careers in the field of big data and streaming technologies.

Confluent CCDAK (Confluent Certified Developer for Apache Kafka) certification exam is designed for software developers who want to demonstrate their proficiency in building Kafka-based applications. Kafka is an open-source distributed messaging system that allows applications to exchange messages in real-time. It offers a highly scalable, fault-tolerant, and reliable platform for building large-scale distributed systems. The CCDAK exam tests the candidate's ability to work with Kafka and its ecosystem components e.g., producer, consumer, connectors, and streams API.

Choosing our Confluent CCDAK study material, you will find that it will be very easy for you to overcome your shortcomings and become a persistent person. If you decide to buy our Confluent Certified Developer for Apache Kafka Certification Examination CCDAK study questions, you can get the chance that you will pass your CCDAK exam and get the certification successfully in a short time.

### Confluent Certified Developer for Apache Kafka Certification Examination Sample Questions (Q130-Q135):

#### NEW QUESTION # 130

The exactly once guarantee in the Kafka Streams is for which flow of data?

- A. Kafka => Kafka
- B. Kafka => External
- C. External => Kafka

#### Answer: A

Explanation:

Kafka Streams can only guarantee exactly once processing if you have a Kafka to Kafka topology.

#### NEW QUESTION # 131

The producer code below features a Callback class with a method called onCompletion().

In the onCompletion() method, when the request is completed successfully, what does the value metadata.offset() represent?

- A. The number of bytes that overflowed beyond a producer batch of messages
- B. The sequential ID of the message committed into a partition
- C. The ID of the partition to which the message was committed
- D. Its position in the producer's batch of messages

#### Answer: B

Explanation:

The offset in the RecordMetadata object returned by the producer represents the position of the record in the partition- i.e., the sequential ID assigned by Kafka once the message is committed.

From Kafka Producer API Documentation:

"The offset is the position of the record in the partition. This is a unique, sequential number assigned by the broker."

\* D refers to metadata.partition(), not offset().

\* B and C are unrelated to how Kafka handles committed offsets.

Reference: Kafka Producer Java API > RecordMetadata

#### NEW QUESTION # 132

Which statements are correct about ksqlDB SQL? (Choose 3.)

- A. It is ANSI compliant.
- B. It can do joins.
- C. Queries can run continuously.
- D. Primary key indexing is supported.
- E. It supports windowed joins.

#### Answer: B,C,E

#### NEW QUESTION # 133

You are writing a producer application and need to ensure proper delivery. You configure the producer with acks=all. Which two actions should you take to ensure proper error handling? (Select two.)

- A. Use a callback argument in producer.send() where you check delivery status.
- B. Check that producer.send() returned a RecordMetadata object and is not null.
- C. Check the value of ProducerRecord.status().
- D. Surround the call of producer.send() with a try/catch block to catch KafkaException.

**Answer: A,D**

Explanation:

For proper delivery handling with acks=all:

- \* Use callback to log or act on success/failure.
- \* Use try/catch to handle synchronous exceptions like serialization errors or network failures.

From Kafka Producer Documentation:

"Errors can be caught either via the returned Future<RecordMetadata> or via the callback interface. For fatal errors, use a try/catch block around the send call." Option B is incorrect because send() returns a Future, not RecordMetadata directly.

Option D is invalid - ProducerRecord has no method called status().

Reference: Kafka Producer Error Handling and Callback APIs

#### NEW QUESTION # 134

Which actions will trigger partition rebalance for a consumer group? (select three)

- A. A consumer in a consumer group shuts down
- B. Add a new consumer to consumer group
- C. Increase partitions of a topic
- D. Remove a broker from the cluster

**Answer: A,B,C**

Explanation:

Add a broker to the cluster

Explanation:

Rebalance occurs when a new consumer is added, removed or consumer dies or partitions increased.

#### NEW QUESTION # 135

.....

The job with high pay requires they boost excellent working abilities and profound major knowledge. Passing the CCDAK exam can help you find the job you dream about, and we will provide the best CCDAK question torrent to the client. We are aimed that candidates can pass the exam easily. The study materials what we provide is to boost pass rate and hit rate, you only need little time to prepare and review, and then you can pass the CCDAK Exam. It costs you little time and energy, and you can download the software freely and try out the product before you buy it.
