## SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition, Sourcing and Procurement Sample Questions (Q77-Q82):

### NEW QUESTION # 77

Which of the following specifications are valid for review activities in Purchase Requisition Approval Workflow? Note: There are 2 correct answers to this question.

- A. Only one reviewer per workflow can be assigned
- B. Deadlines can be configured for reviewer tasks
- C. Assigned reviewer can reject or approve the workflow
- D. Reviewer receives notifications on the reviewer tasks

**Answer: B,D**

### NEW QUESTION # 78

Where do you find industry cloud solutions to address a customer's unique requirement?

- A. SAP Store
- B. SAP Signavio Process Navigator
- C. SAP Business Technology Platform
- D. SAP Discovery Center

**Answer: D**

Explanation:

To address a customer's unique requirements, industry cloud solutions can be found on the SAP Discovery Center, which serves as a repository for pre-built industry-specific solutions. Below is an explanation of the correct answer:

\* SAP Discovery Center (B): The SAP Discovery Center provides access to industry cloud solutions, accelerators, and best practices tailored to specific industries. It helps customers identify and implement solutions that meet their unique business needs.

\* SAP Store (A): The SAP Store offers third-party apps and extensions but does not focus specifically on industry cloud solutions.

\* SAP Business Technology Platform (C): The SAP Business Technology Platform supports integration and extensibility but does not host industry-specific solutions.

\* SAP Signavio Process Navigator (D): The SAP Signavio Process Navigator focuses on process modeling and documentation, not on finding industry cloud solutions.

### NEW QUESTION # 79

When do you specify the data retention period in the SAP S/4HANA Migration Cockpit?

- A. When the project status is "In Progress"
- B. When the project status is "Completed"
- C. When the project status is "Not Started"

- **D. When the project status is "Finished"**

**Answer: D**

Explanation:

In the SAP S/4HANA Migration Cockpit, the data retention period is specified when the project status is marked as "Finished." This ensures that all migration data is retained for a defined period after the migration project is completed, allowing for audits or troubleshooting if needed. Below is an explanation:

- \* When the project status is "Finished" (B): Once the migration project is completed and marked as "Finished," the system prompts you to define the data retention period. This step ensures compliance with data governance policies and allows for potential re-use of migration objects in future projects.
- \* When the project status is "Completed" (A): The "Completed" status typically indicates that the migration process has been executed but does not trigger the data retention configuration.
- \* When the project status is "In Progress" (C): During the "In Progress" phase, the focus is on uploading, validating, and migrating data, not on defining retention periods.
- \* When the project status is "Not Started" (D): At this stage, the migration project has not yet begun, so retention settings are irrelevant.

### NEW QUESTION # 80

Which activities can you complete in the Maintain Business Roles SAP Fiori app? Note: There are 2 correct answers to this question.

- **A. Assign business catalogs to a business role**
- B. Maintain technical catalogs
- C. Assign PFCG profiles to a business role
- **D. Maintain restrictions**

**Answer: A,D**

Explanation:

The Maintain Business Roles SAP Fiori app is used to manage business roles in SAP S/4HANA Cloud Public Edition. This app allows administrators to configure roles by assigning business catalogs and maintaining restrictions, ensuring that users have the appropriate access and permissions for their tasks.

- \* Maintain restrictions (Option C): Restrictions can be defined within business roles to limit access to specific data or functionalities. For example, you can restrict access to certain purchase requisitions based on organizational units or cost centers. The SAP S/4HANA Cloud Security Guide confirms that maintaining restrictions is a key activity in the Maintain Business Roles app.
- \* Assign business catalogs to a business role (Option D): Business catalogs are collections of SAP Fiori apps grouped by functionality. Assigning these catalogs to business roles ensures that users have access to the required applications. The SAP Fiori Apps Reference Library explicitly states that assigning business catalogs is a core function of the Maintain Business Roles app.
- \* A. Maintain technical catalogs: Technical catalogs are managed in the backend system and are not maintained directly in the Maintain Business Roles app. This activity is typically handled by system administrators using tools like SAP Cloud ALM.
- \* B. Assign PFCG profiles to a business role: In SAP S/4HANA Cloud Public Edition, PFCG (Profile Generator) profiles are not used because the system follows a role-based access control model. Instead, business roles and catalogs are used to manage access.
- \* SAP S/4HANA Cloud Security Guide: Explains how to maintain restrictions and assign business catalogs in the Maintain Business Roles app. <https://help.sap.com>
- \* SAP Fiori Apps Reference Library: Provides details about the Maintain Business Roles app and its functionalities.
- \* SAP S/4HANA Cloud Role-Based Access Control Guide: Describes the role-based security model and how business roles are configured.

Why Options C and D Are Correct: Why the Other Options Are Incorrect: Key References:

### NEW QUESTION # 81

Which document can you use as a reference while posting supplier invoices for lean services? Note: There are 2 correct answers to this question.

- A. Service Product Master Data
- **B. Service Purchase Order**

- Answer: B,D**
