The ITexamReview is committed to making the entire CompTIA DA0-002 exam preparation process instant and successful. To achieve these objectives the ITexamReview is offering real, valid, and updated CompTIA Data+ Exam (2025) (DA0-002) exam practice test questions in three high in demand formats. These formats are CompTIA DA0-002 PDF dumps files, desktop practice test software, and web-based practice test software.

We try our best to present you the most useful and efficient DA0-002 training materials about the test and provide multiple functions and intuitive methods to help the clients learn efficiently. Learning our DA0-002 useful test guide costs you little time and energy. The passing rate and hit rate are both high thus you will encounter few obstacles to pass the test. You can further understand our DA0-002 study practice guide after you read the introduction on our web.

Free PDF 2026 DA0-002: High-quality Useful CompTIA Data+ Exam (2025) Dumps

If our CompTIA Data+ Exam (2025) guide torrent can't help you pass the exam, we will refund you in full. If only the client provide the exam certificate and the scanning copy or the screenshot of the failure score of DA0-002 exam, we will refund the client

immediately. The procedure of refund is very simple. If the clients have any problems or doubts about our DA0-002 Exam Materials you can contact us by sending mails or contact us online and we will reply and solve the client's problems as quickly as we can.

CompTIA Data+ Exam (2025) Sample Questions (Q110-Q115):

NEW QUESTION # 110

Which of the following best represents a type of infrastructure that requires a company to purchase and maintain all of its own servers?

- A. Public
- **B. Private**
- C. Hybrid
- D. Cloud

Answer: B

Explanation:

This question pertains to the Data Concepts and Environments domain, focusing on types of server infrastructure. The task is to identify an infrastructure where a company owns and maintains all servers.

* Private (Option A): A private infrastructure (often on-premises) means the company owns and maintains its own servers, typically in a private data center, which matches the requirement.

* Cloud (Option B): Cloud infrastructure is managed by third-party providers, not owned by the company.

* Hybrid (Option C): Hybrid combines on-premises and cloud, so not all servers are owned by the company.

* Public (Option D): Public infrastructure is a cloud model shared across multiple organizations, not owned by the company.

The DA0-002 Data Concepts and Environments domain includes understanding "data environments," and a private infrastructure requires the company to purchase and maintain its own servers.

Reference: CompTIA Data+ DA0-002 Draft Exam Objectives, Domain 1.0 Data Concepts and Environments.

NEW QUESTION # 111

An analyst needs to create a collection of dashboards for multiple teams within their organization. Which of the following should the analyst do first before starting the project?

- A. Determine the number of team members who need to access the dashboards.
- B. Evaluate the KPIs for the dashboards.
- **C. Evaluate the user persona type for the dashboards.**
- D. Determine the delivery method of the dashboards.

Answer: C

Explanation:

This question pertains to the Visualization and Reporting domain, focusing on the initial steps in dashboard creation. The analyst is starting a project for multiple teams, so understanding the audience is critical.

* Evaluate the user persona type for the dashboards (Option A): User personas define the needs, roles, and preferences of the audience (e.g., executives vs. analysts), which is the first step to ensure the dashboards meet user requirements.

* Determine the number of team members who need to access the dashboards (Option B): This is important for access control but not the first step in design.

* Determine the delivery method of the dashboards (Option C): Delivery method (e.g., self-service) is decided later, after understanding user needs.

* Evaluate the KPIs for the dashboards (Option D): KPIs are defined after understanding the user personas and their goals.

The DA0-002 Visualization and Reporting domain emphasizes "translating business requirements to form the appropriate visualization," and evaluating user personas is the first step in this process.

NEW QUESTION # 112

A data analyst receives a flat file that includes dates. The analyst needs to calculate the number of days from the dates on the file to the current date. Which of the following is the best way to complete this task?

- A. Use date functions to analyze the data with no conversion.
- **B. Convert data to date format and use date functions.**

- C. Transform data to a numerical value and use mathematical functions.
- D. Validate the date format with logical functions and use date functions to analyze.

Answer: B

Explanation:

This question pertains to the Data Analysis domain, focusing on date calculations. The task is to calculate the difference between dates in a file and the current date, requiring proper date handling.

* Convert data to date format and use date functions (Option A): Flat files often store dates as strings (e.g., "2023-01-01"). Converting them to a date format (e.g., using Python's datetime or SQL's TO_DATE) allows the use of date functions (e.g., DATEDIFF) to calculate the difference to the current date, which is the best approach.

* Validate the date format with logical functions and use date functions to analyze (Option B): Validation is unnecessary if conversion handles format issues, making this overly complex.

* Use date functions to analyze the data with no conversion (Option C): Without converting to a date format, date functions may fail if the data is stored as strings.

* Transform data to a numerical value and use mathematical functions (Option D): This is inefficient and error-prone compared to using date functions.

The DA0-002 Data Analysis domain includes "applying the appropriate descriptive statistical methods," and converting to date format followed by date functions is the standard method for such calculations.

Reference: CompTIA Data+ DA0-002 Draft Exam Objectives, Domain 3.0 Data Analysis.

NEW QUESTION # 113

A data company needs a visualization that shows the availability zones from the last ten years and any future availability zones that the company will be using in the next five years. Which of the following is the most appropriate visualization to display this information?

- A. Bar chart
- B. Mosaic plot
- C. Pie chart
- **D. Map**

Answer: D

Explanation:

This question falls under the Visualization and Reporting domain of CompTIA Data+ DA0-002, focusing on selecting the appropriate visualization for a specific dataset. The task is to show availability zones over a 15-year period (past and future), which involves a geographical element since availability zones are typically location-based.

* Bar chart (Option A): Bar charts are good for comparing categorical data but don't effectively show geographical locations or time-based trends across zones.

* Mosaic plot (Option B): Mosaic plots display relationships between categorical variables, not suitable for geographical or time-series data.

* Map (Option C): A map can display availability zones geographically, with annotations or layers to show changes over time (past 10 years and future 5 years), making it the most appropriate visualization.

* Pie chart (Option D): Pie charts show proportions of a whole, not suitable for geographical or time-based data.

The DA0-002 Visualization and Reporting domain emphasizes "translating business requirements to form the appropriate visualization," and a map is the best choice for displaying geographical availability zones over time.

Reference: CompTIA Data+ DA0-002 Draft Exam Objectives, Domain 4.0 Visualization and Reporting.

NEW QUESTION # 114

A data analyst needs to identify outliers from a given dataset. Which of the following visualizations is the best way to identify outliers?

- A. Waterfall chart
- B. Gantt chart
- **C. Box plot**
- D. Scatter plot

Answer: C

Explanation:

This question falls under the Visualization and Reporting domain, focusing on selecting the appropriate visualization to identify outliers in a dataset.

* Box plot (Option A): A box plot displays the distribution of data, including the median, quartiles, and outliers (data points beyond the whiskers), making it the best choice for identifying outliers.

* Scatter plot (Option B): A scatter plot shows relationships between two variables, and while outliers may be visible, it's not specifically designed for outlier detection.

* Gantt chart (Option C): Gantt charts are for project scheduling, not suitable for outlier identification.

* Waterfall chart (Option D): Waterfall charts show cumulative changes (e.g., financial contributions), not designed for outlier detection.

The DA0-002 Visualization and Reporting domain emphasizes "translating business requirements to form the appropriate visualization," and a box plot is the standard visualization for identifying outliers.

Reference: CompTIA Data+ DA0-002 Draft Exam Objectives, Domain 4.0 Visualization and Reporting.

NEW QUESTION # 115

.....

This document of DA0-002 exam questions is very convenient. Furthermore, the CompTIA DA0-002 PDF questions collection is printable which enables you to study without any smart device. This can be helpful since many applicants prefer off-screen study. All these features of CompTIA DA0-002 Pdf Format are just to facilitate your preparation for the DA0-002 examination.
