Topic 5	<ul style="list-style-type: none">Public Cloud User and Role Management: This section of the exam measures the skills of SAP IT cloud Professionals and covers managing users and roles in public cloud environments for SAP applications.

SAP Certified Associate - Security Administrator Sample Questions (Q37-Q42):

NEW QUESTION # 37

What is the correct configuration setting in table PRGN_CUST for user assignments when transporting roles within a Central User Administration scenario?

- A. USER_REL_IMPORT = YES
- B. SET_IMP_LOCK_USERS = NOO
- C. SET_IMP_LOCK_USERS = YES
- D. USER_REL_IMPORT = NO**

Answer: D

NEW QUESTION # 38

In the administration console of the Cloud Identity Services, for which system type can you define both read and write transformations?

- A. Proxy systems
- B. Source systems
- C. Target systems**

Answer: C

Explanation:

InCloud Identity Services, write transformations allow customization of how data is written to a target system. Both read and write transformations can only be defined for Target Systems, as they involve sending processed data to external systems or applications.

SAP Security References:

* SAP Cloud Identity Services Transformation Guide

* SAP Target System Integration Documentation

NEW QUESTION # 39

Which entities share data with Business Partners in the S/4HANA Business User Concept? Note: There are 2 correct answers to this question.

- A. User
- B. Administrator
- C. Employee
- D. Employer

Answer: A,C

NEW QUESTION # 40

In SAP HANA Cloud, what can you configure in user groups? Note: There are 2 correct answers to this question.

- A. Authorization privileges
- B. Client connect restrictions
- C. Password policy settings
- D. Identity providers

Answer: B,C

Explanation:

In SAP HANA Cloud, user groups provide a mechanism to manage user settings collectively. Administrators can configure client connect restrictions within user groups to control which clients or applications can connect to the database, enhancing security by limiting access to authorized interfaces. Additionally, password policy settings can be defined for user groups, allowing administrators to enforce rules such as password length, complexity, or expiration periods, ensuring compliance with organizational security standards. Authorization privileges, however, are assigned directly to users or roles, not user groups, as groups in SAP HANA Cloud are not used for privilege management. Similarly, identity providers are configured at the system level, not within user groups, as they relate to authentication rather than group-specific settings. These capabilities enable efficient and secure user management in SAP HANA Cloud environments.

NEW QUESTION # 41

Which access categories are available to maintain restrictions in SAP S/4HANA Cloud Public Edition? Note: There are 3 correct answers to this question.

- A. Read (read access)
- B. Read, Value Help (read access)
- C. Write, Read (write access)
- D. Value Help (value help access)
- E. Write, Read, Value Help (write access)

Answer: A,B,D

Explanation:

* Context: Access categories in SAP S/4HANA Cloud Public Edition define the type of restrictions applied to business users' data access.

* Solution Explanation:

* A: "Read" allows view-only access.

* C: "Read, Value Help" includes read access and field-level help for specific data.

* D: "Value Help" restricts access to value-help fields.
