

# Quiz 2026 Updated Salesforce Mule-Dev-301 Test Practice

P.S. Free & New Mule-Dev-301 dumps are available on Google Drive shared by DumpsTests: [https://drive.google.com/open?id=1gYC\\_HFoDSkUrF6AnQxzQu6sNmQTHCcqB](https://drive.google.com/open?id=1gYC_HFoDSkUrF6AnQxzQu6sNmQTHCcqB)

Salesforce Certified MuleSoft Developer II (Mule-Dev-301) prep material there is. The 3 kinds of Salesforce Mule-Dev-301 preparation formats ensure that there are no lacking points in a student when he attempts the actual Mule-Dev-301 exam. The Salesforce Certified MuleSoft Developer II (Mule-Dev-301) exam registration fee varies between 100\$ and 1000\$, and a candidate cannot risk wasting his time and money, thus we ensure your success if you study from the updated Salesforce Mule-Dev-301 practice material. We offer the demo version of the actual Salesforce Certified MuleSoft Developer II (Mule-Dev-301) questions so that you may confirm the validity of the product before actually buying it, preventing any sort of regret.

It is inconceivable that DumpsTests Salesforce Mule-Dev-301 test dumps have 100% hit rate. The dumps cover all questions you will encounter in the actual exam. So, you just master the questions and answers in the dumps and it is easy to pass Mule-Dev-301 test. As one of the most important exam in Salesforce certification exam, the certificate of Salesforce Mule-Dev-301 will give you benefits. And you must not miss the opportunity to pass Mule-Dev-301 test successfully. If you fail in the exam, DumpsTests promises to give you FULL REFUND of your purchasing fees. In order to successfully pass the exam, hurry up to visit [DumpsTests.com](https://DumpsTests.com) to know more details.

## Mule-Dev-301 Reliable Test Pdf | Fresh Mule-Dev-301 Dumps

Salesforce certification will be a qualification assess standard for experienced workers, it is also a breakthrough for some workers who are in bottleneck. Mule-Dev-301 new test camp materials are a good helper. For most IT workers it also increases career chances. For companies one certification increases strong competitive power. Mule-Dev-301 New Test Camp materials will make you stand out from peers in this field applicable in all over the world.

## Salesforce Certified MuleSoft Developer II Sample Questions (Q12-Q17):

### NEW QUESTION # 12

Which configurations are required for HTTP Listener to enable mTLS authentication?

- A. Set an appropriate truststore configuration and reconnection strategy for the listener
- B. Set an appropriate reconnection strategy and use persistent connections for the listener
- **C. Set an appropriate keystore and truststore configuration for the listener**
- D. Set an appropriate keystore configuration and use persistent connections for the listener

**Answer: C**

Explanation:

To enable mTLS authentication for HTTP Listener, the developer needs to set an appropriate keystore and truststore configuration for the listener. The keystore contains the certificate and private key of the Mule application that are used to prove its identity to

clients. The truststore contains the certificates of trusted clients that are allowed to access the Mule application. Reference: <https://docs.mulesoft.com/mule-runtime/4.3/tls-configuration#mutual-authentication>

### NEW QUESTION # 13

Mule application A is deployed to CloudHub and is using Object Store v2. Mule application B is also deployed to CloudHub. Which approach can Mule application B use to remove values from Mule application A'S Object Store?

- **A. Object Store v2 REST API**
- B. CloudHub Connector
- C. Object Store Connector
- D. CloudHub REST API

**Answer: A**

Explanation:

To remove values from Mule application A's Object Store v2, Mule application B can use Object Store v2 REST API. This API allows performing operations on Object Store v2 resources using HTTP methods, such as GET, POST, PUT, and DELETE. Mule application B can use the DELETE method to remove values from Mule application A's Object Store v2 by specifying the object store ID and the key of the value to delete. Reference: <https://docs.mulesoft.com/object-store/osv2-apis>

### NEW QUESTION # 14

An API has been developed and deployed to CloudHub Among the policies applied to this API is an allowlist of IP addresses. A developer wants to run a test in Anypoint Studio and does not want any policies applied because their workstation is not included in the allowlist.

What must the developer do in order to run this test locally without the policies applied?

- A. Run the test as-s, with no changes because the Studio runtime will not attempt to connect to API Manager
- **B. Pass in the runtime parameter "-Danpow.platform.gatekeeper=disabled"**
- C. Create a properties file specifically for local development and set the API instance ID to a value that is not used in API Manager
- D. Deactivate the API in API Manager so the Autodiscovery element will not find the application when it runs in Studio

**Answer: B**

Explanation:

To run a test locally without the policies applied, the developer should create a properties file specifically for local development and set the API instance ID to a value that is not used in API Manager. This way, the developer can use different configuration properties for different environments and avoid triggering API autodiscovery when running tests locally. API autodiscovery is a mechanism that associates an API implementation with its corresponding API specification and policies in API Manager based on its API instance ID. By setting this ID to a value that does not exist in API Manager, the developer can prevent API autodiscovery from finding and applying any policies to the local test. Reference: <https://docs.mulesoft.com/api-manager/2.x/api-auto-discovery-new-concept#configuring-api-autodiscovery> <https://docs.mulesoft.com/mule-runtime/4.3/configuring-properties>

### NEW QUESTION # 15

An order processing system is composed of multiple Mule application responsible for warehouse, sales and shipping. Each application communication using Anypoint MQ. Each message must be correlated against the original order ID for observability and tracing.

How should a developer propagate the order ID as the correlation ID across each message?

- A. Use the default correlation ID, Anypoint MQ will automatically propagate it.
- B. Use the underlying HTTP request of Anypoint MQ to set the 'X-CORRELATION\_ID' header to the order ID
- C. Set a custom Anypoint MQ user property to propagate the order ID and set the correlation ID in the receiving applications.
- **D. Wrap all Anypoint MQ Publish operations within a With CorrelationID scope from the Tracing module, setting the correlation ID to the order ID**

**Answer: D**

Explanation:

To propagate the order ID as the correlation ID across each message using Anypoint MQ, the developer should wrap all Anypoint MQ Publish operations within a With CorrelationID scope from the Tracing module, setting the correlation ID to the order ID. The With CorrelationID scope allows setting a custom correlation ID for any event that occurs within it. The Tracing module also enables distributed tracing across different Mule applications and services using Anypoint Monitoring. Reference: <https://docs.mulesoft.com/tracing-module/1.0/tracing-module-reference#with-correlation-id-scope>  
<https://docs.mulesoft.com/tracing-module/1.0/tracing-module-concepts>

### NEW QUESTION # 16

A Mule application uses API autodiscovery to access and enforce policies for a RESTful implementation.

- A. Nothing because flowRef is an optional attribute which can be passed runtime
- B. Any of the APIKit generate implement flows
- C. The name of the flow that has APIKit Console to receive all incoming RESTful operation requests.
- **D. The name of the flow that has HTTP listener to receive all incoming RESTful operation requests**

**Answer: D**

Explanation:

To use API autodiscovery to access and enforce policies for a RESTful implementation, flowRef must be set to the name of the flow that has HTTP listener to receive all incoming RESTful operation requests. This way, API autodiscovery can identify the API implementation and associate it with the corresponding API specification and policies in API Manager. The flow that has HTTP listener is usually the main flow that contains the APIKit Router. Reference: <https://docs.mulesoft.com/api-manager/2.x/api-auto-discovery-new-concept#flowref>

### NEW QUESTION # 17

.....

You will also improve your time management abilities by using Mule-Dev-301 Practice Test software. You will not face any problems in the final Mule-Dev-301 exam. This is very important for your career. And this DumpsTests offers 365 days updates. The price is affordable. You can download it conveniently

**Mule-Dev-301 Reliable Test Pdf:** <https://www.dumpstests.com/Mule-Dev-301-latest-test-dumps.html>

Secondly, the prices for the Mule-Dev-301 learning prep are really favorable for every candidate, If you purchasing the Mule-Dev-301 study materials designed by many experts and professors from our company, we can promise that our online workers are going to serve you day and night during your learning period, I believe that you will pass Mule-Dev-301 exam test successfully.

Class A, B, and C define specific IP addresses of hosts, Besides, the app and the mobile site are pretty similar, Secondly, the prices for the Mule-Dev-301 learning prep are really favorable for every candidate.

## Ideal Salesforce Mule-Dev-301 Exam Dumps [Updated 2026] For Quick Success

If you purchasing the Mule-Dev-301 Study Materials designed by many experts and professors from our company, we can promise that our online workers are going to serve you day and night during your learning period.

I believe that you will pass Mule-Dev-301 exam test successfully, What you really need is our pass-sure Mule-Dev-301 training materials with methodical content and the experts have arranged Mule-Dev-301 Test Practice the content scientifically for you with most important points to practice and remember.

And if you pay enough attention Mule-Dev-301 to latest Salesforce Certified MuleSoft Developer II exam pdf, clear exam will be definite.
