

# 2026 100% Free 300-820–Authoritative 100% Free Latest Exam Registration | Implementing Cisco Collaboration Cloud and Edge Solutions Free Exam

P.S. Free 2026 Cisco 300-820 dumps are available on Google Drive shared by PrepAwayTest: <https://drive.google.com/open?id=1DieZBopCJmjb2LMDt1pIdgR24XCKF5a>

The PrepAwayTest is a leading platform that is committed to offering to make the Cisco Exam Questions preparation simple, smart, and successful. To achieve this objective PrepAwayTest has got the services of experienced and qualified Implementing Cisco Collaboration Cloud and Edge Solutions (300-820) exam trainers. They work together and put all their efforts and ensure the top standard of PrepAwayTest Implementing Cisco Collaboration Cloud and Edge Solutions (300-820) exam dumps all the time.

Candidates who pass the Cisco 300-820 exam will receive the Cisco Certified Specialist - Collaboration Cloud and Edge Implementation certification. Implementing Cisco Collaboration Cloud and Edge Solutions certification is a valuable asset for professionals who want to advance their careers in the field of collaboration and communication technologies. It demonstrates the candidate's expertise in implementing Cisco Collaboration Cloud and Edge Solutions and makes them stand out in the job market.

Cisco 300-820 certification exam is a comprehensive exam designed to assess a candidate's understanding of how to implement Cisco Collaboration Cloud and Edge Solutions. 300-820 exam focuses on the knowledge and skills required to implement and support Cisco Unified Communications Manager (CUCM), Cisco Expressway, and Cisco Webex Teams. Implementing Cisco Collaboration Cloud and Edge Solutions certification validates a candidate's understanding of the latest cloud and edge solutions offered by Cisco.

## Cisco 300-820 Domains to Nail

To attain a passing score in the Cisco 300-820 exam, the candidate must ace four exam domains and all the terms included in them. These exam objectives are as follows:

- **Remote Access & Mobile (25%)**

This part of the official exam is all about remote access as well as various mobile solutions. It consists of questions regarding the configuration of mobile and remote access solutions or MRA for short. This includes components such as DNS record types, certificates, traversal zones for unified communications & the configuration on Expressway, HTTP allow lists, and the SIP trunk profile for security on the Unified Communications Manager of Cisco. The applicant should also be capable of troubleshooting the MRA solutions along with all its components like Microsoft CA, IM&P, Unity Connection, and Expressways if to mention a few.

- **Technologies of WebEx (25%)**

The final sector of 300-820 CLCEI exam consists of the concepts and configuration of the WebEx technologies of Cisco. So, in the first place, the entrant needs to be capable of describing the media flows in addition to signaling in the Cisco WebEx Video Mesh execution. In addition to that, this section includes the configuration of WebEx Hybrid/Connector Services that comprise the calendar services like Office 365, message services such as IM&P prerequisites, user WebEx assignment directory services, and bandwidth, endpoint, and clustering video mesh. Here, the applicant also needs to consider all the deployment requirements of the aforementioned services. Finally, this domain details the concept of Jabber offered by Cisco for Cloud & Hybrid installations.

- **Key Concepts (25%)**

The first portion of the final exam includes the key concepts of the collaboration solutions. This way, the candidate is expected to have a thorough understanding of the NAT concept in regards to Collaboration environments. It is also essential for you to know about STUN, ICE, and TURN as well as their purpose. This domain also expects the entrant to have knowledge about the Expressway for the Media Traversal and protocol networking on it. These protocols include H.323 SIP, IPv6, and IPv4. Furthermore, the applicant should be capable of describing Expressway Licensing and its components such as the Option keys, Release key, and license consumptions. The concept of SIP media for the encryption mode, the core Expressway dial plan, and their components will as well be tested in this section. Finally, such a scope touches on various important settings for Expressway such as DNS, network interfaces, certificates, QoS, clustering, and firewall rules. Overall, within such a topic, you'll get to know more about such concepts like Force encrypted/unencrypted, best effort, pipes, links, zones, and auto.

- **Configurations of Initial Expressway (25%)**

The second domain for the Cisco 300-820 test deals with Expressway initial arrangements. In particular, it will ask the entrant to configure various settings for the expressway that include DNS, network interfaces, certificates, clustering, QoS, and networking firewall regulations. Furthermore, it also includes the configuration of the core Expressway dial plan components such as transforms, search rules, zones, regular expression, and pipes & links. The candidate should also be capable of configuring the Expressway series with the help of prevention measures of toll fraud without CPL custom scripts. Next, this section of the real exam also deals with configuring B2B solution collaboration components that include Microsoft DNS records, Microsoft CA, traversal zones, neighbor zones, transforms, search rules, and the SIP integration for trunks. At last, such an area discusses how to troubleshoot the B2B solution as well as its elements.

## **Fantastic 300-820 Exam Guide: Implementing Cisco Collaboration Cloud and Edge Solutions grants you high-efficient Training Dumps - PrepAwayTest**

We have always taken care to provide our customers with the very best. So we provide numerous benefits along with our Cisco 300-820 exam study material. We provide our customers with the demo version of the Cisco 300-820 Exam Questions to eradicate any doubts that may be in your mind regarding the validity and accuracy. You can test the product before you buy it.

### **Cisco Implementing Cisco Collaboration Cloud and Edge Solutions Sample Questions (Q95-Q100):**

#### **NEW QUESTION # 95**

Refer to the exhibit.

Refer to the exhibit. When a user tries to sign in to the Cisco Jabber client through Mobile and Remote Access, they receive this error message: "Cannot communicate with the server." The external DNS server is configured with the SRV records listed in the exhibit.

What is the cause of the issue?

- A. A Cisco CSF device must be configured in UC for the user and the `_cisco-uds` DNS record must be removed.
- B. The `_sips` DNS record must target `expE-pub.cll-collab.internal` and the `_cisco-uds` DNS record must be removed.
- C. The `collab-edge` DNS record must be added to the DNS server and the `_cisco-uds` DNS record must be removed.
- D. The HTTP allow list is not allowing communication with the Instant Message and Presence server.

**Answer: A**

#### **NEW QUESTION # 96**

During the deployment of a Cisco Webex Video Mesh, where do on-premises SIP endpoints send signaling?

- A. to the switching services
- B. to the cloud
- **C. to the call control environment (Unified CM or Expressway)**
- D. On-premises endpoints cannot participate in Cisco Webex Video Mesh

**Answer: C**

Explanation:

On-premises SIP endpoints send signaling to the call control environment (Unified CM or Expressway), which then sends it to the Video Mesh node. Media is sent to the transcoding service.

#### NEW QUESTION # 97

Refer to the exhibit.

A new neighbor zone is added for a new Cisco Meeting Server, but the zone is showing a SIP status of failed from the time the zone it was created. What should be done to resolve this issue?

- A. The existing zone using ID 7 must be deleted
- B. The underlying DNS issue must be resolved
- C. More bandwidth must be added to the appropriate pipes
- **D. The search rule must be changed to continue on match**

**Answer: D**

#### NEW QUESTION # 98

Which SIP media encryption mode is applied by default for newly created zones in the Cisco Expressway?

- A. Best Effort
- B. Off
- C. Force Encrypted
- **D. Auto**

**Answer: D**

#### NEW QUESTION # 99

Refer to the exhibit.

Refer to the exhibit. When users sign in to Cisco Jabber through Mobile and Remote Access, they cannot see their own photo or the photo of their contacts next to each name. Which action must be taken in Cisco Expressway-C to resolve the issue?

- A. Add an allow call policy rule from the Cisco UCM traversal zone.
- **B. Add an HTTP allow list for the web server that contains the photos.**
- C. Add an HTTP allow list for the Instant Message and Presence server.
- D. Upload the missing Instant Messaging and Presence server certificate to fix the connection to its server.

**Answer: B**

#### NEW QUESTION # 100

.....

Our company is your ally in achieving your targeted certification, providing you easy and interactive 300-820 exam braindumps. You can totally count on us as we are good at help you get the success on your coming exam. We will always stand by your on your way for the certification as we work as 24/7 online. If you have any question, you can find help from us on the 300-820 Study Guide. And our 300-820 learning questions are well-written to be understood by the customers all over the world.
