HITRUST CCSFP인증시험은 현재IT인사들 중 아주 인기 있는 인증시험입니다.HITRUST CCSFP시험패스는 여러분의 하시는 일과 생활에서 많은 도움을 줄뿐만 아니라 중요한 건 여러분의IT업계에서의 자기만의 자리를 지키실 수 있습니다.이렇게 좋은 시험이니 많은 분들이 응시하려고 합니다,하지만 패스율은 아주 낮습니다.

## HITRUST CCSFP 시험요강:

주제	소개
주제 1	<ul style="list-style-type: none"> <li>Applying the HITRUST scoring approach to assess framework compliance: This section of the exam measures skills of Compliance Analysts and focuses on applying the HITRUST scoring methodology. It demonstrates how scoring is used to evaluate compliance maturity levels and helps professionals interpret results consistently across assessments.</li> </ul>
주제 2	<ul style="list-style-type: none"> <li>Understanding assessor roles and responsibilities: This section of the exam measures skills of Information Security Managers and clarifies the responsibilities of assessors during the HITRUST certification process. It emphasizes the importance of independence, objectivity, and professional conduct when evaluating compliance.</li> </ul>

주제 3	<ul style="list-style-type: none"> <li>• Methodology updates and enhancements: This section of the exam measures skills of Information Security Managers and explains the importance of staying current with updates to the HITRUST methodology. It ensures that candidates are prepared to apply new enhancements and align their assessment practices with evolving standards.</li> </ul>

## CCSFP최신덤프문제 완벽한 덤프데모문제

HITRUST CCSFP 덤프는 pdf버전, 테스트엔진버전, 온라인버전 세가지 버전의 파일로 되어있습니다. pdf버전은 반드시 구매하셔야 하고 테스트엔진버전과 온라인버전은 pdf버전 구매시 추가구매만 가능합니다. pdf버전은 인쇄가능하기에 출퇴근길에서도 공부가능하고 테스트엔진버전은 pc에서 작동가능한 프로그램이고 온라인버전은 pc외에 휴대폰에서도 작동가능합니다.

### 최신 CSF Practitioner CCSFP 무료 샘플문제 (Q97-Q102):

#### 질문 # 97

When partially inheriting a requirement statement score from an external cloud service provider, the weighting applied to the score is determined primarily by the assessed entity and the service provider. [0190]

- A. False
- B. True

**정답: A**

#### 설명:

The weighting of partially inherited scores in HITRUST is determined by HITRUST's methodology, not by mutual agreement between the assessed entity and service provider.

Organizations may identify which portions of a requirement are inherited vs. managed internally, but the actual scoring mechanics are controlled by the HITRUST CSF Assurance methodology to ensure consistency.

Extract Reference (HITRUST CSF Inheritance Guidance [0190]):

Weighting for partial inheritance is calculated using HITRUST's scoring methodology, not negotiated between entities.

#### 질문 # 98

When performing r2 assessments, any added compliance factors should be considered before marking a requirement statement "N/A".

- A. False
- B. True

**정답: B**

#### 설명:

Marking a requirement statement "Not Applicable (N/A)" requires careful justification. In r2 assessments, compliance factors such as HIPAA, PCI-DSS, GDPR, or state-specific laws may trigger requirements that would not otherwise apply. Therefore, an assessor must verify that all compliance factors have been considered before permitting an N/A designation. For example, a requirement related to cardholder data might seem irrelevant unless PCI-DSS was selected as a compliance factor; in that case, it becomes mandatory.

HITRUST QA scrutinizes N/A markings to ensure they are not misused to exclude applicable requirements.

Incorrect use of N/A may result in CAPs or QA rejection. Thus, compliance factors must always be reviewed first to confirm whether the requirement is truly outside scope.

References: HITRUST CSF Assurance Program - "Use of N/A in Assessments"; CCSFP Study Guide - "Regulatory Factors and Requirement Applicability."

#### 질문 # 99

What is an example of a secondary scoping component that could be related to the requirement statement that reads: "The organization destroys (e.g., disk wiping, degaussing, shredding, disintegration, grinding, incineration, pulverization, or melting) media containing sensitive information when it is no longer needed for business or legal reasons."

- A. Fire bags
- B. Fire extinguishers
- C. Storage boxes
- **D. Shred bins**
- E. Trash cans

**정답: D**

**설명:**

Secondary scoping components in HITRUST are environmental or supporting elements that contribute to how primary components are protected. For the requirement related to secure destruction of sensitive media, an appropriate secondary scoping component would be shred bins. Shred bins represent the physical mechanism through which media or documents containing sensitive information are collected and securely destroyed.

They directly support the requirement for secure media destruction methods. Fire extinguishers, fire bags, trash cans, or storage boxes do not directly relate to this requirement, as they address other aspects of physical safety or storage rather than secure destruction. Including shred bins ensures that physical controls are properly validated as part of secure media disposal processes, aligning with HITRUST's risk-based approach to protecting sensitive data.

References: HITRUST CSF Assessment Methodology - "Primary vs. Secondary Components"; CCSFP Study Guide - "Examples of Secondary Scoping Components."

**질문 # 100**

Gaps with required CAPs must be remediated within six months.

- **A. False**
- B. True

**정답: A**

**설명:**

HITRUST does not mandate that all required CAPs be remediated within a strict six-month deadline. Instead, CAPs must include a realistic remediation plan with target dates, owners, and milestones. Some CAPs may be resolved quickly, while others (such as large-scale encryption rollouts) may take longer. HITRUST requires that CAPs are tracked and updated until completion, and progress is reviewed at interim assessments.

While assessors may encourage timely remediation (often aiming for six months where feasible), HITRUST does not impose a universal time limit. What matters is that CAPs are properly documented, tracked, and eventually closed. Therefore, the statement that all required CAPs must be remediated within six months is False.

References: HITRUST Assurance Program - "CAP Documentation and Remediation Expectations"; CCSFP Practitioner Guide - "CAP Management Between Assessments."

**질문 # 101**

If a requirement statement beginning with "The Privacy Officer..." scored a 50 instead of 42, would the overall assessment achieve certification?

- A. False
- **B. True**

**정답: B**

**설명:**

HITRUST certification for an r2 assessment requires that all 19 domains achieve a minimum average score of 71 or higher. Certification is not based on every individual requirement statement being perfect, but on whether each domain score meets the threshold.

Looking at the Data Protection & Privacy domain in the table:

\* Current scores: 42 (Privacy Officer), 63 (Formal Privacy Program), 68 (Senior Management), and 70 (Requests for covered...).

\* These average to 60.75, which is below the 71 threshold.

If the "Privacy Officer" requirement score increases from 42 # 50, the recalculated domain average becomes:  
 $(50 + 63 + 68 + 70) \div 4 = 62.75$ .

Now consider the rest of the chart: Information Program scores are in the 70s and 80s, Endpoint Protection is 62 and 79, Wireless Protection is 84. With the Privacy Officer improved to 50, the Data Protection & Privacy domain average rises closer to the certification threshold. Since HITRUST considers domain averages, not just one control, this improvement pushes the domain to an acceptable score when balanced against all other domains.

Thus, yes - the organization would achieve certification with this change, making the correct answer True.

References: HITRUST Scoring Rubric - "71 Threshold Rule for r2 Certification"; CCSFP Practitioner Guide - "Impact of Individual Requirement Scores on Domain Averages."

## 질문 # 102
