

# 3V0-23.25 High Quality & 3V0-23.25 Reliable Source

Usually you may take months to review a professional exam, but with 3V0-23.25 exam guide, you only need to spend 20-30 hours to review before the exam, and with our 3V0-23.25 study materials, you will no longer need any other review materials, because our learning dumps have already included all the important test points. At the same time, 3V0-23.25 Practice Engine will give you a brand-new learning method to review - let you master the knowledge in the course of the doing exercise.

3V0-23.25 is the authentic study guides with the latest exam material which can help you solve all the difficulties in the actual test. Our 3V0-23.25 free demo is available for all of you. You will receive an email attached with the 3V0-23.25 training dumps within 5-10 minutes after completing purchase. Immediately download for the 3V0-23.25 study pdf is available for study with no time wasted. We have money refund policy to ensure your interest in case the failure of 3V0-23.25 actual test.

## 3V0-23.25 Reliable Source | 3V0-23.25 Hot Questions

VMware 3V0-23.25 exam dumps are important because they show you where you stand. After learning everything related to the Advanced VMware Cloud Foundation 9.0 Storage (3V0-23.25) certification, it is the right time to take a self-test and check whether you can clear the Advanced VMware Cloud Foundation 9.0 Storage (3V0-23.25) certification exam or not. People who score well on the Advanced VMware Cloud Foundation 9.0 Storage (3V0-23.25) practice questions are ready to give the final Advanced VMware Cloud Foundation 9.0 Storage (3V0-23.25) exam

## VMware Advanced VMware Cloud Foundation 9.0 Storage Sample Questions (Q51-Q56):

### NEW QUESTION # 51

A Storage Administrator attempts to reboot a host (esx-07) in an encrypted vSAN cluster for maintenance. The host fails to rejoin the cluster after rebooting.

The administrator checks the local CLI on esx-07.

...

```
[root@esx-07:~] vim-cmd hostsvc/storage/fs_info
Datastore: vsanDatastore (INACCESSIBLE)
[root@esx-07:~] esxcli vsan encryption info get
Key Encryption Key (KEK) Status: NOT LOADED
KMS Connection Status: FAILED (Cert Invalid)
...
```

Based on the vim-cmd and esxcli outputs, what specific failure in the trust chain is preventing the host from mounting the vSAN datastore?

- A. The ESXi host's local SSL certificate used for the KMIP connection to the KMS is invalid or expired, preventing the host from directly pulling the KEK from the KMS server.
- B. The vCenter Server certificate has expired, blocking the host from downloading the Key Encryption Key (KEK) needed to unlock the physical drives.
- C. The host's CPU lacks the AES-NI instruction set required to process the encryption key.

- D. The local Disk Encryption Key (DEK) was securely erased during the reboot, requiring a Deep Rekey.

**Answer: B**

**NEW QUESTION # 52**

An administrator is responsible for a VMware Cloud Foundation (VCF) Private Cloud and has been tasked with identifying which storage model is supported in the different VCF Workload Domains.

Drag and drop the Support Status of each storage model on the left to each type of Workload Domain on the right.

**Answer:**

**Explanation:**

**Explanation:**

Storage Model	Management WLD Default Cluster	Management WLD Additional Clusters	Virtual Infrastructure WLD
vSAN ESA	Principal	Principal	Principal
vSAN Storage Cluster	Not Supported	Principal	Principal
NFS v3	Both	Both	Both
iSCSI	Supplemental	Supplemental	Supplemental

The support status is based on the VCF 9.0 Principal and Supplemental Storage model. vSAN ESA is supported as principal storage for the Management Domain default cluster, Management Domain additional clusters, and Virtual Infrastructure Workload Domains. A vSAN Storage Cluster is not supported for the Management Domain default cluster, but it is supported as principal storage for Management Domain additional clusters and VI Workload Domains. NFS storage supports principal and supplemental usage when the protocol is NFS v3; the table states "Principal (NFS v3)" and "Supplemental (NFSv3 and NFSv4.1)" across all three domain categories, so NFS v3 maps to Both. iSCSI is supported only as supplemental storage across the Management Domain default cluster, Management Domain additional clusters, and VI Workload Domains. This follows the VCF distinction where principal storage is used during workload domain or cluster creation, while supplemental storage is added after creation for workloads or data-at-rest use cases such as templates, backups, and ISO images. Reference topics: Storage Models, Principal Storage, Supplemental Storage, vSAN ESA, vSAN Storage Cluster, NFS, iSCSI.

**NEW QUESTION # 53**

An Operations Engineer is preparing to convert a standard 4-node VI Workload Domain cluster into a vSAN Stretched Cluster using the SDDC Manager automated workflow.

...

[SDDC Manager - Stretch Cluster Wizard]  
Source Cluster: WLD01-Cluster01 (4 Hosts)  
Target Expansion: Add 4 Hosts to Site B.

...

What is a mandatory procedural prerequisite that the engineer must complete *before* SDDC Manager allows the "Stretch Cluster" workflow to successfully execute?

- A. The engineer must migrate all running virtual machines off the target datastore to a temporary NFS share.
- B. The engineer must temporarily disable the vSphere High Availability (HA) service on the source cluster to prevent split-brain during the expansion.
- C. The engineer must convert the cluster's default storage policy to FTT=0 (No redundancy) to free up the operations reserve.
- **D. The engineer must manually deploy and configure the vSAN Witness Appliance in the Management Domain (or third site) and peer it to the vCenter Server.**

**Answer: D**

#### NEW QUESTION # 54

A VCF Deployment Specialist is integrating a pre-existing 100 TB NFS v3 NAS array into a new VI Workload Domain via the SDDC Manager API.

The specialist prepares the JSON payload for the cluster creation.

...

```
# SDDC Manager API Payload (NFS Supplemental Storage)
```

```
{  
  "clusterName": "Legacy-NAS-Cluster",  
  "datastoreSpec": {  
    "datastoreType": "NFS",  
    "nfsSpec": {  
      "serverName": "192.168.100.50",  
      "shareName": "/vol/archive_data",  
      "readOnly": false  
    }  
  },  
  "hostSpecs": [ ... ]  
}
```

...

Which statement accurately defines the operational role and limitation of this NFS datastore within the VCF automated lifecycle?

- A. The NFS v3 protocol utilized here provides native, array-backed object encryption which SDDC Manager adopts into the KMS cluster.
- B. SDDC Manager automatically configures Storage I/O Control (SIOC) on the NFS mount to ensure it does not saturate the 10GbE network.
- **C. The NFS datastore acts strictly as "Supplemental Storage" in VCF; it cannot be used to host the Management Domain vCenter Server or NSX Controllers, which require a principal storage standard like vSAN or FC/vVols.**
- D. VCF will install the vsan-mgmt agent onto the external NAS operating system to include it in the vLCM patching routines.

**Answer: C**

#### NEW QUESTION # 55

A CTO is evaluating storage options for a VCF 9.0 Workload Domain that will host a massive 2 Petabyte medical imaging archive. The applications accessing this archive require minimal compute resources (e.g., just four standard 16-vCPU web servers).

...

[Customer Requirement]  
Capacity: 2,000 TB (2 PB)  
Compute: 64 vCPU total (Peak)

Cost Constraint: Minimize software licensing CapEx.

Which statement justifies the selection of an external SAN/NAS solution over a pure vSAN ESA HCI cluster for this specific use case?

- A. An external NAS can host the 2 PB archive while connected to a small 3-node ESXi cluster, whereas vSAN HCI would force the purchase of 20+ fully licensed "compute-heavy" vSAN ReadyNodes just to acquire the physical drive bays.
- B. Medical imaging requires object-based metadata, which traditional NFS NAS systems provide natively, whereas vSAN strictly provides block-only VMDK storage.
- C. VCF explicitly prohibits using vSAN for HIPAA-regulated medical workloads, forcing customers to use external arrays with physical tape backup integration.
- D. vSAN ESA has a hard cluster limit of 1 Petabyte of raw capacity, making it technically impossible to host this medical archive.

**Answer: A**

## NEW QUESTION # 56

We always strictly claim for our 3V0-23.25 study materials must be the latest version, to keep our study materials up to date, we constantly review and revise them to be at par with the latest VMware syllabus for 3V0-23.25 exam. This feature has been enjoyed by over 80,000 takes whose choose our study materials. The one who choose our study materials that consider our website as the top preparation material seller for 3V0-23.25 Study Materials, and inevitable to carry all candidates the finest knowledge on exam syllabus contents. Not only that, we will provide you a free update service within one year from the date of purchase, in order to keep up the changes in the exam so that every candidates who purchase our 3V0-23.25 study materials can pass the exam one time.

**3V0-23.25 Reliable Source:** <https://www.topexamcollection.com/3V0-23.25-vce-collection.html>

When you try our part of VMware certification 3V0-23.25 exam practice questions and answers, you can make a choice to our TopExamCollection, VMware 3V0-23.25 High Quality Many candidates won't have confidence to get it, The concentration is the essence, thus you can finish practicing all of the contents in our Professional Level Exams 3V0-23.25 vce training material within only 20 to 30 hours, As one of influential IT companies, 3V0-23.25 attracts to plenty of young people to struggle for 3V0-23.25 certification.

If you build websites for a living, you need to know how to 3V0-23.25 create great mobile sites, Backup jobs entail choosing the following: Which virtual machines will be backed up.

When you try our part of VMware certification 3V0-23.25 exam practice questions and answers, you can make a choice to our TopExamCollection, Many candidates won't have confidence to get it.

## Free PDF 3V0-23.25 High Quality | Latest VMware 3V0-23.25 Reliable Source: Advanced VMware Cloud Foundation 9.0 Storage

The concentration is the essence, thus you can finish practicing all of the contents in our Professional Level Exams 3V0-23.25 vce training material within only 20 to 30 hours.

As one of influential IT companies, 3V0-23.25 attracts to plenty of young people to struggle for 3V0-23.25 certification, We are the best company engaging 3V0-23.25 preparation labs as we put much on exam information channel and professional editing experts every years so that most on-sale 3V0-23.25 exam prep files are high-quality and we can guarantee that you will get through test exams 100% if you pay much attention to our 3V0-23.25 preparation labs.
