You will find that the update of C-SIGDA-2403 learning quiz is very fast. You don't have to buy all sorts of information in order to learn more. C-SIGDA-2403 training materials can meet all your needs. What are you waiting for? Just rush to buy them!

SAP Certified Associate - Process Data Analyst - SAP Signavio Sample Questions (Q19-Q24):

NEW QUESTION # 19
What does the strategic level focus on in Business Process Management?

- A. Define responsibilities in business processes.
- B. Run business tasks efficiently.
- C. Support business processes with the right systems.
- D. Align business processes to company goals.

Answer: D

Explanation:
At the strategic level, Business Process Management (BPM) focuses on aligning business processes with company goals. This alignment is essential for ensuring that all business activities contribute effectively towards achieving the overarching objectives and strategic vision of the organization. By aligning processes with company goals, organizations can ensure that their operations are strategically oriented, resource allocation is optimized, and every process improvement initiative contributes to the long-term success of the business. This strategic focus is distinct from operational concerns such as supporting processes with the right systems, defining responsibilities, or running tasks efficiently, which are more tactical or operational in nature.References:BPM Theory and Best Practices

NEW QUESTION # 20
How does the Event-based Gateway work?

- A. A token is created for each connected event.
- B. The token waits for the first occurring event.
- C. The token waits for all connected events.
- D. The token waits for all events happening at the same time.

Answer: B

Explanation:
The Event-based Gateway in BPMN works by waiting for the first occurring event among the connected events. Once one of the connected events happens, the process flow continues based on the path of that event, and other paths are disregarded. This mechanism is used in process modeling to specify that a decision in the process flow will be made based on the occurrence of events, rather than the evaluation of expressions. The Event-based Gateway is particularly useful in scenarios where the flow of a process depends on external events, and the process needs to be flexible enough to handle whichever event occurs first.References:BPMN 2.0 specification.

NEW QUESTION # 21
What are the typical roles required in Process Mining projects?Note: There are 3 correct answ-ers to this que-stion.

Answer:

Explanation:

A.B.E

NEW QUESTION # 22

What are some possible configurations for a task created in SAP Signavio Process Governance?Note: There are 3correct answers to this question.

- A. Assign it to dictionary categories.
- B. Store attributes.
- C. Set a due date.
- D. Add subtasks.
- E. Assign it to a specific user.

Answer: C,D,E

Explanation:
In SAP Signavio Process Governance, tasks can be configured with specific settings to enhance management and tracking. Key configurations include assigning tasks to a specific user, setting a due date to ensure timely completion, and adding subtasks to break down the main task into more manageable components. These configurations help in detailed task management and accountability in process governance.

NEW QUESTION # 23

What are some key topics of the SAP Signavio Process Manager?Note: There are 3 correct answ-ers to this que-stion.

- A. Process Documentation
- B. Feedback Handling
- C. Process Publishing
- D. Process Data Analysis
- E. Process Automation

Answer: A,B,C

NEW QUESTION # 24

......
