IAPP AIGP Exam Questions With Free Updates At 30% Discount
To pass the IAPP AIGP exam on the first try, candidates need IAPP Certified Artificial Intelligence Governance Professional updated practice material. Preparing with real AIGP exam questions is one of the finest strategies for cracking the exam in one go. Students who study with IAPP AIGP Real Questions are more prepared for the exam, increasing their chances of succeeding. Finding original and latest AIGP exam questions however, is a difficult process. Candidates require assistance finding the AIGP updated questions.

To creat the most popular AIGP exam questions in the market, we have been working hard on the compiling the content and design the displays. And our professional experts have been studying and doing reseach on the AIGP study materials for a long time. These experts spent a lot of time before the AIGP Study Materials officially met with everyone. They spent a lot of time to collate data and carefully studied the characteristics of the stocks to make sure every detail is perfect.

Valid AIGP Test Pattern | AIGP Questions Answers

This format enables you to assess your AIGP test preparation with a AIGP practice exam. You can also customize your time and the kinds of questions of the IAPP AIGP Practice Test. This IAPP Certified Artificial Intelligence Governance Professional AIGP practice test imitates the IAPP AIGP real exam pattern. Thus, it helps you kill IAPP Certified Artificial Intelligence Governance Professional exam anxiety.

IAPP AIGP Exam Syllabus Topics:

Topic	Details

Topic 1	• Understanding How to Govern AI Development: This section of the exam measures the skills of AI project managers and covers the governance responsibilities involved in designing, building, training, testing, and maintaining AI models. It emphasizes defining the business context, performing impact assessments, applying relevant laws and best practices, and managing risks during model development. The domain also includes establishing data governance for training and testing, ensuring data quality and provenance, and documenting processes for compliance. Additionally, it focuses on preparing models for release, continuous monitoring, maintenance, incident management, and transparent disclosures to stakeholders.
Topic 2	• Understanding How Laws, Standards, and Frameworks Apply to AI: This section of the exam measures skills of compliance officers and covers the application of existing and emerging legal requirements to AI systems. It explores how data privacy laws, intellectual property, non-discrimination, consumer protection, and product liability laws impact AI. The domain also examines the main elements of the EU AI Act, such as risk classification and requirements for different AI risk levels, as well as enforcement mechanisms. Furthermore, it addresses the key industry standards and frameworks, including OECD principles, NIST AI Risk Management Framework, and ISO AI standards, guiding organizations in trustworthy and compliant AI implementation.
Topic 3	• Understanding How to Govern AI Deployment and Use: This section of the exam measures skills of technology deployment leads and covers the responsibilities associated with selecting, deploying, and using AI models in a responsible manner. It includes evaluating key factors and risks before deployment, understanding different model types and deployment options, and ensuring ongoing monitoring and maintenance. The domain applies to both proprietary and third-party AI models, emphasizing the importance of transparency, ethical considerations, and continuous oversight throughout the model's operational life.
Topic 4	• Understanding the Foundations of AI Governance: This section of the exam measures skills of AI governance professionals and covers the core concepts of AI governance, including what AI is, why governance is needed, and the risks and unique characteristics associated with AI. It also addresses the establishment and communication of organizational expectations for AI governance, such as defining roles, fostering cross-functional collaboration, and delivering training on AI strategies. Additionally, it focuses on developing policies and procedures that ensure oversight and accountability throughout the AI lifecycle, including managing third-party risks and updating privacy and security practices.

IAPP Certified Artificial Intelligence Governance Professional Sample Questions (Q172-Q177):

NEW QUESTION # 172
The White House Executive Order from November 2023 requires companies that develop dual-use foundation models to provide reports to the federal government about all of the following EXCEPT?

- A. Any environmental impact study for each dual-use foundation model.
- B. The physical and cybersecurity protection measures of their dual-use foundation models.
- C. Any current training or development of dual-use foundation models.
- D. The results of red-team testing of each dual-use foundation model.

Answer: A

Explanation:
The White House Executive Order from November 2023 requires companies developing dual-use foundation models to report on their current training or development activities, the results of red-team testing, and the physical and cybersecurity protection measures. However, it does not mandate reports on environmental impact studies for each dual-use foundation model. While environmental considerations are important, they are not specified in this context as a reporting requirement under this Executive Order.
Reference: AIGP BODY OF KNOWLEDGE, sections on compliance and reporting requirements, and the White House Executive Order of November 2023.

NEW QUESTION # 173

When monitoring the functional performance of a model that has been deployed into production, all of the following are concerns EXCEPT:

- A. System cost.
- B. Data loss.
- C. Model drift.
- D. Feature drift.

Answer: A

Explanation:
System cost is an operational concern but not directly related to the functional performance of the deployed model, unlike feature drift, model drift, and data loss.

NEW QUESTION # 174
All of the following are required for high-risk AI systems under the EU AI Act EXCEPT?

- A. Conducting a conformity assessment.
- B. Conducting post-market monitoring.
- C. Retaining system-generated logs for at least six months.
- D. Publishing a detailed report on the training data used.

Answer: D

Explanation:
The EU AI Act imposes several mandatory obligations on high-risk AI systems, but publishing a detailed report on training data is not one of them.
From the AI Governance in Practice Report 2024:
"It mandates drawing up technical documentation for high-risk AI systems, and requires high-risk AI systems to come with instructions for use that disclose various information, including characteristics, capabilities and performance limitations." (p. 34)
"To make high-risk AI systems more traceable, it also requires AI systems to be able to automatically allow for the maintenance of logs throughout the AI life cycle."
"Conducting post-market monitoring" and "conformity assessments" are explicit requirements for high-risk systems. (p. 34-35)
However, publishing detailed training data is typically required only for general-purpose AI systems with systemic risk, not standard high-risk AI systems.
* A. Log retention, B. Post-market monitoring, and C. Conformity assessments are all required under the EU AI Act for high-risk systems.

NEW QUESTION # 175
A company has developed a proprietary AI model that analyzes consumer online behavior and predicts what prices consumers would be willing to pay for certain products, so that retailers may modify pricing accordingly. To test the model, the company has:
- Performed an impact assessment.
- Conducted repeatability tests.
- Exposed the model to edge cases and potential malicious input.
- Conducted adversarial testing to ID security threats.
- Assessed and mitigated discrimination risks.
Which additional responsible AI principle has the company failed to assess?

- A. Transparency.
- B. Data Integrity.
- C. Fairness.
- D. Robustness.

Answer: A

Explanation:
While the company addressed security, fairness, and robustness through testing and risk assessment, transparency, ensuring stakeholders understand how the model makes decisions, has not been explicitly assessed.

NEW QUESTION # 176

CASE STUDY

A premier payroll services company that employs thousands of people globally, is embarking on a new hiring campaign and wants to implement policies and procedures to identify and retain the best talent. The new talent will help the company's product team expand its payroll offerings to companies in the healthcare and transportation sectors, including in Asia.

It has become time consuming and expensive for HR to review all resumes, and they are concerned that human reviewers might be susceptible to bias.

To address these concerns, the company is considering using a third-party AI tool to screen resumes and assist with hiring. They have been talking to several vendors about possibly obtaining a third-party AI-enabled hiring solution, as long as it would achieve its goals and comply with all applicable laws.

The organization has a large procurement team that is responsible for the contracting of technology solutions.

One of the procurement team's goals is to reduce costs, and it often prefers lower-cost solutions. Others within the company deploy technology solutions into the organization's operations in a responsible, cost-effective manner.

The organization is aware of the risks presented by AI hiring tools and wants to mitigate them. It also questions how best to organize and train its existing personnel to use the AI hiring tool responsibly. Their concerns are heightened by the fact that relevant laws vary across jurisdictions and continue to change.

The organization continues planning the adoption of an AI tool to support hiring, but is concerned about potential bias in content generated by AI systems and how that could affect public perception.

Which of the following measures should the company adopt to best mitigate its risk of reputational harm from using the AI tool?

- A. Ensure the vendor provides indemnification for the AI tool
- B. Continue to require the company's hiring personnel to manually screen all applicants
- C. Test the AI tool pre- and post-deployment
- D. Require the procurement and deployment teams to agree upon the AI tool

Answer: C

Explanation:

Note:This is the same scenario and question as Question 21 and thus has the same correct answer: A. It's possible this was duplicated in your original input.

Repeated for clarity:

"Testing AI tools pre- and post-deployment helps ensure they perform as expected and do not introduce bias, privacy issues, or fairness concerns. This mitigates reputational and legal risk." The AI Governance in Practice Report 2025 further reinforces: "Ongoing monitoring and testing post-deployment allows organizations to catch and correct unintended impacts... especially important in HR and hiring contexts."
