Will DumpsValid SPLK-1003 Practice Questions help You to Pass the certification exam?

There are lots of benefits of obtaining a certificate, it can help you enter a better company, have a high position in the company, improve you wages etc. Our SPLK-1003 test materials will help you get the certificate successfully. We have channel to obtain the latest information about the exam, and we ensure you that you can get the latest information about the SPLK-1003 Exam Dumps timely. Furthermore, you can get the downloading link and password for SPLK-1003 test materials within ten minutes after purchasing.

Splunk Enterprise Certified Admin Sample Questions (Q138-Q143):

NEW QUESTION # 138
The universal forwarder has which capabilities when sending data? (select all that apply)

- A. Sending alerts
- B. Compressing data
- C. Obfuscating/hiding data

- D. Indexer acknowledgement

Answer: B,D

Explanation:
https://docs.splunk.com/Documentation/Splunk/8.0.1/Forwarding/Aboutforwardingandreceivingdata

NEW QUESTION # 139
How is data handled by Splunk during the input phase of the data ingestion process?

- A. Data is treated as streams.
- B. Data is broken up into events.
- C. Data is initially written to disk.
- D. Data is measured by the license meter.

Answer: A

Explanation:
https://docs.splunk.com/Documentation/Splunk/8.0.5/Deploy/Datapipeline
"In the input segment, Splunk software consumes data. It acquires the raw data stream from its source, breaks in into 64K blocks, and annotates each block with some metadata keys."

NEW QUESTION # 140
What is the correct order of steps in Duo Multifactor Authentication?

- A. 1 Request Login
  2. Connect to SAML server
  3 Duo MFA
  4 Create User session
  5 Authentication Granted 6. Log into Splunk
- B. 1. Request Login 2 Duo MFA
  3. Authentication Granted 4 Connect to SAML server
  5. Log into Splunk
  6. Create User session
- C. 1 Request Login 2 Duo MFA
  3. Check authentication / group mapping
  4 Create User session
  5. Authentication Granted
  6 Log into Splunk
- D. 1 Request Login
  2 Check authentication / group mapping
  3 Authentication Granted
  4. Duo MFA
  5. Create User session
  6. Log into Splunk

Answer: D

Explanation:
Explanation
Using the provided DUO/Splunk reference URLhttps://duo.com/docs/splunk
Scroll down to the Network Diagram section and note the following 6 similar steps
1 - SPlunk connection initiated
2 - Primary authentication
3 - Splunk connection established to Duo Security over TCP port 443
4 - Secondary authentication via Duo Security's service
5 - Splunk receives authentication response
6 - Splunk session logged in.

NEW QUESTION # 141
A security team needs to ingest a static file for a specific incident. The log file has not been collected previously and future updates to the file must not be indexed.
Which command would meet these needs?

- A. splunk edit oneshot [opt/ incident/data.* -index incident
- B. splunk add one shot / opt/ incident [data .log -index incident
- C. splunk add monitor /opt/incident/data.log -index incident
- D. splunk edit monitor /opt/incident/data.* -index incident

Answer: B

Explanation:
The correct answer is A. splunk add one shot / opt/ incident [data . log -index incident According to the Splunk documentation1, the splunk add one shot command adds a single file or directory to the Splunk index and then stops monitoring it. This is useful for ingesting static files that do not change or update. The command takes the following syntax:
splunk add one shot <file> -index <index_name>
The file parameter specifies the path to the file or directory to be indexed. The index parameter specifies the name of the index where the data will be stored. If the index does not exist, Splunk will create it automatically.
Option B is incorrect because the splunk edit monitor command modifies an existing monitor input, which is used for ingesting files or directories that change or update over time. This command does not create a new monitor input, nor does it stop monitoring after indexing.
Option C is incorrect because the splunk add monitor command creates a new monitor input, which is also used for ingesting files or directories that change or update over time. This command does not stop monitoring after indexing.
Option D is incorrect because the splunk edit oneshot command does not exist. There is no such command in the Splunk CLI.
References: 1: Monitor files and directories with inputs.conf - Splunk Documentation

NEW QUESTION # 142
Which network input option provides durable file-system buffering of data to mitigate data loss due to network outages and splunkd restarts?

- A. diskQueueSize
- B. queueSize
- C. durableQueueSize
  C persistentOueueSize

Answer: B
