When you are looking for reference materials in order to better prepare for the exam, you will find it is very hard to get the excellent exam dumps. What should we do? It doesn't matter. UpdateDumps is well aware of your aspirations and provide you with the best certification training dumps to satisfy your demands.

MSSC Certified Logistics Technician (CLT) 4.0 Sample Questions (Q68-Q73):

NEW QUESTION # 68
Secure areas under U.S. Customs and Border Protection (CBP) supervision that are generally considered outside CBP territory upon activation are

- A. Container Security Initiative (CSI)
- B. Free and Secure Trade (FAST)
- C. North American Free Trade Agreement (NAFTA)
- D. Foreign Trade Zones (FTZ)

Answer: D

Explanation:
Foreign Trade Zones (FTZs) are secured, designated areas within the United States that are treated, for customs purposes, as outside U.S. territory. According to CLT 4.0, goods entering an FTZ can be stored, assembled, or processed without immediate payment of customs duties. Duties are assessed only when goods leave the zone for domestic consumption, reducing cash-flow and tariff burdens. FTZs support international logistics efficiency by encouraging domestic manufacturing and re-exporting activities. CLT emphasizes FTZ operations as part of global trade compliance and customs procedures, distinguishing them from programs like FAST (a trusted shipper initiative) or CSI (a port security initiative).

NEW QUESTION # 69
E-commerce enables the company to

- A. look up information on the Internet
- B. exchange email
- C. exchange goods and services online
- D. get driving directions

Answer: C

Explanation:
In the CLT "Order Processing" section, e-commerce is described as the digital mechanism allowing businesses to buy, sell, and exchange goods, services, and data through online systems. It forms the foundation for electronic ordering, payment, and customer communication. Unlike basic internet use or email exchange, e-commerce platforms connect directly with warehouse management and order processing systems to automate inventory updates, order confirmations, and shipping notifications. This integration supports real-time data flow between customers and logistics facilities, enhancing order accuracy, visibility, and responsiveness.

NEW QUESTION # 70
Which of the following items do NOT have a critical shelf life?

- A. bread
- B. radioactive material
- C. pharmaceutical items
- D. milk

Answer: B

Explanation:
A product with a critical shelf life deteriorates over time and must be used or shipped before expiration. CLT "Product Storage" training categorizes perishables such as bread, milk, and pharmaceuticals as shelf-life-sensitive products requiring rotation systems like FIFO (First In, First Out). Radioactive materials, while hazardous, are measured by half-life rather than spoilage or usability date and are regulated differently under hazardous-materials standards. Therefore, they are not considered shelf-life-critical from an inventory standpoint. CLT emphasizes proper labeling, temperature control, and rotation methods for shelf-life goods to ensure safety, quality, and compliance with regulatory requirements such as FDA or USDA guidelines.

NEW QUESTION # 71
Which of the following includes information about trailer loading schedule?

- A. Shipping Manifest
- B. Bill of Lading
- C. Dispatch List
- D. Shipping Order

Answer: C

Explanation:
The dispatch list provides the trailer loading schedule used by dock supervisors to control the outbound workflow. CLT "Dispatch and Tracking" defines this list as a time-based coordination tool that identifies when each outbound trailer should arrive, be loaded, and depart. It helps balance labor, equipment, and dock-door availability. While the Shipping Manifest details the cargo already loaded, the dispatch list focuses on planning and sequencing. The Bill of Lading becomes effective only after loading is complete. The CLT stresses disciplined scheduling as essential to maintaining carrier appointment windows and reducing dwell time. Effective use of dispatch lists supports just-in-time shipping operations and maximizes dock efficiency.

NEW QUESTION # 72
During the receiving process, after the materials are staged, all of the following are completed by the material handler EXCEPT

- A. perform housekeeping in the staging area
- B. check quantities
- C. check the materials against the order and Bill of Lading
- D. inspect material for damage

Answer: A

Explanation:
The CLT "Product Receiving" activities outline that after materials are staged, handlers verify shipment accuracy, quantity, and condition against the purchase order and Bill of Lading. Inspection ensures quality control and discrepancy identification. While

housekeeping is important for safety, it is not a functional step in the receiving verification process. The purpose of staging is to separate materials by order or destination, allowing organized inspection and documentation. CLT emphasizes accuracy and documentation at this stage, as errors during receiving propagate through the inventory system. Housekeeping tasks occur after receiving completion to maintain workplace order but are not part of the inspection checklist.

NEW QUESTION # 73
......

Unfortunately, many candidates don't pass the CLT exam because they rely on outdated Certified Logistics Technician (CLT) 4.0 exam preparation material. Failure leads to anxiety and money loss. You can avoid this situation with UpdateDumps that provides you with the most reliable and actual MSSC CLT Dumps with their real answers for CLT exam preparation.
