Salesforce Certified Advanced Administrator Sample Questions (Q39-Q44):

NEW QUESTION # 39

Support staff at Cloud Kicks work on multiple accounts and opportunities at the same time. Currently, they are switching between browser tabs, which is tedious and confusing. Support managers put in a request for a better agent experience. What should an administrator recommend?

- A. Enable Subtab Record Browsing in the Setup menu.
- **B. Implement Service Console.**
- C. Configure Split Lit Views.
- D. Create a screen flow to pull all related opportunities onto one page.

Answer: B

NEW QUESTION # 40

In a two-step approval process where the first step is a hiring manager and second is the appropriate director, which of the following relationship types would a system administrator use to establish a relationship between the two approvers? * (1 Point)

- **A. Hierarchical relationship**
- B. Look up relationship
- C. Master detail relationship
- D. Sibling relationship

Answer: A

NEW QUESTION # 41

The sales department has asked to limit access to the Amount field on the Opportunity to only those users. In the sales department and on the executive team, Northern Trail Outfitters uses six custom profiles including Sales User, Marketing user, call Center user, Executive User, Sales Manager user, and a call Center Manager user. Field level access is removed from three of the profiles in the sandbox.

What action should an administrator take to make sure this change is in production?

- A. Manually restrict access to this field for each profile via Setup Just like the sandbox.
- **B. Deploy a change set from the sandbox to production including the Amount field with all the custom profiles.**
- C. Process a change set with the profiles that should no longer have access to the field.
- D. Create a sandbox template and push it to production to reflect the update.

Answer: B

Explanation:

Explanation

A change set is a tool that allows you to send customizations from one Salesforce org to another. A change set can contain components such as objects, fields, profiles, permission sets, workflows, and more. You can use change sets to migrate changes from a sandbox org to a production org or between two sandbox orgs that are affiliated with the same production org. In this case, you can deploy a change set from the sandbox to production that includes the Amount field and all the custom profiles that need access to it. This way, you can update the field-level security settings for the field on each profile in one deployment. References:

NEW QUESTION # 42

What tool would you use if you wanted to create a report that would compare results over time based on specific criteria?

- A. analytic snapshots
- B. Exception Report
- C. custom report types (CRT)
- D. Standard Report

Answer: A

NEW QUESTION # 43

System admin wants to know which delegated admin is actively customizing their organization. What will he use ?

- A. System Audit Trails
- B. Login History
- C. Debug Log
- D. Delegated Admin Logs

Answer: A

NEW QUESTION # 44
