Microsoft Azure Fundamentals Sample Questions (Q354-Q359):

NEW QUESTION # 354
For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

□

Answer:

Explanation:

□

NEW QUESTION # 355
HOTSPOT
Which cloud deployment solution is used for Azure virtual machines and Azure SQL databases? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.
Hot Area:

□

Answer:

Explanation:

□
Section: Describe Cloud Concepts
Explanation:
Box 1:
Azure virtual machines are Infrastructure as a Service (IaaS).
Infrastructure as a Service is the most flexible category of cloud services. It aims to give you complete control over the hardware that runs your application (IT infrastructure servers and virtual machines (VMs), storage, networks, and operating systems). Instead of buying hardware, with IaaS, you rent it.

Box 2:
Azure SQL databases are Platform as a Service (Paas).
Azure SQL Database is a fully managed Platform as a Service (PaaS) Database Engine that handles most of the database management functions such as upgrading, patching, backups, and monitoring without user involvement. Azure SQL Database is always running on the latest stable version of SQL Server Database Engine and patched OS with 99.99% availability. PaaS capabilities that are built-in into Azure SQL database enable you to focus on the domain specific database administration and optimization activities that are critical for your business.

NEW QUESTION # 356
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.
□

Answer:

Explanation:
□
Explanation:
□
Box 1: Yes
SLA's vary based on the resource type and the location distribution of the resource. However, the minimum uptime for all Azure services is 99.9 percent.
Box 2: Yes
The SLA guaranteed uptime is increased (usually to 99.95 percent) when resources are deployed across multiple regions.
Box 3: No
The number of subscriptions is unrelated to uptime SLA's. You can deploy resources to multiple regions under a single subscription or you can have multiple subscriptions with resources deployed to the same region.

NEW QUESTION # 357
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.
□

Answer:

Explanation:
□

NEW QUESTION # 358
A company has created a virtual network and also launched a set of virtual machines in the virtual network. They want to change the way the traffic is routed in the virtual network. Which of the following could be used to fulfill this requirement?

- A. User Defined Routes
- B. Azure DDoS Protection
- C. Network Security Groups
- D. Application Security Groups

Answer: A

Explanation:
You can create your network routes using User Defined Routes
The Microsoft documentation mentions the following
□
Options B and C are incorrect since these are used to filter network traffic into and out of virtual networks.
Option D is incorrect since this is used to protect infrastructure against DDoS attacks
