AZ-800 Exam Topic - Pass Guaranteed 2026 AZ-800: Administering Windows Server Hybrid Core Infrastructure First-grade Valid Exam Cram

As we all know, passing the exam is a wish for all candidates. AZ-800 exam torrent can help you pass the exam and obtain the certificate successfully. With skilled experts to edit and verify, AZ-800 study materials can meet the needs for exam. In addition, you can get downloading link and password within ten minutes after payment, and you can start your practicing right now. We have online and offline chat service stuff, they possess professional knowledge for AZ-800 Training Materials, if you have any questions, just contact us.

Microsoft AZ-800 certification exam is designed to test the knowledge and skills of IT professionals in administering Windows Server hybrid core infrastructure. Administering Windows Server Hybrid Core Infrastructure certification is suitable for those who are responsible for managing and securing hybrid environments that consist of both on-premises and cloud-based resources. AZ-800 exam covers a wide range of topics, including virtualization, networking, storage, identity and access management, and security.

Microsoft AZ-800 exam, also known as Administering Windows Server Hybrid Core Infrastructure, is a certification exam that validates the skills and knowledge required to design and implement hybrid server environments. AZ-800 exam is designed for IT professionals who work with Windows Server and Azure services and are responsible for managing and monitoring hybrid infrastructures. Administering Windows Server Hybrid Core Infrastructure certification exam demonstrates that an individual has the expertise to manage and operate on-premises and cloud-based Windows Server environments seamlessly.

The Microsoft AZ-800 Exam is intended for professionals who are responsible for managing and administering hybrid environments that include both on-premises and cloud infrastructures. AZ-800 exam tests the candidate's ability to implement and manage Windows Server workloads in Azure, integrate Azure services with Windows Server, and implement hybrid identity and security solutions.

We believe you will also competent enough to cope with demanding and professorial work with competence with the help of our AZ-800 exam braindumps. Our experts made a rigorously study of professional knowledge about this AZ-800 exam. So do not splurge time on searching for the perfect practice materials, because our AZ-800 Guide materials are exactly what you need to have. Just come and buy our AZ-800 practice guide, you will be a winner!

Microsoft Administering Windows Server Hybrid Core Infrastructure Sample Questions (Q179-Q184):

NEW QUESTION # 179
SIMULATION
Task 4
You need to ensure that the minimum password length for members of the BranchAdmins group is 12 characters. The solution must

affect only the BranchAdmins group.

Answer:

Explanation:
See the solution of this Task below
Explanation:
TASK 4
Objective:
Enforce a minimum password length of 12 characters for members of the BranchAdmins group only.
Step-by-Step Guide: Fine-Grained Password Policy (FGPP)
☐ Step 1: Verify Forest Functional Level
Fine-grained password policies require the forest functional level to be at least Windows Server 2008.
On a DC, open Active Directory Domains and Trusts (domain.msc).
Right-click the domain and select Raise Forest Functional Level to verify.
If it's lower, consider raising it (requires caution and planning).
☐ Step 2: Open the Active Directory Administrative Center (ADAC)
On a DC or management server, open ADAC:
Press Windows + R, type dsac.exe, and hit Enter.
☐ Step 3: Create a Fine-Grained Password Policy
In ADAC, in the left pane, expand the domain (e.g., contoso.com) and click System > Password Settings Container.
In the right pane, right-click and select New > Password Settings.
☐ Step 4: Configure the Password Policy
Name: e.g., BranchAdminsPSO.
Precedence: e.g., 1 (lower number = higher priority).
Minimum password length: 12.
Configure other settings as required (leave them at default if not specified).
In Directly Applies To, click Add.
Search for and select the BranchAdmins group.
Click OK.
☐ Step 5: Confirm and Apply
Click OK to create the policy.
It's now linked directly to the BranchAdmins group, affecting only its members.
☐ Step 6: Verify the Policy
You can use PowerShell to confirm that the PSO is applied:
Get-ADUserResultantPasswordPolicy -Identity "username"

NEW QUESTION # 180
You have 50 on-premises servers that run Windows Server.
You have an Azure subscription.
You plan to monitor the on-premises servers by using Azure Monitor.
You need to collect event logs from the on-premises servers.
What should you do first?

- A. From the Azure portal, create a Log Analytics workspace.
- B. From the Azure portal, create a storage account.
- C. From the Azure portal, create a data collection rule (DCR) in Azure Monitor.
- D. From the on-premises servers, run azuremonitoragentclientsetup.msi.

Answer: A

Explanation:
To monitor on-premises servers with Azure Monitor, a Log Analytics workspace must be created first as it's the foundation for storing and analyzing log data.

NEW QUESTION # 181
You have an Azure virtual machine named VM1 that contains the drives shown in the following table.

On VM1, you plan to install an app named App1. The data for App1 must be stored on a persistent data disk assigned to drive D. You need assign the data disk to drive D.
What should you do on VM1 first?

- A. Stop (deallocate) VM1.
- B. Change the drive letter of the Temporary Storage drive to F.
- C. Move pagefile.sys to the Operating System drive.
- D. Expand the Temporary Storage drive.

Answer: A

NEW QUESTION # 182
Hotspot Question
You have an Azure subscription. The subscription contains a virtual network named VNet1.
VNet1 contains two virtual machines named VM1 and VM2 that run Windows Server.
You need to ensure that when you sign in to the Azure portal from VM2, you can manage the operating system of VM1. The solution must minimize costs.
Which two settings should you configure for VM1? To answer, select the appropriate settings in the answer area.
NOTE: Each correct answer is worth one point.

Answer:

Explanation:

NEW QUESTION # 183
Your network contains an Active Directory domain, a web app named App1, and a perimeter network. The perimeter network contains a server named Server1 that runs Windows Server.
You plan to provide external access to App1.
You need to implement the Web Application Proxy role service on Server1.
Which role should you add to Server1, and which role should you add to the network? To answer, drag the appropriate roles to the correct targets. Each role may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Answer:

Explanation:
Explanation:

NEW QUESTION # 184
......

There may be customers who are concerned about the installation or use of our AZ-800 training questions. You don't have to worry about this. In addition to high quality and high efficiency, considerate service is also a big advantage of our company. We will provide 24 - hour online after-sales service to every customer. If you have any questions about installing or using our AZ-800 Real Exam, our professional after-sales service staff will provide you with warm remote service. As long as it is about our AZ-800 learning materials, we will be able to solve. Whether you're emailing or contacting us online, we'll help you solve the problem as quickly as possible. You don't need any worries at all.
