

Pass Guaranteed 2026 CTS: Certified Technology Specialist Useful Reliable Test Braindumps

What's more, part of that Pass4sures CTS dumps now are free: https://drive.google.com/open?id=1KTzbYy0uQFSSo7yWEnCQsZyqqc8b4Gw_

What is more difficult is not only passing the AVIXA CTS Certification Exam, but the acute anxiety and the excessive burden also make the candidate nervous to qualify for the Certified Technology Specialist certification. If you are going through the same tough challenge, do not worry because AVIXA is here to assist you.

AVIXA CTS Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Supporting AV System Operation: This section of the exam measures the skills of AV support specialists and covers the ongoing support of AV systems. It includes troubleshooting issues, providing remote assistance, supporting live events, and offering in-room operation training to ensure smooth system operation.
Topic 2	<ul style="list-style-type: none"> Implementing AV Solutions: This section of the exam measures the skills of AV system integrators and focuses on the implementation of AV solutions. It involves integrating AV systems, verifying their functionality, and managing the integration process, including training, documentation, and ensuring operational readiness.
Topic 3	<ul style="list-style-type: none"> Servicing AV Solutions: This section of the exam measures the skills of AV maintenance managers and focuses on the maintenance and repair of AV solutions. It involves supervising AV operations, conducting preventative maintenance, performing firmware and equipment upgrades, and troubleshooting and repairing AV systems to ensure they remain functional and efficient.
Topic 4	<ul style="list-style-type: none"> Creating AV Solutions: This section of the exam measures the skills of AV system designers and covers the process of creating audiovisual solutions. It includes conducting customer needs analysis, performing site surveys to assess environmental factors like lighting and acoustics, developing project scopes, and designing AV solutions with detailed drawings and materials lists.

CTS Detailed Study Plan | CTS Best Vce

The Certified Technology Specialist (CTS) certification verifies that you are a skilled professional. Pass4sures product is designed by keeping all the rules and regulations in focus that AVIXA publishes. Our main goal is that you can memorize the actual Certified Technology Specialist (CTS) exam question to complete the Certified Technology Specialist (CTS) test in time with extraordinary

grades. AVIXA CTS Exam Dumps includes AVIXA CTS dumps PDF format, desktop CTS practice exam software, and web-based Certified Technology Specialist (CTS) practice test software.

AVIXA Certified Technology Specialist Sample Questions (Q241-Q246):

NEW QUESTION # 241

During a site survey, a sound pressure level (SPL) meter can be used for measuring

- A. the ambient noise level.
- B. the efficiency of the amplification.
- C. the room acoustics.
- D. distance to existing loudspeakers.

Answer: A

Explanation:

An SPL (Sound Pressure Level) meter is commonly used during a site survey to measure the ambient noise level in a room. This measurement provides a baseline for audio system design, ensuring that the sound reinforcement system can deliver adequate volume levels above the background noise.

CTS Technology Specialist Reference According to CTS materials, assessing ambient noise levels with an SPL meter is a standard step in designing sound systems, especially in environments where speech intelligibility is critical.

NEW QUESTION # 242

Which addressing scheme is used to define a fixed, routable IPv4 address that is locally assigned?

- A. link-local
- B. DHCP reservation
- C. DHCP
- D. static

Answer: D

Explanation:

A static IP address is a fixed IP address that is manually assigned and does not change. This scheme is suitable for devices that require a constant address, allowing them to be easily located and accessed within a network. Static IP addresses are commonly used for routers, servers, and other essential devices in AV networks.

CTS Technology Specialist Reference The CTS curriculum covers IP addressing schemes, noting that static IP addresses provide reliability and are preferred for AV equipment requiring stable and consistent network access.

NEW QUESTION # 243

This screen has a 16:9 aspect ratio. How close should the nearest viewer be positioned?

- A. 3'3" (1 m)
- B. 5'11" (1.8 m)
- C. 6'7" (2 m)
- **D. 4'8" (1.4 m)**

Answer: D

Explanation:

The question relates to viewer distance based on image height, which is part of image size and viewing distance calculations under AVIXA design principles.

This screen is 65" diagonal with a 16:9 aspect ratio. The image height is given as 31.6" (80.2 cm).

According to the AVIXA CTS Exam Guide, the formula for minimum (nearest) viewing distance for a basic decision-making (BDM) environment is:

Minimum viewing distance = $1.5 \times \text{Image Height}$

- AVIXA CTS Exam Guide, 5th Edition - Chapter 7: Display Design, p. 155 So in this case:

* Image Height = 31.6 inches (80.2 cm)

* Nearest Viewing Distance = $1.5 \times 31.6 \text{ inches} = 47.4 \text{ inches} \# 4'8" (1.4 \text{ m})$ Thus, the correct and closest viewing distance to ensure readability and visual comfort is Option C: 4'8" (1.4 m).

Note: For analytical decision-making (ADM), a shorter distance might be used (up to $4 \times$ height), and for passive viewing (PV), longer distances are acceptable. But this question implies nearest (minimum) viewer positioning, hence the 1.5x rule applies.

NEW QUESTION # 244

Which of the following documents includes details about equipment type, model, location, and expected service frequency?

- A. Program document
- B. Handover document
- C. Warranty form
- **D. Maintenance plan**

Answer: D

Explanation:

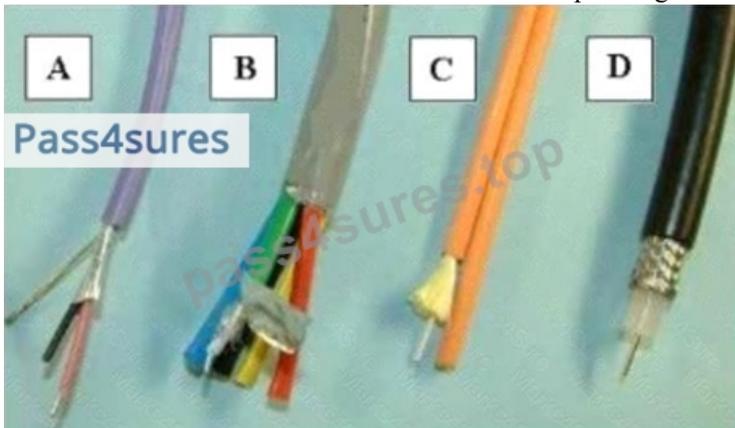

A maintenance plan provides structured information about how and when to service each component in the AV system. It includes model numbers, service intervals, and locations to ensure operational integrity over time.

"The maintenance plan outlines the type and frequency of service for each piece of equipment. It ensures the client has a roadmap for sustaining system performance."

- CTS Exam Guide, Maintenance and Service Planning

NEW QUESTION # 245

Which of these cables should be used for a balanced microphone signal?

- A. C
- B. B
- C. D
- **D. A**

Answer: D

Explanation:

Cable A is a shielded twisted pair (STP) cable, which is suitable for carrying balanced microphone signals.

Balanced audio cables have three conductors: two for the signal (positive and negative) and one for the ground. The twisted pair helps to cancel out electromagnetic interference, providing a cleaner signal with less noise. The shielding further protects against external interference, making it ideal for professional audio applications.
