CIPS L4M1 Mock Exam Questions

Exam Name: Scope and Influence of Procurement and Supply

Exam Code: L4M1

Related Certification(s): CIPS Level 4 Diploma in Procurement and Supply Certification
Certification Provider: CIPS

Expected L4M1 Exam Topics, as suggested by CIPS :

Topic 1: Understand and analyse the added value through procurement and supply chain management. This section of the exam measures skills of supply chain managers related to identifying added value outcomes in procurement and supply and evaluating cost savings; service improvements, and innovations contributions. It also measures procurement and supply processes that contribute to added value.

Topic 2: Understand and analyse the key steps when procuring goods or services: This section measures that skills of purchasing managers and procurement officers in identifying and evaluating stages in the sourcing process, planning, supplier selection, and contract management.

Topic 3: Understand and analyse aspects of organisational infrastructure that shape the scope of procurement and supply chain functions: This section measures that skill of supply chain strategists and organizational analysts in understanding corporate governance, documented policies, accountability, and ethics. It also covers the impact of organisational policies and procedures on procurement and supply Procedures, strategies, manuals, and internal function involvement.

Topic 4: Understand and analyse the need for compliance: This section measures skills of compliance officers and sector-specific procurement managers in understanding different economic and industrial sectors such as Public, private, charity, not-for-profit, manufacturing, retail, construction, financial, agriculture, and service sectors. It also covers analyzing the impact of the public sector on procurement and supply chain activities public sector objectives, regulations, competition, accountability, and value for money. It finally covers the impact of the private sector on procurement or supply chain activities.

New developments in the tech sector always bring new job opportunities. These new jobs have to be filled with the Scope and Influence of Procurement and Supply (L4M1) certification holders. So to fill the space, you need to pass the CIPS L4M1 exam. Earning the Scope and Influence of Procurement and Supply (L4M1) certification helps you clear the obstacles you face while working in the CIPS field. To get prepared for the Scope and Influence of Procurement and Supply (L4M1) certification exam, applicants face a lot of trouble if the study material is not updated.

CIPS Scope and Influence of Procurement and Supply Sample Questions (Q50-Q55):

NEW QUESTION # 50

It is important for an organisation to balance achieving Added Value and ensuring processes are compliant. Explain the consequences of focusing on one area over the other and how an organisation can achieve both in its procurement activities (25 points).

Answer:

Explanation:

See the solution in Explanation part below

Explanation:

How to approach this question.

- There's many aspects to this question - make sure you're answering them all:
- Explain what added value is and explain what 'ensuring processes are compliant' means (this could be your introduction) Added Value = achieving more for the same money. May be in producing an item cheaper, or by procuring additional features at no additional cost. Requires innovation and creativity. The focus is on the outcome. Compliant Processes - this is focusing on the process, rather than the outcome. Ensuring that purchases are made in line with internal and external rules/ procedures. This may be following Standard Operating Procedures, purchasing to strict budgets and the exclusive use of e-procurement tools.
- Explain the consequences of focusing on added value over compliance; can result in maverick spending, less visibility for management, may have additional risks if procuring items without following procedures - this may have legal and financial repercussions, Time-consuming, May lead to added expenses
- Consequences of focusing on compliance over added value; May foster a silo-mentality, Misses out on flexibility and agility, misses out on collaborative whole life costs reductions, Procurement function becomes rigid, inflexible and inwardly focused
- How both can be achieved; 1) Seek to add value only for certain purchases such as capital-expenditure items and not for others such as stationary. 2) Ensure time is well-spent i.e. focus on added value for purchases where this can be most achieved, and focus on compliance where there is high risks. 3) Review processes regularly to ensure both goals are being achieved 4) Complete 'lessons learned' activities after big procurement activities to advise on future procurement activities- were both Added Value and Compliance achieved? How could this be improved next time?
- these three should form the main body of your essay. Above are many ideas you could explore, you won't have time to talk about all of them so pick a couple that resonate with you Conclusion - the balance is important Example Essay Added value refers to the extra worth or enhancement a company provides to a product, service, or process that goes beyond the intrinsic value inherent in the initial input. It represents the additional benefits or features that make a product or service more desirable to customers, often justifying a higher price or distinguishing it from competitors. Procurement often look to achieve added value in procurement activities

but achieving this whilst remaining compliant (adhering to established laws, regulations, standards, and internal policies) can be tricky. Achieving a delicate equilibrium between pursuing added value and ensuring stringent compliance in procurement activities is pivotal. This essay explores the consequences of emphasizing one area over the other and outlines strategies for organizations to successfully navigate the dual goals of attaining added value and maintaining compliance.

Consequences of Focusing Solely on Added Value:

Prioritizing added value without due consideration for compliance can expose an organization to a myriad of risks. One notable consequence is the potential compromise of regulatory requirements and legal standards. For instance, if a procurement team is solely driven by obtaining cost-effective solutions or innovative products, they may inadvertently overlook compliance with industry-specific regulations, leading to legal ramifications and reputational damage.

Moreover, an exclusive focus on added value may neglect crucial ethical considerations. An organization, in pursuit of cost savings or improved efficiency, might engage with suppliers that violate ethical standards or engage in unethical business practices such as modern day slavery. Such associations can tarnish the organization's reputation, eroding the trust of stakeholders and customers alike.

Consequences of Overemphasizing Compliance:

Conversely, a hyper-focus on compliance without adequate consideration for added value can result in missed opportunities and suboptimal outcomes. Strict adherence to procedural norms and regulations might lead to an overly bureaucratic procurement process, hindering innovation and stifling the organization's ability to adapt swiftly to market changes.

Furthermore, an excessive emphasis on compliance might limit engagement with suppliers, stifling creativity and potential breakthroughs. For instance, a procurement team rigidly adhering to compliance protocols might miss out on collaborating with smaller, innovative suppliers that could offer unique and value-added solutions.

Strategies for Achieving Both Added Value and Compliance:

To navigate the delicate balance between added value and compliance, organizations can adopt several strategic approaches. First and foremost, an organization should establish clear procurement policies and procedures that incorporate both compliance requirements and avenues for seeking added value. This ensures that all procurement activities align with regulatory standards while leaving room for innovation.

Effective supplier management plays a pivotal role in achieving this balance. By thoroughly vetting and categorizing suppliers based on their ability to deliver value and comply with regulations, organizations can strategically align their procurement activities. For example, suppliers that have a proven track record of compliance can be trusted with critical components, while those offering innovative solutions may be engaged for projects that prioritize added value.

Leveraging technology is another essential strategy. Implementing advanced procurement software that integrates compliance checks and offers analytics for value assessment can significantly enhance the efficiency of procurement processes. Automated systems can streamline due diligence, ensuring that suppliers meet compliance standards while providing insights into their potential to deliver added value.

Additionally, fostering a culture of collaboration within the procurement team and across organizational departments is crucial. Encouraging open communication enables different stakeholders to contribute insights on compliance and added value. Cross-functional collaboration ensures that procurement decisions align with broader organizational goals and values.

In conclusion, the strategic balancing act between achieving added value and ensuring compliance in procurement is indispensable for organizational success. By recognizing the consequences of favouring one area over the other and adopting a holistic approach, this safeguards against risks but also positions the organization for sustained growth and competitiveness in the ever-evolving business landscape.

Tutor Notes:

- Examples highlight that you understand the material you have studied and can apply it to real life scenarios. You could take a certain industry or organisation and explain the consequences for them of focusing on one over the other. E.g. In the construction industry it is very important that organisations achieve compliance in their procurement activities. This includes ensuring there are robust contracts in place and that legislation such as CDM and Health and Safety is followed. When procuring a construction contract the danger of focusing on Added Value over compliance is that this may result in key legislation being forgotten which leads to legal proceedings against the buyer. For example, if the buyer procures a construction contract without fulfilling the responsibilities outlined in the CDM and H&S regulations, this can result in huge fines for the company and potential jail time for senior management.

- The risk of focusing on compliance over added value may be in missing out on alternative proposals. For example, if a buyer is procuring a construction project of a new hospital and they focus too much on compliance, they may not engage in Early Supplier Involvement or cross-functional working which may bring up alternative ideas such as different ways the hospital could be built. The alternative ideas may result in higher quality or cost savings which are missed by the buyer. This results in a more costly, or lower-quality hospital being built.

- Overall, what CIPS are testing you on here is that you understand that the procurement department should aim to achieve both - it's a balancing act between compliance and added value and this could be viewed as a pendulum- it's important not to swing too heavily in one direction. That's actually a really good metaphor - feel free to use that in your conclusion!

- study guide p. 114

NEW QUESTION # 51

In the supplier selection part of the Procurement Cycle, what criteria can a Procurement Manager use to ensure they award to the best supplier? (25 points)

Answer:

Explanation:

See the solution in Explanation part below.

Explanation:

How to approach this question:

- This is quite an open question and there are many different things you could mention. One way to approach it would be to use Carter's 10 Cs- discuss a couple of these. OR just give a couple of criteria in different paragraphs. Some ideas include: Supplier financial status, Reputation / References, Quality, Availability, CSR Policies / Ethics / Environmental considerations, Accreditations, Added Value. This list is not exhaustive.

- If you're going for Carter's 10 Cs you could name a couple of these: competency, consistency, capability, control, cost, cash, clean, communication, culture, commitment

- I don't think either approach is better or worse. Choose the criteria you know the most about and write about those.

- The question doesn't tell you how many criteria to name, so you have to make a judgement call here. I would aim for 5-6. But if you can only remember 4 that's fine. The main thing they're looking for is that you explain for each one 1) what it is 2) how procurement can check 3) why procurement would look at that criteria 4) an example. If you do too many you risk not going into enough detail on each. It's a balance. 5 is always a good number to aim for if the question doesn't state.

Example Essay

In the procurement cycle, the supplier selection phase is a critical juncture that demands consideration.

Procurement Managers shoulder the responsibility of identifying and awarding contracts to suppliers who not only meet immediate needs, but contribute to the long-term success of the organization. This essay explores various criteria a Procurement Manager can employ to ensure the selection of the best supplier: financial stability, reputation, quality, availability, CSR policies, and added value.

Financial stability is a foundational criterion in supplier selection. Assessing a supplier's financial status involves a multifaceted evaluation, with liquidity and gearing ratio taking center stage. The acid test, comparing short-term assets to liabilities, offers insights into a supplier's ability to settle debts promptly, with a ratio exceeding 1 indicating financial health. Meanwhile, the gearing ratio, reflecting the proportion of capital funded by loans, aids in gauging financial risk, with a ratio below 50% considered low-risk.

Relying on published Profit and Loss statements and income statements, along with financial credit checks from platforms like Dun and Bradstreet, empowers Procurement Managers to make informed decisions. This financial scrutiny is imperative to avoid entering contracts with suppliers facing imminent financial struggles, safeguarding against potential disruptions to the supply chain.

Reputation and references are another pivotal criterion. Seeking references from previous contracts allows Procurement Managers to gauge a supplier's track record in successfully delivering on similar commitments.

Independent reviews and informal market inquiries supplement this information, providing a holistic understanding of a supplier's performance. However, caution is advised in overreliance on past performance, as variables like personnel changes or contract scale differences may impact outcomes. Recognizing that past shortcomings may have been addressed internally further emphasizes the need for a balanced approach to reference evaluation.

Thirdly, Quality. Beyond the product itself, considerations extend to the supplier's technological capabilities, manufacturing processes, and relevant accreditations such as ISO 9001. Physical visits to supplier sites may be warranted, especially for products like raw materials where samples can be requested. Adhering to recognized safety standards and assessing factors like fire retardancy ensures that the quality of manufactured goods aligns with established benchmarks.

Next, Availability is another important criteria to consider. Procurement Managers must evaluate a supplier's capacity and capability to meet specific requirements. Inquiries about existing contracts and flexibility in response to demand fluctuations provide insights into a supplier's commitment and responsiveness. Assessing the supplier's workload and the significance of the buyer in their client portfolio helps determine the level of attention and service the buyer can expect. A buyer may wish to avoid working for a supplier who is already stretched very thinly with other contracts.

Corporate Social Responsibility (CSR) policies and ethical considerations have gained prominence in supplier selection. Beyond legal compliance, Procurement Managers may scrutinize a supplier's history for convictions or negative press related to corruption, bribery, or fraud. The presence of a Modern Slavery Policy and Environmental Policy, along with relevant accreditations like ISO14001 or Fair Trade certification, attests to a supplier's commitment to ethical and sustainable practices. Procurement would likely seek to appoint a supplier whose CSR vision aligns with their own company's.

Lastly, added value is an important criteria to consider. This is particularly so for Public Sector Organizations governed by the Social Value Act. In addition to meeting contractual requirements, suppliers may offer knowledge sharing, training, improved processes, or contribute to social value by employing local community members or providing apprenticeships. This criterion aligns procurement decisions with broader organizational goals, enhancing the overall impact of supplier relationships and benefitting the local community.

In conclusion, a careful combination of financial scrutiny, reputation assessment, quality evaluation, availability considerations, CSR policies, and added value analysis forms the bedrock of effective supplier selection in the procurement cycle. Procurement Managers, armed with a holistic understanding of these criteria, should seek not only to fulfil immediate needs, but also consider the

long-term impact of supplier appointments.

Tutor Notes

- A 'good' scoring answer (50-70%) will explain the criteria well and give examples. If you're looking for a distinction level answer (70%+) you could also mention advantages, disadvantages and risks associated with each of the criteria. For example, when looking at references and reputation it's important to know that a supplier would only ever provide a good reference to you, they would never tell you of a contract that failed.

Another example is that financial data may be skewed- a supplier may have a low score if they are just starting up or have recently remortgaged a property. It's therefore important to get a commentary as well as the figures / scores.

- You could also mention that criteria could be weighted e.g. more importance given to quality than financial status and also consider how easy or difficult it would be to get the information e.g. a supplier may say they have lots of availability to deliver the service you require, but they may just be saying this to win business.

How do you know for sure?

- Social Value Act isn't in this syllabus. If you work in Public Sector procurement it's something you'll be very familiar with. If you don't or you're outside of the UK do not worry about this. I've just included it to show how you can bring in your own knowledge to questions like this. You could think of particular criteria that's important to your industry and write about that. The Social Value Act: What is it, and why is it important? (samtaler.co.uk)

- Study guide p.77

NEW QUESTION # 52

Sarah is thinking of setting up a charity in the UK which will look after animals that have been abandoned.

What regulations and governing bodies should Sarah be aware of when setting up her charity? (25 Points)

Answer:

Explanation:

See the solution in Explanation part below.

Explanation:

How to approach this question

- Your essay should mention at least one regulation and one governing body particular to the charity section and I would recommend these be the Charities Act 2011 and the Charities Commission.

- If you don't know a lot about the sector you can bring up more generalised regulations and governing bodies, such as financial conduct and the Equalities Act, but make sure it's relevant to Sarah. Her charity is a small, local one, so things like Modern Slavery Act will not be appropriate to talk about.

Example Essay

When setting up a charity in the UK, particularly one focused on animal welfare, there are several regulations and governing bodies that Sarah should be aware of. These ensure that the charity operates legally, ethically, and effectively.

A charity's purpose involves raising awareness and helping someone or something, in Sarah's case this will be local animals and potentially their owners. A charity has to satisfy two aspects: The benefit aspect and The public aspect. In the UK, both aspects are regulated by the Charities Act 2011.

To satisfy a benefit aspect, a charity must have a purpose that must be beneficial to the community it works in - this must be in a way that is identifiable and capable of being proved by evidence. For Sarah this would be showing that her charity helps animals, potentially by taking them in off the street or removing them from dangerous homes and caring for them.

To satisfy a public aspect, a charity must benefit the public in general, or a sufficient section of the public. In Sarah's case the public benefit may be in removing stray dogs and cats from the streets where they can transport diseases and potentially attack people.

Most charities strive to satisfy both aspects but in some cases this is not possible.

All charities are regulated. Because charities are funded by donations from the public, businesses and sometimes from government, their conduct is regulated closely. Key regulatory bodies that Sarah will have to engage with include:

1. Charity Commission for England and Wales:

As the primary regulator for charities in England and Wales, the Charity Commission oversees the registration and regulation of charities. Sarah's organization must meet the legal definition of a charity and apply for registration if its income is over £5,000 per year.

The Commission ensures compliance with the Charities Act, offering guidance on charity governance, financial management, and reporting.

2. HM Revenue and Customs (HMRC):

Charities can apply to HMRC for recognition as a charity for tax purposes. This status allows for tax reliefs and exemptions, including Gift Aid on donations.

HMRC ensures compliance with tax obligations and scrutinizes the use of charity funds.

3. Data Protection:

Under the General Data Protection Regulation (GDPR) and the Data Protection Act 2018, any charity handling personal data must ensure its protection and comply with data privacy laws.

4. Health and Safety Executive (HSE):

The HSE provides guidelines for workplace safety, which are important if the charity has employees or volunteers.

In conclusion there are many regulations and bodies that Sarah should be aware of when setting up her charity. Sarah should consider seeking legal advice or consulting with charity advisory services to ensure full compliance with all relevant laws and regulations. Additionally, staying informed about changes in charity law and animal welfare legislation would be beneficial to the smooth operation of her charity.

Tutor Notes

- With case study questions you're not expected to know anything about the specific topic, in this case Animal Charities. If it happens to be something you know about, you can bring in some of your own knowledge, but this isn't a requirement to get a good score. You're not expected to know, for example about the Animal Welfare Act 2006, but if you happen to do so, it could be a nice little thing to add in. Just don't focus your essay on it. However you can make some sensible guesses on what Sarah will be doing, for example I talked about removing stray animals from the street.

- Charities comes up in LO 4.4 p.232

NEW QUESTION # 53

Explain the main differences between the Public Sector and the Private Sector (25 marks)

Answer:

Explanation:

See the solution in Explanation part below.

Explanation:

Bottom of Form

Top of Form

- This is an open question. You could really talk about anything. Here's some ideas of content:

Example Essay

The public and private sectors, while both essential to a nation's economy, operate under different paradigms, primarily due to their distinct drivers, stakeholders, regulations, procurement aims, and supplier relationships.

Drivers

The most fundamental difference lies in their drivers. Private sector organizations are primarily profit-driven; their existence hinges on their ability to generate profits. This profit influences their strategies, operations, and overall objectives. Conversely, public sector organizations are not driven by profit. Funded by taxpayer money, their primary objective is to deliver services effectively and efficiently to the public. Their success is measured not in financial terms, but in how well they meet the service levels required by the citizens who finance them through taxes.

Stakeholders

The range and influence of stakeholders in the two sectors also differ markedly. In the public sector, the stakeholder base is much broader, encompassing every member of society who interacts with or benefits from public services like healthcare, policing, and road maintenance. However, these stakeholders typically have less power to influence policy or practices. In contrast, stakeholders in the private sector, such as shareholders and customers, often have a more significant influence on company policies and practices. The private sector's narrower stakeholder base allows for more direct impact and influence from these groups.

Regulations

Regulations in the public sector are generally more stringent than in the private sector. Public sector entities, governed by regulations like PCR 2015, must demonstrate sound procurement practices and are accountable to society at large. This contrasts with the private sector, where companies have more latitude in choosing suppliers and are not obliged to justify their decisions publicly. The private sector faces fewer regulatory constraints, allowing for more flexibility in business decisions.

Procurement Aims

Procurement in the public sector is guided by the principles of efficiency, economy, and effectiveness, often summarized as the '3 Es'. The focus is on achieving value for money, considering both quality and price. In contrast, private sector procurement is more diverse in its aims, reflecting the organization's specific goals, which could range from profit maximization to innovation or sustainability. The private sector's procurement decisions are more closely aligned with the organization's unique values and objectives.

Supplier Relationships

Finally, the nature of supplier relationships differs significantly between the two sectors. The public sector is mandated to maintain a certain distance from its suppliers, ensuring equal treatment and open competition, as dictated by regulations like the PCR. This contrasts with the private sector, where companies are free to develop closer, more strategic relationships with preferred suppliers. The private sector can engage in practices like partnerships and Early Supplier Involvement, which are typically not permissible in the public sector due to the need for impartiality and fairness.

In summary, while both sectors aim to deliver services or products effectively, the public sector's focus on service delivery for the public good, stringent regulations, broad stakeholder base, and specific procurement principles, sets it apart from the private sector's

profit-driven, flexible, and more narrowly focused approach.

Tutor Notes

- At Level 4 the questions are usually explain or describe, so don't worry too much about doing an in depth 'compare and contrast' style of answer. They don't expect that level of detail here. Simply saying Public Sector does X and Private Sector does Y is all you need.
- I have mentioned PCR 2015 - if you're taking this exam in 2025 you may need to update this reference with the new regulations.
- LO 4.3 p.220 / p. 226

NEW QUESTION # 54

Describe the main differences between the three economic sectors: public, private and third. Your answer may make reference to the following: funding, ownership, shares, objectives and administration (25 marks)

Answer:

Explanation:

See the solution in Explanation part below.

Explanation:

How to approach this question

- Sometimes CIPS give you a steer on how to answer the question. My advice is to follow it. The question says you MAY make reference to the following, but I'd use those hints as a guide for content- a paragraph on each and you're done!
- When you've got a 'may make reference to' hint - this means you can completely ignore it and do your own thing and bring in your own ideas. May means it's optional, so you wouldn't be penalised for this. However, you have to consider the examiner's mark scheme- it will detail options of stuff you can write for funding, ownership etc. Then there will be a line at the bottom saying something like 'accept other options such as x and y'. This leaves it up to the examiner to decide whether what you've said is relevant. I'd personally not leave it up to chance you get a lenient examiner. If you write what's definitely going to be on their mark scheme, you're more likely to get more points.

Example Essay

The modern economy is a complex tapestry of various sectors, each with its own distinct characteristics and functions. The three prominent sectors are the public sector, the private sector, and the third sector. These sectors differ significantly in terms of their funding mechanisms, ownership structures, objectives, the concept of shares, and their administration.

Firstly, the public sector is predominantly funded by the government through taxation, grants, and other forms of public revenue. Its very existence hinges on the provision of essential services and the fulfilment of societal needs. These organizations are owned by the government, be it at the federal, state, or local level. Unlike the private sector, the concept of shares doesn't apply in the public sector. Instead, the government allocates budgets to various departments and agencies for public services and projects. The primary objectives of the public sector revolve around the welfare of the citizens, including the provision of education, healthcare, defence, and infrastructure. It is characterized by bureaucratic administration, with decision-making processes subject to governmental regulations and oversight. A prime example is public schools and healthcare systems, which are funded and operated by the government with the primary objective of ensuring universal access to education and healthcare services.

In contrast, the private sector operates on a starkly different paradigm. It is primarily funded by private capital, investment, and profit-seeking activities. Private individuals and corporations own these entities, with ownership shares often represented by stocks. Shareholders invest capital in exchange for ownership stakes and the potential for dividends. The central objective in the private sector is profit maximization, driven by competition in the market. Companies in the private sector are administered by management teams and boards of directors, with decisions guided by market forces. Apple and ExxonMobil are examples of private sector entities, privately owned and publicly traded, with profit motives at their core. Shareholders invest in these companies with the expectation of financial returns.

Lastly, the third sector, often referred to as the nonprofit or voluntary sector, represents a unique economic sphere. It relies on a combination of funding sources, including donations, grants, and earned income, but not taxation. Third sector organizations are not owned by individuals or shareholders; instead, they are governed by boards of directors or trustees. Unlike the private sectors, shares are not applicable in the third sector.

These organizations do not seek to distribute profits to owners. The primary objective of the third sector is to serve a social or community purpose, such as addressing societal issues, promoting social change, and providing services that benefit the public. Administration in this sector is overseen by non-profit boards, and it heavily relies on volunteers, philanthropy, and community engagement. For example, the Red Cross operates with the objective of providing humanitarian aid and disaster relief, relying on donations and volunteers to fulfil its mission. Any profits that are made are reinvested into the organisation to further its mission. In conclusion, the public, private, and third sectors represent diverse economic domains, each with its own funding mechanisms, ownership structures, objectives, and administrative models. These sectors play essential and complementary roles in society, contributing to economic development, public welfare, and social progress. Together, they form the foundation of a balanced and dynamic economic landscape.

Tutor Notes

- I've structured this essay with a paragraph on each sector, but you could have done a paragraph on each theme, thus having 5

paragraphs instead of 3. Either approach works.

- You've got 5 things and 3 sectors, that equals 15 marks. If you give an example of each and a strong intro and conclusion, that's full marks.

- See LO 4.1 p. 203 - there's a cute table with this information on.

NEW QUESTION # 55

.....

With our professional experts' unremitting efforts on the reform of our L4M1 guide materials, we can make sure that you can be focused and well-targeted in the shortest time when you are preparing a L4M1 test, simplify complex and ambiguous contents.
