**SAP CERTIFICATION**

BTW, DOWNLOAD part of CertkingdomPDF C-BW4H-2505 dumps from Cloud Storage: [https://drive.google.com/open?id=1JP5KIBvTb8B2EyOB8B8Q\\_Ic0S2uxtaut](https://drive.google.com/open?id=1JP5KIBvTb8B2EyOB8B8Q_Ic0S2uxtaut)

We will offer you the privilege of 365 days free update for C-BW4H-2505 latest exam dumps. While, other vendors just give you 90 days free update. As a wise person, it is better to choose our C-BW4H-2505 study material without any doubts. Due to the high quality and C-BW4H-2505 accurate questions & answers, many people have passed their actual test with the help of our products. Now, quickly download C-BW4H-2505 free demo for try. You will get 100% pass with our verified C-BW4H-2505 training vce.

The result of your exam is directly related with the C-BW4H-2505 learning materials you choose. So our company is of particular concern to your exam review. Getting the C-BW4H-2505 certificate of the exam is just a start. Our C-BW4H-2505 practice materials may bring far-reaching influence for you. Any demands about this kind of exam of you can be satisfied by our C-BW4H-2505 training quiz. So our C-BW4H-2505 practice materials are of positive interest to your future. Such a small investment but a huge success, why are you still hesitating?

## **Online C-BW4H-2505 Bootcamps | Latest Braindumps C-BW4H-2505 Book**

Are you still worried about the actuality and the accuracy of the C-BW4H-2505 exam cram? If you choose us, there is no necessary for you to worry about this problem, because we have the skilled specialists to compile as well check the C-BW4H-2505 Exam Cram, which can ensure the right answer and the accuracy. The pass rate is 98%, if you have any other questions about the C-BW4H-2505 dumps after buying, you can also contact the service stuff.

## **SAP Certified Associate - Data Engineer - SAP BW/4HANA Sample Questions (Q11-Q16):**

## NEW QUESTION # 11

Why do you set the Read Access Type to "SAP HANA View" in an SAP BW/4HANA InfoObject?

- A. To generate an SAP HANA calculation view data category Dimension
- B. To report master data attributes which are defined in calculation views
- C. To enable parallel loading of master data texts
- D. To use the InfoObject as an association within an Open ODS view

**Answer: A**

Explanation:

When the Read Access Type is set to "SAP HANA View" for an InfoObject in SAP BW/4HANA:

\* SAP HANA Calculation View Generation:

\* This setting enables the generation of an SAP HANA calculation view of the data category Dimension for the InfoObject.

\* The view allows seamless integration and use of the InfoObject in other HANA-native modeling scenarios.

\* Purpose:

\* To enhance data access and leverage SAP HANA's performance for analytics and modeling.

SAP BW/4HANA InfoObject Configuration Documentation

SAP HANA Modeling Guide

## NEW QUESTION # 12

What are some of the advantages of using SAP BW/4HANA business content? Note: There are 2 correct answers to this question.

- A. Ability to modify business content objects to meet customer specific requirements
- B. Automatic generation of Analysis Authorizations during SAP BW/4HANA content activation
- C. Automatic content activation during installation of SAP BW/4HANA
- D. Accelerated SAP BW/4HANA implementation using ready-made models

**Answer: A,D**

Explanation:

SAP BW/4HANA business content refers to pre-delivered, ready-to-use data models, extractors, transformations, and reports provided by SAP. These objects are designed to accelerate the implementation of SAP BW/4HANA by offering standardized solutions for common business scenarios. Business content is particularly valuable because it reduces the effort required to build custom data models from scratch.

\* Accelerated SAP BW/4HANA Implementation Using Ready-Made Models (C): One of the primary advantages of SAP BW/4HANA business content is that it provides pre-built data models, InfoObjects, DataSources, and transformations that align with standard business processes. These ready-made models can be activated and used immediately, significantly reducing the time and effort required to implement SAP BW/4HANA. For example:

\* Pre-configured DataSources for extracting data from SAP ERP systems.

\* Standardized InfoProviders (e.g., Advanced DataStore Objects, CompositeProviders) for reporting and analytics.

\* Predefined queries and dashboards for common use cases like financial reporting or sales analysis.

Advantages of Using SAP BW/4HANA Business Content: By leveraging these pre-delivered objects, organizations can focus on customizing and extending the solution to meet their specific needs rather than starting from scratch.

\* Ability to Modify Business Content Objects to Meet Customer-Specific Requirements (D): While SAP BW/4HANA business content provides a solid foundation, it is not intended to be used as-is in every scenario. SAP allows customers to modify and enhance business content objects to align with their unique business requirements. For example:

\* You can copy and adapt pre-delivered transformations to include custom logic.

\* You can extend InfoObjects or create new ones based on the delivered content.

\* Queries and reports can be customized to reflect specific KPIs or business metrics.

This flexibility ensures that business content serves as a starting point rather than a rigid framework, enabling organizations to tailor the solution to their needs.

\* Automatic Content Activation During Installation of SAP BW/4HANA (A): This statement is incorrect because SAP BW/4HANA business content is not automatically activated during installation. Instead, customers must manually activate the relevant business content objects based on their requirements.

This selective activation ensures that only the necessary objects are deployed, avoiding unnecessary clutter in the system.

\* Automatic Generation of Analysis Authorizations During SAP BW/4HANA Content Activation (B):

This statement is also incorrect. While SAP BW/4HANA provides tools and frameworks for managing analysis authorizations, they are not automatically generated during content activation. Customers must configure and maintain analysis authorizations separately.

to ensure proper access control for reporting users.

Incorrect Options:

SAP Data Engineer - Data Fabric Context: In the context of SAP Data Engineer - Data Fabric, leveraging SAP BW/4HANA business content is a key strategy for accelerating data integration and transformation projects. The pre-delivered models and objects enable rapid deployment of standardized data pipelines, while the ability to customize these objects ensures alignment with specific business needs. This approach supports the broader goals of the data fabric, such as seamless data connectivity, governance, and scalability.

For further details, you can refer to the following resources:

- \* SAP BW/4HANA Business Content Documentation: Explains the scope and usage of pre-delivered content.
- \* SAP Best Practices for SAP BW/4HANA: Provides guidance on implementing and customizing business content.
- \* SAP Learning Hub: Offers training on SAP BW/4HANA implementation and business content utilization.

By selecting C (Accelerated SAP BW/4HANA implementation using ready-made models) and D (Ability to modify business content objects to meet customer-specific requirements), you highlight the key benefits of using SAP BW/4HANA business content effectively.

### NEW QUESTION # 13

Which external hierarchy properties can be changed in the query definition? Note: There are 3 correct answers to this question.

- A. Display text nodes
- B. Exp to level
- C. Sort direction
- D. Time dependency
- E. Position of child nodes

Answer: B,C,E

### NEW QUESTION # 14

What foundation is necessary to use SAP S/4HANA embedded analytics?

- A. Generated external SAP HANA Calculation Views
- B. SAP HANA optimized business content
- C. ABAP CDS view based virtual data model
- D. SAP Agile Data Preparation

Answer: C

Explanation:

SAP S/4HANA Embedded Analytics relies on the ABAP CDS (Core Data Services) view-based Virtual Data Model (VDM). This foundation provides a unified layer for data consumption directly from transactional data in the S/4HANA system.

\* ABAP CDS Views as Foundation:

- \* CDS views define the semantic model for data and integrate seamlessly with SAP S/4HANA.
- \* These views allow users to build advanced reporting and analytics without requiring external data movement.
- \* Virtual Data Model (VDM):
- \* VDM provides a structured framework of CDS views optimized for analytics and reporting.
- \* It includes analytical, transactional, and consumption views tailored for SAP Analytics tools.

### NEW QUESTION # 15

Which are use cases for sharing an object? Note: There are 3 correct answers to this question.

- A. A source connection needs to be used in different replication flows.
- B. Time tables are defined in a central space should be used in many other spaces.
- C. A product dimension view should be used in different fact models for different business segments.
- D. A BW time characteristic should be used across multiple DataStore objects (advanced).
- E. Use remote tables located in the SAP BW bridge space across SAP DataSphere core spaces.

## Answer: B,C,D

### Explanation:

Sharing objects is a common requirement in SAP Data Fabric and SAP BW/4HANA environments to ensure reusability, consistency, and efficiency. Below is a detailed explanation of why the correct answers are A, B, and D:

\* Correct: Sharing a product dimension view across multiple fact models is a typical use case in data modeling. By reusing the same dimension view, you ensure consistency in how product-related attributes (e.g., product name, category, or hierarchy) are represented across different business segments. This approach avoids redundancy and ensures uniformity in reporting and analytics.

Option A: A product dimension view should be used in different fact models for different business segments

\* Correct: Time characteristics, such as fiscal year, calendar year, or week, are often reused across multiple DataStore objects (DSOs) in SAP BW/4HANA. Sharing a single time characteristic ensures that all DSOs use the same time-related definitions, which is critical for accurate time-based analysis and reporting.

Option B: A BW time characteristic should be used across multiple DataStore objects (advanced)

\* Incorrect: While source connections can technically be reused in different replication flows, this is not considered a primary use case for "sharing an object" in the context of SAP Data Fabric. Source connections are typically managed at the system level rather than being shared as reusable objects within the data model.

Option C: A source connection needs to be used in different replication flows

\* Correct: Centralized time tables are often created in a shared or central space to ensure consistency across different spaces or workspaces in SAP DataSphere. By sharing these tables, you avoid duplicating time-related data and ensure that all dependent models use the same time definitions.

Option D: Time tables are defined in a central space should be used in many other spaces

\* Incorrect: While remote tables in the SAP BW bridge space can be accessed across SAP DataSphere core spaces, this is more about cross-space access rather than "sharing an object" in the traditional sense. The focus here is on connectivity rather than reusability.

Option E: Use remote tables located in the SAP BW bridge space across SAP DataSphere core spaces

\* SAP DataSphere Documentation: Highlights the importance of centralizing and sharing objects like dimensions and time tables to ensure consistency across spaces.

\* SAP BW/4HANA Modeling Guide: Discusses the reuse of time characteristics and dimension views in multiple DSOs and fact models.

\* SAP Data Fabric Architecture: Emphasizes the role of shared objects in reducing redundancy and improving data governance.
