You can free download part of exam practice questions and answers about Scaled Agile certification SAFe-RTE exam from Free4Dump website as a try to detect the quality of our products. Why Free4Dump can provide the comprehensive and high-quality information uniquely? Because we have a professional team of IT experts. They continue to use their IT knowledge and rich experience to study the previous years exams of Scaled Agile SAFe-RTE and have developed practice questions and answers about Scaled Agile SAFe-RTE exam certification exam. So Free4Dump's newest exam practice questions and answers about Scaled Agile certification SAFe-RTE exam are so popular among the candidates participating in the Scaled Agile certification SAFe-RTE exam.

Scaled Agile SAFe Release Train Engineer Sample Questions (Q216-Q221):

NEW QUESTION # 216
During Pl Planning, who owns Feature priorities?

- A. Solution Architect/Engineer
- B. Business Owner
- C. Release Train Engineer
- D. Product Management

Answer: D

Explanation:
During Program Increment (PI) Planning in SAFe, it is the responsibility of Product Management to own the feature priorities.

Product Management is tasked with defining the features, prioritizing them, and accepting the final implementation. They play a crucial role in aligning the features with the business strategy and ensuring that the development work maximizes value delivery to stakeholders. This is in line with the SAFe principle of decentralizing decision-making and empowering those closest to the value stream to make decisions regarding the prioritization of work12.

NEW QUESTION # 217
During Pl Planning, who owns Feature priorities?

- A. Solution Architect/Engineer
- B. Business Owner
- C. Release Train Engineer
- D. Product Management

Answer: D

NEW QUESTION # 218
What does assigning business value to a team's Pl Objectives influence?

- A. How to achieve objectives
- B. How teams plan the implementation
- C. How the Kanban work in process limits are set

Answer: B

Explanation:
Assigning business value to PI Objectives influences how teams plan the implementation of these objectives.
During PI Planning, teams create PI objectives they intend to accomplish in the upcoming Program Increment (PI). These objectives provide a common language for communicating with business and technology stakeholders and create a near-term focus and vision. They enable the Agile Release Train (ART) to assess its performance and the business value achieved via the ART Predictability Measure. Moreover, setting realistic objectives helps avoid too much work-in-process (WIP) in the system, which is essential for effective implementation planning1.
The process of assigning business value is facilitated by Business Owners during PI Planning. This is a critical activity because it helps teams prioritize their work based on the value it delivers to the business. The business value assigned to each PI Objective is a reflection of its importance to the stakeholders and the organization's goals. It guides the teams in decision-making and determining the necessary steps and resources required for the implementation of their objectives2.
In summary, assigning business value to PI Objectives is a key practice in SAFe that directly impacts the way teams plan their work. It ensures that teams focus on delivering the highest value features and capabilities, which aligns with the overall strategy and objectives of the organization.

NEW QUESTION # 219
Scrum Masters are effective by using scrum methods, supporting SAFe principles and practices, and what else?

- A. Serving as a customer proxy
- B. Writing stories and enablers
- C. Supporting delivery using Agile practices
- D. Managing architectural runway

Answer: C

Explanation:
According to the SAFe framework, Scrum Masters are effective not only by using Scrum methods and supporting SAFe principles and practices but also by supporting delivery using Agile practices1. This involves coaching teams in self-organization and self-management, helping them coordinate and participate in Agile Release Trains (ARTs) events, and increasing the effectiveness of SAFe across the organization. The Scrum Master's role is to facilitate team events, assist the team in meeting their delivery goals, and work with other roles like the Release Train Engineer (RTE) to ensure a smooth process and delivery of value1.

NEW QUESTION # 220
Which statement is true about estimating and forecasting the Portfolio Backlog?

- A. Refinement is necessary when estimating the effort needed to implement an Epic
- B. Feature estimates are rolled up into Epic estimates
- C. WSJF is used to assign Epics to Value Streams

Answer: B

NEW QUESTION # 221

......
