NCP-EUC Exam Test, Pdf NCP-EUC Format

Mercenary men lust for wealth, our company offer high quality NCP-EUC practice engine rather than focusing on mercenary motives. They are high quality and high effective NCP-EUC training materials and our efficiency is expressed clearly in many aspects for your reference. The first one is downloading efficiency. The second is expressed in content, which are the proficiency and efficiency of NCP-EUC Study Guide. You will love our NCP-EUC exam questions as long as you have a try!

Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Sample Questions (Q136-Q141):

NEW QUESTION # 136
An administrator has been given a new support role for a group of 1000 users, which are all running Windows
10 Linked Clone virtual desktops,
The administrator learns quickly that the environment has been undersized with constant complaints from the user community around running out of storage. The administrator further discovers that the environment is memory constrained.
Which feature should the administrator enable to help relieve the capacity issue?

- A. Compression
- B. Deduplication
- C. Erasure Coding
- D. Auto-tiering

Answer: B

Explanation:
Deduplication is a process that eliminates duplicate data blocks and reduces the amount of storage space required for virtual desktops. Deduplication can be enabled at both cluster level and container level on Nutanix.
Deduplication can also work with VCAI (View Composer Array Integration), which is a feature that uses Nutanix native NFS snapshot technology to clone VMs2. VCAI can improve performance and reduce storage consumption for linked-clone desktop pools.
Another feature that can help with capacity issue is Shadow Clones, which is a distributed caching mechanism that allows multiple VMs to read from a single vDisk copy stored locally on each node3. Shadow Clones can reduce network traffic and improve boot times for virtual desktops.

NEW QUESTION # 137
An administrator has finished setting up a Frame environment and has to finish preparing the Sandbox image.
During the publishing andtesting phase, the administrator notices issue with the Sysprep process.
Which tool can the administrator use to prepare the Sysprep of the sandbox with error parsing?

- A. Frame Sysprep Helper Tool
- B. Frame Guest Agent 7
- C. Frame Guest Agent 8
- D. Windows Sysprep Built in tool

Answer: A

Explanation:
Sysprep is a Microsoft tool that prepares a Windows installation for cloning, auditing, and customer delivery2
3. The Frame Sysprep Helper Tool is designed to simplify the Microsoft Sysprep process by parsing errors reported by sysprep and immediately repairing them when possible1. Therefore, the tool that the administrator can use to prepare the Sysprep of the sandbox with error parsing is A (Frame Sysprep Helper Tool).

NEW QUESTION # 138
An administrator is required to keep past custom reports. The report runs once daily. Last Friday, when the administrator checked, there were 22 copies saved. On Friday this week, an administrator expects to see 29 saved report copies, but some reports are missing.
What is a probable cause?

- A. Time-based retention reached the maximum of 2 months.
- B. PC has migrated to another system and all reports are not visible.
- C. The system currently has retained the maximum of 25 copies.
- D. The system reached the default retention policy limit.

Answer: C

Explanation:
In Nutanix Prism Central, the reporting feature allows administrators to schedule and generate custom reports.
To manage storage and database capacity, Prism Central enforces a retention limit on these generated report instances.
According to the Prism Central Guide, "By default, Prism Central retains 25 instances of each report." In the scenario described:
* The administrator had 22 reports.
* Over the next week (7 days), 7 new reports were generated (22 + 7 = 29 total potential instances).
* Because the total (29) exceeds the hard default limit of 25, the system automatically rotated out (deleted) the 4 oldest copies to maintain the count at 25. This explains why reports are missing despite the expectation of seeing 29.

NEW QUESTION # 139
Which scenario represents the best case for how an organization would deploy non-persistent desktops to their employee and customer base?

- A. Application Quality Assurance Testing

- B. Registration kiosks at a conference
- C. High end developers
- D. Private equity traders

Answer: B

Explanation:
This is because registration kiosks are used by multiple customers who do not need to personalize their desktops or applications, and who only need to perform a specific task such as registering or checking in.
Non-persistent desktops can provide a secure and consistent user experience for these customers, and also reduce management overhead for the organization.

NEW QUESTION # 140
There are 50 people in a legal department who are scheduled to have their laptops replaced with virtual desktops. Their application suite consists of Microsoft Office 365, Photoshop, and an Ip-based application internally developed by the company.
Which option minimizes management overhead of the gold image, while providing the users with access to their application suite?

- A. Citrix Virtual Apps virtual hosted desktop with the application suite built into the gold Image
- B. Remote Desktop Services virtualizing the application suite
- C. Persistent virtual machines with the application suite built into the gold image
- D. Non-persi5tent MCS delivered virtual machines virtualizing the application suite

Answer: D

Explanation:
ersistent virtual machines are those that retain all the user's personal settings, files, and customizations after each session12. Non-persistent virtual machines are those that reset to a predefined state after each session and do not save any user data12. MCS (Machine Creation Services) is a Citrix feature that allows administrators to create and manage multiple virtual machines from a single master image3. Remote Desktop Services (RDS) is a Microsoft feature that allows users to access applications or desktops hosted on a remote server4. Citrix Virtual Apps is a Citrix feature that allows users to access applications hosted on a remote server or cloud5

NEW QUESTION # 141
......

With only one Nutanix NCP-EUC exam you can do this job nicely and easily.
