

Nutanix NCP-EUC Valid Test Voucher, NCP-EUC Valid Mock Test

BONUS!!! Download part of TestkingPDF NCP-EUC dumps for free: https://drive.google.com/open?id=1R0BrtHPp88i3cxW1K6GqNESnltI_RbK

The only goal of all experts and professors in our company is to design the best and suitable study materials for all people. According to the different demands of many customers, they have designed the three different versions of the NCP-EUC Study Materials for all customers. They sincerely hope that all people who use the NCP-EUC study materials from our company can pass the exam and get the related certification successfully.

All the contents in NCP-EUC training materials have three versions of APP, PC, and PDF. Buying NCP-EUC exam torrent is equivalent to purchasing three books at the same time. That is other materials on the market that cannot satisfy you. If you buy a paper version of the material, it is difficult for you to create a test environment that is the same as the real test when you take a mock test, but NCP-EUC exam questions provide you with a mock test system with timing and scoring functions, so that you will have the same feeling with that when you are sitting in the examination room. And if you buy the electronic version of the materials, it is difficult to draw marks on them, but NCP-EUC Exam Questions provide you with a PDF version, so that you can print out the information, not only conducive to your mark, but also conducive to your memory of important knowledge. At the same time, any version of NCP-EUC training materials will not limit the number of downloads simultaneous online users. You can study according to your personal habits and time schedules regardless of where and when.

NCP-EUC Valid Mock Test & VCE NCP-EUC Dumps

It is common in modern society that many people who are more knowledgeable and capable than others finally lost some good opportunities for development because they didn't obtain the NCP-EUC Certification. The prerequisite for obtaining the NCP-EUC certification is to pass the exam, but not everyone has the ability to pass it at one time. Because of not having appropriate review methods and review materials, or not grasping the rule of the questions, so many candidates eventually failed to pass even if they have devoted much effort.

Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Sample Questions (Q40-Q45):

NEW QUESTION # 40

An administrator is monitoring cluster I/O and Latency during VDI user logins shortly after 9:00am

Which option best describes what is shown in this scenario?

- A. Compression
- B. Fiber Channel MPIO
- C. DSF
- D. Data Locality

Answer: D

Explanation:

The charts provided display a scenario typical of a VDI Boot Storm or login storm, characterized by a massive spike in Read IOPS (top chart) while maintaining extremely low Read I/O Latency (bottom chart).

This behavior is best described by Data Locality (specifically leveraged through a mechanism often called Shadow Clones in VDI contexts).

* The Scenario: During VDI logins, hundreds or thousands of VMs simultaneously read from the same base "Golden Image" or replica disk.

* The Mechanism: Nutanix Data Locality ensures that VM data is served locally from the node where the VM is running. In the specific case of multi-reader VDI workloads, the Nutanix Distributed Storage Fabric detects that the same vDisk is being read by VMs across multiple nodes. It automatically caches this vDisk (Shadow Clone) on the local SSD/RAM of every node.

* The Result: As shown in the graphs, the cluster delivers very high Read IOPS because every node is serving its own VMs from local cache, preventing network congestion. Consequently, the latency remains flat and near-zero, rather than spiking as it would in a traditional centralized storage architecture where all reads traverse the network to a single controller.

NEW QUESTION # 41

Refer to the exhibit.

An administrator navigates to Prism Central VM (PCVM) by DNS

name and receives the message displayed. When browsing directly to an IP address of any of the PCVMs or the virtual IP, the login screen is immediately displayed.

Which would cause this behavior?

- A. This browser doesn't trust the issuing Certificate Authority.
- B. Certificate doesn't include the Subject Alternative Name.
- C. This browser is not supported.
- D. Certificate was only applied to one PCVM.

Answer: A

Explanation:

The error code displayed in the exhibit, NET::ERR_CERT_AUTHORITY_INVALID, explicitly indicates that the browser does not trust the Certificate Authority (CA) that signed the SSL certificate presented by Prism Central.

According to the Nutanix Security Guide and Prism Central documentation regarding Security Certificate Management:

* By default, Nutanix clusters and Prism Central use a self-signed certificate.

* When an administrator accesses Prism via a web browser using these default certificates, the browser will display a security warning (such as "Your connection is not private") because the self-signed certificate authority is not in the browser's or operating system's Trusted Root Certification Authorities store.

* To resolve this behavior, the administrator must either import the self-signed root certificate into the client's trusted store or replace the default certificate with one signed by a commercial or internal CA that the browser already trusts.

If the issue were related to the hostname missing (Option C), the error code would be NET::

ERR_CERT_COMMON_NAME_INVALID. Since the error is specifically "Authority Invalid," the cause is the lack of trust in the issuer (CA).

NEW QUESTION # 42

Shutterstock

An administrator is using EUC broker software to manage and direct connections to virtual desktops and applications. The administrator is being asked to make sure traffic is distributed across the broker VMs and wants to make sure the best solution is being implemented.

How can the administrator best accomplish this goal?

- A. Use Nutanix Data Lens to provide efficiency across VMs.
- B. Use the virtual switch in active-active mode across all hosts.

- C. Use Flow Virtual Networking and external load balancers.
- D. Use round-robin DNS to distribute connections.

Answer: D

Explanation:

In the context of distributing connections across multiple broker VMs (such as Citrix Delivery Controllers or Horizon Connection Servers) without introducing complex third-party infrastructure dependencies like strict SDN overlays (Option A), Round-robin DNS is the standard supported method for connection distribution mentioned in basic Nutanix EUC architecture guides.

While enterprise production environments often use dedicated External Load Balancers (like Citrix ADC), Option A implies the mandatory use of Flow Virtual Networking (an overlay SDN solution) to achieve this, which is not a standard requirement for simple broker load balancing. Therefore, among the available choices, creating multiple DNS A-records for the broker FQDN (Round-robin DNS) is the valid mechanism to distribute incoming user traffic across the available broker nodes.

NEW QUESTION # 43

A Windows IO VM fails to power on With an NVIDIA vCPU profile in ESXi 7. The VM is configured with NVIDIA profile by selecting Shared PCI Device, adding the NVIDIA GRID vCPU device, and selecting the Profile under VM settings.

The following error message is displayed in the vSphere web client:

What should be done to resolve this issue?

- A. Switch the GPU mode to compute mode using gpumodeswitch command.
- B. Change the Graphics mode of the host from Shared to Shared Direct
- C. change the Graphics mode of the host from Shared Direct to Shared.
- D. Change the Graphics mode of the host from Shared to Shared Direct
- E. **Switch the GPU mode to graphics mode using gpumodeswitch command.**

Answer: E

Explanation:

gpumodeswitch is a command-line tool that is used to switch supported NVIDIA GPUs between compute and graphics mode. Compute mode allows multiple VMs to share a GPU for CUDA workloads. Graphics mode allows a single VM to use a GPU for graphics workloads12.

NEW QUESTION # 44

An administrator has a 3-node ESXi-based Nutanix cluster where one host has an NVIDIA GPU installed.

The administrator is planning to perform an ESXi upgrade using Nutanix Life Cycle Manager (LCM) and requires the NVIDIA vGPU-enabled VM to remain online throughout the maintenance window.

What should the administrator do to successfully complete this task?

- A. Configure VMware HA and DRS.
- B. Temporarily disable the vGPU.
- C. **Install a GPU in a second host.**
- D. Hot-swap the GPU between hosts.

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of Nutanix End User Computing documents:

According to Nutanix LCM and NVIDIA vGPU operational best practices:

* Live Migration Requirement: To keep a VM "online" during a host upgrade, the VM must be live-migrated (vMotioned) off the host entering maintenance mode.

* vGPU Constraint: A VM configured with a vGPU profile cannot be live-migrated to a host that does not have a compatible physical GPU resource available.4 The destination host must have a GPU capable of hosting the specific vGPU profile.

* The Solution: Since only one host currently has a GPU, there is no valid destination for the VM to migrate to. The administrator must install a GPU in a second host to create a valid migration target.

This allows the VM to vMotion to the second host, keeping it online while the first host is upgraded.

NEW QUESTION # 45

It is quite clear that most candidates are at their first try, therefore, in order to let you have a general idea about our NCP-EUC test engine, we have prepared the free demo in our website. The contents in our free demo are part of the real materials in our NCP-EUC study engine. Just like the old saying goes "True blue will never strain" You are really welcomed to download the free demo in our website to have the firsthand experience, and then you will find out the unique charm of our NCP-EUC Actual Exam by yourself.

NCP-EUC Valid Mock Test: <https://www.testkingpdf.com/NCP-EUC-testking-pdf-torrent.html>

Nutanix NCP-EUC Valid Test Voucher God will help those who help themselves, Our questions and answers in our NCP-EUC training materials are certified by our IT professionals, Every year more than thousands of candidates choose our reliable NCP-EUC test guide materials we help more than 98% of candidates clear exams, we are proud of our NCP-EUC exam questions, TestkingPDF NCP-EUC Valid Mock Test is a website that provides the candidates with the excellent IT certification exam materials.

There's no speculation. This does not affect outside clients, God will help those who help themselves, Our questions and answers in our NCP-EUC Training Materials are certified by our IT professionals.

2026 The Best 100% Free NCP-EUC – 100% Free Valid Test Voucher | Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Valid Mock Test

Every year more than thousands of candidates choose our reliable NCP-EUC test guide materials we help more than 98% of candidates clear exams, we are proud of our NCP-EUC exam questions.

TestkingPDF is a website that provides the candidates with the excellent IT certification exam materials, Of course, our NCP-EUC practice braindumps can bring you more than that.
