2026 SC-200: Microsoft Security Operations Analyst –Trustable Real Exam Questions

This format of LatestCram Microsoft SC-200 practice material is compatible with these smart devices: Laptops, Tablets, and Smartphones. This compatibility makes SC-200 PDF Dumps easily usable from any place. It contains real and latest SC-200 exam questions with correct answers. LatestCram examines it regularly for new updates so that you always get new Microsoft Security Operations Analyst (SC-200) practice questions. Since it is a printable format, you can do a paper study. The Microsoft Security Operations Analyst (SC-200) PDF Dumps document is accessible from every location at any time.

Microsoft Security Operations Analyst Sample Questions (Q332-Q337):

NEW QUESTION # 332
You have an Azure Functions app that generates thousands of alerts in Azure Security Center each day for normal activity.
You need to hide the alerts automatically in Security Center.

Which three actions should you perform in sequence in Security Center? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:
1 - Select Security policy.
2 - Select Suppression rules, and then...
3 - Select Azure Resource as the entity...

NEW QUESTION # 333
You have a Microsoft 365 subscription that uses Microsoft Defender for Endpoint.
You need to add threat indicators for all the IP addresses in a range of 171.23.3432-171.2334.63. The solution must minimize administrative effort.
What should you do in the Microsoft 365 Defender portal?

- A. Create an import file that contains the individual IP addresses in the range. Select Import and import the file.
- B. Select Add indicator and set the IP address to 171.2334.32-171.23.34.63.
- C. Select Add indicator and set the IP address to 171.23.34.32/27
- D. Create an import file that contains the IP address of 171.23.34.32/27. Select Import and import the file.

Answer: A

Explanation:
Explanation
This will add all the IP addresses in the range of 171.23.34.32/27 as threat indicators. This is the simplest and most efficient way to add all the IP addresses in the range.

NEW QUESTION # 334
You plan to connect an external solution that will send Common Event Format (CEF) messages to Azure Sentinel.
You need to deploy the log forwarder.
Which three actions should you perform in sequence? To answer, move the appropriate actions form the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:
1 - Download and install the Log Analytics agent.
2 - Set the Log Analytics agent to listen on,,,,,,,
3 - Configure the syslog daemon. Restart,,,,,,,,
Reference:
https://docs.microsoft.com/en-us/azure/sentinel/connect-cef-agent?tabs=rsyslog

NEW QUESTION # 335
You need to complete the query for failed sign-ins to meet the technical requirements.
Where can you find the column name to complete the where clause?

- A. Azure Advisor
- B. the query windows of the Log Analytics workspace
- C. Security alerts in Azure Security Center
- D. Activity log in Azure

Answer: B

NEW QUESTION # 336

You have a Microsoft Sentinel workspace.
You have a KQL query. The query returns Microsoft Sentinel incidents that are stored in the SecurityIncident table and occurred during the last 90 days.
You need to create a Microsoft Sentinel workbook that will include a visualization of the query.
To what should you set Data source and Resource type for the workbook? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

□

Answer:

Explanation:
□
Explanation:
□
When you create a Microsoft Sentinel workbook that visualizes data retrieved using a Kusto Query Language (KQL) query, the workbook must use a data source that supports log analytics queries. According to Microsoft Sentinel and Azure Monitor documentation, Logs (Analytics) is the correct data source type for querying tables stored within a Log Analytics workspace, such as the SecurityIncident table. This table is where Microsoft Sentinel stores incident data.
In the workbook configuration, the Resource type determines which service the query context applies to.
Since you are querying Microsoft Sentinel incidents (not general Azure Monitor logs or metrics), you must set the resource type to Microsoft Sentinel. This ensures that the workbook is connected to Sentinel's analytics schema and can display visualizations (charts, metrics, timelines) based on Sentinel's native data tables.
Alternative resource types such as Log Analytics or Workspace could technically access the same data, but Microsoft Sentinel documentation recommends selecting Microsoft Sentinel when the workbook is designed for security operations and incident analysis. This provides tighter integration with the SOC dashboard experience, Sentinel permissions, and security insights views.
# Therefore, the correct selections are:
* Data source: Logs (Analytics)
* Resource type: Microsoft Sentinel

NEW QUESTION # 337

......

Our SC-200 study materials are written by experienced experts in the industry, so we can guarantee its quality and efficiency. The content of our SC-200 learning guide is consistent with the proposition law all the time. We can't say it's the best reference, but we're sure it won't disappoint you. This can be borne out by the large number of buyers on our website every day. A wise man can often make the most favorable choice, I believe you are one of them. If you are not at ease before buying our SC-200 Actual Exam, we have prepared a free trial for you. Just click on the mouse to have a look, giving you a chance to try. Perhaps this choice will have some impact on your life.
