Actual HP HPE0-S59 Test Pdf, Latest HPE0-S59 Exam Online

itPass4sure is a website to provide HP certification exam training tool for people who attend HP certification exam examinee. itPass4sure's training tool has strong pertinence, which can help you save a lot of valuable time and energy to pass HPE0-S59 certification exam. Our exercises and answers and are very close true HPE0-S59 examination questions. IN a short time of using itPass4sure's simulation test, you can 100% pass the exam. So spending a small amount of time and money in exchange for such a good result is worthwhile. Please add itPass4sure's training tool in your shopping cart now.

HPE Compute Solutions Sample Questions (Q82-Q87):

NEW QUESTION # 82

What role does Prometheus play in HPE AI Essentials?

- A. It cleans up idle applications to make room for new applications.
- B. It authenticates and secures communications between workloads.
- C. It gathers metrics and provides built-in alerting.
- D. It automates detecting drift in deployed models.

Answer: C

Explanation:

Prometheus is used for monitoring by collecting metrics from components in the environment and supporting alerting based on those metrics, enabling visibility into system and application performance.

NEW QUESTION # 83

An administrator tries to open iLO interlace from HPE OneView Instead of being automatically logged in a login prompt displays. Where should you start the troubleshooting process?

- A. At HPE OneView Interface to verify whether the server is In the maintenance mode
- B. At the iLO interface to verify whether the ILO Advanced license is properly applied
- C. At HPE OneView Interface to verify whether the iLO processor is disabled
- **D. At the iLO interface to verify whether the SSO certificate is removed from an iLO**

Answer: D

Explanation:

When the iLO interface prompts for a login instead of automatically logging in via HPE OneView, a common issue is that the Single Sign-On (SSO) certificate might have been removed or is not properly configured on the iLO. Verifying the presence and validity of the SSO certificate on the iLO interface is a critical step in troubleshooting this issue.

NEW QUESTION # 84

Which statement about a new HPE SimpliVity deployment is true?

- **A. New HPE SimpliVity deployments gives customer flexible choice of hypervisor**
- B. All new HPE SimpliVity models are based on mid CPUs
- C. A new HPE SimpliVity node can be a member of multiple dusters
- D. AM new HPE SimpliVity models are software optimized

Answer: A

Explanation:

New HPE SimpliVity deployments offer customers the flexibility to choose between different hypervisors, such as VMware vSphere and Microsoft Hyper-V. This flexibility allows customers to select the hypervisor that best fits their existing infrastructure and operational preferences.

NEW QUESTION # 85

Your customer manages HPE Synergy using HPE OneView. For one of its projects, the company purchased 50 HPE ProLiant DK385 Gen10 Plus v2. They plan to manage the new systems using HPE OneView as well. What should the customer do to manage rack system using HPE OneView?

- A. add the rack system to the HPE OneView instance used to manage HPE Synergy to centralize management of all systems.
- B. connect the rack system to an IPDU and add the IPDU to the HPE. OneView instance that is used for HPE synergy management.
- **C. Deploy an HPE OneView virtual appliance, and, after configuration, use it to manage only the rack systems.**
- D. Deploy HPE OneView Global Dashboard and add the rack systems there, as AMD systems are not directly in HPE OneView.

Answer: C

Explanation:

HPE OneView can manage both HPE Synergy and HPE ProLiant rack servers, but not from the same appliance instance when Synergy is involved.

When HPE OneView is used to manage HPE Synergy, it uses a special Synergy-specific appliance (Composer or Composer2), which cannot directly manage rack servers like the HPE ProLiant DL385 Gen10 Plus v2.

To manage rack servers, the customer must deploy a separate HPE OneView virtual appliance dedicated for that purpose.

Once deployed and configured, this appliance can manage HPE ProLiant rack servers independently.

NEW QUESTION # 86

Your customer with an HPE Synergy environment needs to prevent a timeout and loss of communication during an external switch firmware upgrade. Which parameter can the customer configure within an uplink set to meet their requirements?

- A. The customer should set LACP timer to long.
- B. The customer should enable LACP load-balancing.
- C. The customer should set the connection mode to manual.
- D. The customer should disable LACP failover trigger.

Answer: A

Explanation:

To prevent timeouts and communication loss during external switch firmware upgrades in an HPE Synergy environment, the customer should set the LACP timer to "long". This increases the time interval for LACP keepalives, helping maintain the LACP session during temporary link interruptions.

NEW QUESTION # 87

.....

Our professions endeavor to provide you with the newest information on our HPE0-S59 exam questions with dedication on a daily basis to ensure that you can catch up with the slight changes of the HPE0-S59 exam. Therefore, our customers are able to enjoy the high-productive and high-efficient users' experience. In this circumstance, as long as your propose and demand on HPE0-S59 Guide quiz are rational, we have the duty to guarantee that you can enjoy the one-year updating system for free.
