

# Pass Digital-Forensics-in-Cybersecurity Test Guide, Digital-Forensics-in-Cybersecurity Exam Details

## WGU D431 - Digital Forensics in Cybersecurity Exam Preview | Graded A+ | 100% Correct

### TERM

Know the laws

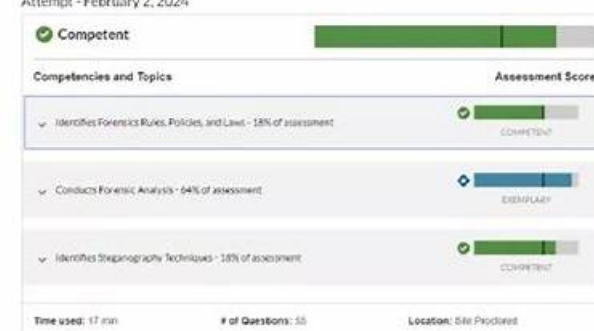

### DEFINITION

Several questions about ECPA, Wireless , and which laws established computer crime task force and regional forensics labs.

### LOCATION

COACHING REPORT - Digital Forensics in Cybersecurity (DQO1)

Attempt - February 2, 2024

### TERM

Know the tools and important file locations

### DEFINITION

Half a dozen questions asking which tool detects steganography. Several asking which specific tool for purpose (free, to edit mp3/video/image, for iphone, etc). Several about specific mac or windows file/folder locations.

### LOCATION

What's more, part of that Real4exams Digital-Forensics-in-Cybersecurity dumps now are free: <https://drive.google.com/open?id=1Ak3B0f3IA4KuQwTMN6BJpfSwY4fND8oq>

The modern WGU world is changing its dynamics at a fast pace. To stay and compete in this challenging market, you have to learn and enhance your in-demand skills. Fortunately, with the Digital Forensics in Cybersecurity (D431/C840) Course Exam (Digital-Forensics-in-Cybersecurity) certification exam you can do this job nicely and quickly. To do this you just need to enroll in the WGU Digital-Forensics-in-Cybersecurity Certification Exam and put all your efforts to pass the Digital Forensics in Cybersecurity (D431/C840) Course Exam (Digital-Forensics-in-Cybersecurity) certification exam.

Our Digital-Forensics-in-Cybersecurity study braindumps are so popular in the market and among the candidates that is because that not only our Digital-Forensics-in-Cybersecurity learning guide has high quality, but also our Digital-Forensics-in-Cybersecurity practice quiz is priced reasonably, so we do not overcharge you at all. Meanwhile, our exam materials are demonstrably high effective to help you get the essence of the knowledge which was convoluted. As long as you study with our Digital-Forensics-in-Cybersecurity Exam Questions for 20 to 30 hours, you will pass the exam for sure.

**Free PDF Quiz 2026 Digital-Forensics-in-Cybersecurity: Digital Forensics in Cybersecurity (D431/C840) Course Exam Marvelous Pass Test Guide**

Our company guarantees this pass rate from various aspects such as content and service on our Digital-Forensics-in-Cybersecurity exam questions. We have hired the most authoritative professionals to compile the content Of the Digital-Forensics-in-Cybersecurity study materials. And we offer 24/7 service online to help you on all kinds of the problems about the Digital-Forensics-in-Cybersecurity learning guide. Of course, we also consider the needs of users, our Digital-Forensics-in-Cybersecurity exam questions hope to help every user realize their dreams.

## WGU Digital Forensics in Cybersecurity (D431/C840) Course Exam Sample Questions (Q70-Q75):

### NEW QUESTION # 70

A forensic examiner is reviewing a laptop running OS X which has been compromised. The examiner wants to know if any shell commands were executed by any of the accounts.

Which log file or folder should be reviewed?

- A. /Users/<user>/bash\_history
- B. /var/log
- C. /Users/<user>/Library/Preferences
- D. /var/vm

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

The .bash\_history file located in each user's home directory (e.g., /Users/<user>/bash\_history) records the history of shell commands entered by the user in bash shell sessions. Reviewing this file allows investigators to see the commands executed by a specific user.

\* /var/vm contains virtual memory swap files, not command history.

\* /var/log contains system logs but not individual user shell command history.

\* /Users/<user>/Library/Preferences stores application preferences.

NIST guidelines and macOS forensics literature confirm .bash\_history as the standard location for shell command histories on OS X systems.

### NEW QUESTION # 71

Tom saved a message using the least significant bit (LSB) method in a sound file and uploaded this sound to his own website.

What is the carrier in this example?

- A. The message
- B. The least significant bit method
- C. Tom's website
- D. The sound file

**Answer: D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In steganography, the carrier is the file or medium used to hide the secret message. In this example, the sound file is the carrier because it contains the hidden message embedded using the least significant bit method. The message is the payload, and the website is merely the distribution platform.

\* LSB is the embedding technique, not the carrier.

\* The message is the payload, not the carrier.

\* The website is not involved in data hiding.

NIST and steganography references clearly define the carrier as the container holding the hidden data.

### NEW QUESTION # 72

A forensic investigator needs to know which file type to look for in order to find emails from a specific client.

Which file extension is used by Eudora?

- A. .pst

- B. .ost
- C. .dbx
- D. .mbx

**Answer: D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Eudora email client uses the.mbxfile extension to store email messages. The.mbxformat stores emails in a mailbox file similar to the standard mbox format used by other email clients.

- \* .dbxis used by Microsoft Outlook Express.
- \* .ostand.pstare file types used by Microsoft Outlook.
- \* Therefore,.mbxis specific to Eudora.

Reference:Digital forensics literature and software documentation clearly indicate Eudora's.mbxfile format as the repository for its email storage.

### NEW QUESTION # 73

Which law is related to the disclosure of personally identifiable protected health information (PHI)?

- A. Health Insurance Portability and Accountability Act (HIPAA)
- B. Communications Assistance to Law Enforcement Act (CALEA)
- C. The Privacy Protection Act (PPA)
- D. Electronic Communications Privacy Act (ECPA)

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

HIPAA establishes standards to protect sensitive patient health information (PHI) and regulates the use and disclosure of such information. Forensic investigators dealing with health data must comply with HIPAA to avoid legal violations.

- \* HIPAA compliance is critical when handling medical records in investigations.
- \* Breach of PHI privacy can result in civil and criminal penalties.

Reference:HIPAA is widely referenced in cybersecurity and forensic policies relating to healthcare data protection.

### NEW QUESTION # 74

Which operating system creates a swap file to temporarily store information from memory on the hard drive when needed?

- A. Linux
- B. Windows
- C. Mac
- D. Unix

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Windows uses a swap file (commonly calledpagefile.sys) to extend physical memory (RAM) by temporarily storing data from memory to disk when RAM is insufficient. This allows the system to handle more data than the available RAM.

- \* Linux and Unix typically use dedicated swap partitions or swap files but refer to them differently and manage them in other ways.
- \* Mac OS X uses a paging file system but does not typically use a "swap file" in the Windows sense; it uses dynamic paging files instead.
- \* The terminology "swap file" is most commonly associated with Windows.

Reference:Microsoft Windows forensics guidelines and NIST documentation describe the page file's role in virtual memory management in Windows operating systems.

### NEW QUESTION # 75

.....

Our Digital-Forensics-in-Cybersecurity training materials have won great success in the market. Tens of thousands of the candidates are learning on our Digital-Forensics-in-Cybersecurity practice engine. First of all, our Digital-Forensics-in-Cybersecurity study dumps cover all related tests about computers. It will be easy for you to find your prepared learning material. If you are suspicious of our Digital-Forensics-in-Cybersecurity Exam Questions, you can download the free demo from our official websites.
